01 · EXECUTIVE SUMMARY

Setting the Strategic Direction

RIC Medical operates at the intersection of global medical innovation and Saudi Arabia's rapidly expanding healthcare sector. This document presents a structured digital marketing strategy designed to elevate RIC's market visibility, engage clinical decision-makers, and generate qualified leads across RIC Medical's full portfolio of advanced medical solutions.

The strategy covers RIC Medical's complete range of medical technologies and equipment categories, positioning the company as a trusted, broad-portfolio technology partner serving hospitals, clinics, and healthcare institutions across the Kingdom — rather than a single-product supplier.

Rather than a fragmented series of campaigns, this blueprint delivers a unified, multi-platform digital presence that builds trust at every touchpoint in the B2B healthcare buyer journey — from initial discovery through to a sales conversation.

🎯

Primary Objective

Position RIC Medical as a trusted healthcare technology partner and generate qualified leads across key clinical segments.

📡

Channel Approach

LinkedIn for B2B lead generation, Instagram for brand credibility, TikTok for educational discovery and awareness.

🏥

Market Focus

Orthopedics, spine care, pain management, gastroenterology, hospital procurement, and surgical centers in Saudi Arabia.

02 · HEALTHCARE MARKET CONTEXT

How Hospitals Discover Medical Technology Today

The way hospitals and clinicians evaluate and procure medical technology has fundamentally shifted. Decision-making is no longer confined to trade shows and in-person sales calls — it begins online, often before a supplier is ever contacted.

Orthopedic surgeons research device efficacy on PubMed and LinkedIn. Gastroenterologists watch procedural technique videos on social platforms. Procurement managers cross-reference suppliers on Google before initiating contact. In Saudi Arabia, Vision 2030's healthcare transformation agenda is accelerating the adoption of advanced medical technologies.

KEY MARKET INSIGHT

A medical technology supplier without a coherent digital presence is effectively invisible to a growing segment of clinical decision-makers who begin their vendor evaluation online. Digital presence is no longer optional — it is a prerequisite for commercial credibility.

BUYER BEHAVIOUR	IMPLICATION FOR RIC MEDICAL
Physicians research technologies independently before engaging reps	Content must educate before it sells
Procurement teams compare multiple suppliers digitally	RIC's LinkedIn and website must project institutional credibility
Clinical influencers shape peer decisions	Social proof through testimonials and clinical content builds trust
Conference discovery leads to digital follow-up	A strong digital presence converts in-person introductions into sales conversations
Younger doctors are digital-native and use video for CPD	Short educational video content (Reels, TikTok) drives reach with next-gen prescribers

03 · PRODUCT PORTFOLIO OVERVIEW

A Broad Portfolio Across Key Clinical Categories

RIC Medical distributes a comprehensive range of advanced medical technologies sourced from globally recognised manufacturers. Rather than marketing individual products in isolation, the strategy positions RIC Medical as a **multi-category clinical technology partner** — capable of supporting hospitals across multiple departments and care pathways.

CATEGORY 01

Treatment Technologies

Specialty & Therapeutic Systems

Advanced therapeutic systems for the management of chronic and acute clinical conditions. Covers non-surgical treatment modalities, pain management technologies, and specialist intervention systems used across orthopedic, spine, and rehabilitation settings.

Primary Customers:

Orthopedic Surgeons · Spine Specialists · Physiotherapy Clinics · Pain Management Centers

CATEGORY 02

Diagnostic & Procedural

Minimally Invasive & Single-Use Systems

A range of diagnostic and procedural technologies including single-use and reusable endoscopy systems, imaging tools, and point-of-care instruments. Designed to support infection control, reduce reprocessing costs, and deliver reliable clinical performance across diagnostic and surgical settings.

Primary Customers:

Gastroenterologists · Hospital Endoscopy Depts. · Surgical Centers · Urology Departments

PORTFOLIO CATEGORY	TECHNOLOGY TYPE	PRIMARY CLINICAL SETTING	STRATEGIC ROLE
Treatment Technologies	Specialty Treatment	Spine clinics · Pain management · Physiotherapy	Non-surgical and therapeutic care for chronic conditions
Diagnostic & Procedural	Diagnostic & Procedural	Hospitals · Surgical centers · Endoscopy suites	Minimally invasive diagnostics and procedural interventions
Rehabilitation Solutions	Rehabilitation	Rehab centers · Physiotherapy · Post-surgical care	Patient recovery and functional restoration technologies
Hospital Infrastructure	Infrastructure	ICU · Emergency · General wards	Monitoring, support systems, and operational equipment

PORTFOLIO STRATEGY

All digital marketing communications will reflect RIC Medical as a **multi-technology distributor** across these categories — not a single-product company. This framing maximises the breadth of commercial opportunities and positions RIC as a long-term partner to hospital procurement teams.

05 · HOSPITAL TECHNOLOGY ECOSYSTEM

Supporting the Full Clinical Infrastructure

Modern hospitals function as an integrated technology ecosystem. Every department relies on a continuous supply of validated medical technology. RIC Medical's role is to be the trusted partner that fills critical technology gaps across this ecosystem.

Diagnostics

Technologies enabling accurate identification of clinical conditions. Includes endoscopy, imaging, and point-of-care diagnostic tools.

Minimally Invasive Procedures

Single-use and reusable procedural tools that reduce patient risk, infection exposure, and recovery time.

Treatment Technologies

Advanced therapeutic systems for chronic conditions including spinal decompression, pain management, and specialist treatment modalities.

Rehabilitation Solutions

Technologies supporting patient recovery, physical rehabilitation, and functional restoration across musculoskeletal and neurological care pathways.

STRATEGIC FRAMING

When RIC Medical presents itself across multiple technology categories, it transforms from a transactional vendor into a **long-term institutional partner**. This framing significantly increases the lifetime value of each hospital relationship and positions RIC favorably in procurement decision processes.

04 · STRATEGIC POSITIONING

From Distributor to Technology Partner

The most important strategic shift in RIC Medical's brand communication is the transition from being perceived as a "medical equipment supplier" to being positioned as a **clinical technology partner** that brings globally validated solutions to Saudi Arabia's healthcare institutions.

CORE BRAND POSITION

"RIC Medical partners with leading global manufacturers to bring advanced, clinically validated medical technologies to hospitals and healthcare providers across Saudi Arabia — enabling institutions to deliver better patient outcomes with proven, modern solutions."

DIMENSION	MOVE FROM	MOVE TO
Company Role	Medical equipment distributor	Healthcare technology solutions partner
Value Proposition	Product availability	Clinical outcomes and institutional capability
Audience Relationship	Vendor to purchaser	Strategic partner to clinical and administrative leadership
Digital Presence	Minimal or transactional	Credible, educational, and professionally authoritative
Portfolio Framing	List of products	Curated ecosystem of advanced clinical technologies

06 · TARGET AUDIENCE SEGMENTATION

Who We Are Reaching

Effective healthcare B2B marketing requires a precise understanding of the decision-making units within hospital and clinic environments. Different roles respond to different messages — and the content strategy must reflect this.

AUDIENCE SEGMENT	PLATFORM PRIORITY	KEY INTERESTS	RIC'S RELEVANCE
Orthopedic Surgeons	LinkedIn	Non-surgical alternatives, patient outcomes, clinical evidence	Advanced treatment technology as a complement or alternative to surgical intervention
Spine Specialists	LinkedIn, Instagram	Disc pathology treatment protocols, evidence-based therapy	Treatment technology clinical efficacy and patient case outcomes
Physiotherapy Clinics	Instagram, TikTok	Treatment modalities, clinic differentiation, equipment ROI	Advanced treatment systems as a high-value clinic service offering
Pain Management Centers	LinkedIn, Instagram	Chronic pain solutions, non-opioid alternatives	Advanced non-pharmacological therapy solutions
Gastroenterologists	LinkedIn	Endoscopy performance, infection control, disposable endoscopes	Single-use and minimally invasive endoscopy solutions
Hospital Procurement Managers	LinkedIn	Vendor reliability, cost-effectiveness, compliance, after-sales support	RIC as a trusted multi-technology distributor with local presence
Biomedical Engineers	LinkedIn	Technical specifications, device safety, maintenance, regulatory compliance	Technical documentation, certifications, and product support credentials
Hospital Administrators	LinkedIn	Operational efficiency, investment justification, strategic partnerships	RIC as a long-term technology partner that supports institutional growth

07 · COMPETITIVE LANDSCAPE

Understanding the Competitive Environment

Awareness of the competitive landscape enables RIC Medical to position its offering clearly and articulate differentiation with confidence. In both target technology categories, global incumbents present established competition — but RIC's multi-technology model and local market expertise represent meaningful strategic advantages.

SPINAL DECOMPRESSION — COMPETITORS

- SpineMED
- VAX-D
- Accu-SPINA
- Chattanooga Traction Systems

ENDOSCOPY SOLUTIONS — COMPETITORS

- Olympus Medical Systems
- Fujifilm Healthcare
- PENTAX Medical
- Ambu (Single-Use Endoscopy)
- SonoScape Medical

RIC DIFFERENTIATOR	STRATEGIC VALUE
Multi-technology portfolio	Hospitals can source multiple advanced solutions through a single, trusted partner — reducing procurement complexity
Global manufacturer partnerships	Exclusive or priority access to internationally validated technologies not widely available in the Saudi market
Saudi market expertise	Local presence, cultural understanding, and regulatory familiarity that international competitors lack
Flexible solutions model	Ability to tailor technology packages to hospital-specific needs, budgets, and clinical requirements

08 · MARKETING OBJECTIVE

What This Strategy Is Designed to Achieve

The primary commercial objective is to position RIC Medical as the most credible and visible healthcare technology partner for hospitals and clinics in Saudi Arabia — while generating a consistent pipeline of qualified leads for the business development team.

🤝

Build Trust at Scale

Establish RIC Medical as a recognised, credible, and authoritative presence within Saudi Arabia's clinical community.

💡

Educate the Market

Simplify complex medical technologies through consistent educational content that positions RIC as a knowledgeable partner.

📋

Generate Qualified Leads

Drive inbound enquiries and outbound conversations that convert into product demonstrations and hospital meetings.

09 · MULTI-PLATFORM DIGITAL STRATEGY

Platform Strategy Overview

Each platform serves a distinct and complementary role within the overall marketing strategy. Content is neither duplicated nor siloed — it is adapted and sequenced to match platform-specific audience behaviour and commercial intent.

💼

LinkedIn

B2B networking, lead generation, and professional authority building

Primary Sales Channel

📸

Instagram

Brand credibility, visual storytelling, and technology awareness

Awareness & Trust

▶

TikTok

Educational discovery and reach with younger clinical audiences

Discovery & Reach

PLATFORM	PRIMARY ROLE	TARGET AUDIENCE	CONTENT TYPE	COMMERCIAL OBJECTIVE
LinkedIn	B2B lead generation & networking	Surgeons, procurement managers, hospital administrators	Thought leadership, product insights, case studies, outreach	Generate conversations and product demo requests
Instagram	Brand credibility & awareness	Healthcare professionals, clinic managers, clinicians	Visual content, technology showcases, infographics	Build brand trust and warm the audience for LinkedIn conversion
TikTok	Educational discovery	Medical professionals, residents, younger doctors	Short educational videos simplifying complex clinical topics	Expand reach, establish thought leadership with new audiences

IMPORTANT PLATFORM NOTE

Instagram is not primarily a sales platform for RIC Medical. Its role is to build brand awareness and establish visual credibility. A strong Instagram presence warms prospects before they encounter RIC on LinkedIn — creating a significantly higher response rate to outreach.

10 · CUSTOMER DISCOVERY JOURNEY

"We Don't Always Know Where a Client First Discovers Us"

One of the most important principles underpinning this strategy is the recognition that the point of first contact is unpredictable. A future client might first encounter RIC Medical on LinkedIn, see a video on TikTok, find the website via Google, or receive a referral from a colleague — often weeks before a commercial conversation begins.

💼

LinkedIn

A procurement manager sees a post about single-use endoscopes shared by a colleague and visits RIC's company page.

📸

Instagram

A physiotherapist sees a Reel explaining spinal decompression technology and follows the account for future reference.

▶

TikTok

A junior doctor sees an educational video about a treatment technology and mentions it to a senior colleague.

🔍

Google / SEO

A hospital biomedical engineer searches "spinal decompression system Saudi Arabia" and finds RIC Medical's website.

🎪

Industry Events

A hospital administrator meets a RIC representative at Arab Health and later visits the LinkedIn profile to follow up.

🗣

Referral

A satisfied clinic owner recommends RIC Medical to a peer — who then searches for the company online before reaching out.

STRATEGIC IMPLICATION

Because discovery can happen through any channel, **every touchpoint must tell a consistent and compelling story**. The LinkedIn profile, Instagram feed, TikTok account, and website must all reinforce the same brand positioning.

11 · LINKEDIN LEAD GENERATION STRATEGY

Where Commercial Relationships Begin

LinkedIn is the primary commercial engine of this strategy. It is the only major social platform where healthcare professionals, hospital decision-makers, and procurement teams are actively accessible for direct professional engagement.

🏢

RIC Medical Company Page

Fully optimised with brand messaging, technology highlights, and consistent content publishing. Acts as the institutional face of RIC and provides credibility validation when prospects research the company.

👤

BDM Personal Profile

The Business Development Manager's personal profile is optimised as the primary outreach vehicle. Commercial conversations are conducted through the BDM — not the company page.

WHY PEOPLE OVER BRANDS

Research consistently shows that **decision-makers respond significantly better to messages from a real person** than from a corporate account. The company page builds institutional credibility; the BDM's profile generates leads.

ELEMENT	COMPANY PAGE	BDM PROFILE
Profile / Banner	Professional RIC Medical branded banner, logo, and company description	Professional headshot, branded banner reflecting RIC Medical and healthcare focus
About / Headline	Clear positioning statement as a healthcare technology partner	Keyword-rich headline (e.g., "Healthcare Technology | Medical Equipment | Saudi Arabia")
Content Publishing	3–4 posts per week: technology insights, product content, market news	Regular resharing of company content + personal commentary
Outreach Activity	Not used for outreach	Targeted connection requests + personalised messages to key decision-makers

Example BDM Outreach Messages

OUTREACH MESSAGE — SPINE SPECIALIST / ORTHOPEDIC SURGEON

> *"Hi* **[Name]**, *I hope you're well. I work with RIC Medical here in Saudi Arabia — we distribute a range of advanced medical technologies for spine care, pain management, and rehabilitation. I've been following your work and believe some of our solutions could be highly relevant to your practice. Would you be open to a short call to explore whether any of our technologies could add value to your clinic?"*

OUTREACH MESSAGE — HOSPITAL PROCUREMENT / ADMINISTRATION

> *"Dear* **[Name]**, *I'm reaching out from RIC Medical, a Saudi-based medical technology partner distributing advanced clinical solutions across diagnostics, treatment, and rehabilitation to hospitals across the Kingdom. We're in the process of establishing partnerships with leading healthcare institutions and I'd welcome the opportunity to introduce our portfolio and understand your current technology priorities. Would a 15-minute introduction call be possible?"*

12 · CONTENT ECOSYSTEM

How Content Flows from Idea to Commercial Outcome

Each piece of content produced has a purpose within the broader marketing ecosystem — moving a prospect from initial awareness through to a product demonstration and eventually a commercial relationship.

💡 Topic Idea → 📱 Short Video (TikTok / Reel) → 📝 Deep Dive Post (LinkedIn) → 🤝 BDM Outreach (LinkedIn DM) → 🏥 Demo Meeting → ✅ Sale

CONTENT PILLAR	FORMAT	PLATFORM	EXAMPLE TOPIC
Clinical Education — Treatment Technologies	Short video, infographic, carousel	TikTok, Instagram, LinkedIn	"What is spinal decompression and how does it differ from surgery?"
Clinical Education — Diagnostic & Endoscopy	Short video, explainer post	TikTok, Instagram, LinkedIn	"Why single-use endoscopes are transforming infection control"
Technology Showcase	Product video, walkthrough	Instagram Reels, LinkedIn	Product demonstration — clinic walkthrough (treatment technology)
Thought Leadership	Long-form post, article	LinkedIn	"The future of minimally invasive diagnostics in Saudi hospitals"
Brand & Credibility	Behind-the-scenes, team content	Instagram	RIC Medical team at a hospital installation or medical conference
Saudi Healthcare Context	Post, short video	LinkedIn, Instagram	"How Vision 2030 is accelerating medical technology adoption in KSA"

13 · SEO & DISCOVERABILITY STRATEGY

Being Found When It Matters Most

When a hospital procurement manager or department head searches for "medical technology supplier Saudi Arabia" or "spinal decompression system Riyadh", RIC Medical should appear in the results. SEO is the mechanism that makes this possible.

SEO LEVER	ACTION REQUIRED	PRIORITY
LinkedIn Company Page Optimisation	Use target keywords in company description, tagline, and posts. Keyword-rich About section drives LinkedIn search visibility and Google indexing.	High
Website SEO	Ensure website title tags, meta descriptions, page headings, and content include core target keywords. Add a blog or news section to build content depth.	High
Keyword-Focused Content	Publish content on LinkedIn and the website that naturally incorporates search-relevant terms (e.g., "Medical technology supplier Saudi Arabia", "single-use endoscope KSA", "non-surgical back pain treatment").	Medium
Consistent Messaging Across Platforms	Align brand language, product descriptions, and keywords across LinkedIn, Instagram, TikTok, and the website. Consistency reinforces topical authority.	Medium
Google My Business	Ensure RIC Medical is registered on Google Maps/Business with correct contact details, description, and categories to appear in local searches.	Medium

Core Target Keywords

- Medical technology supplier Saudi Arabia
- Medical equipment distributor KSA
- Hospital technology partner Saudi Arabia
- Advanced medical solutions Riyadh
- Clinical technology partner KSA
- Healthcare equipment supplier Saudi Arabia
- Medical device distributor Saudi Arabia
- Single-use endoscopy KSA

14 · BRAND IDENTITY & VISUAL CONSISTENCY

The Visual Language of Credibility

In B2B healthcare marketing, visual consistency is not a cosmetic concern — it is a trust signal. Inconsistent branding communicates disorganisation. A coherent, professional visual identity across every platform communicates reliability, quality, and institutional confidence.

Professional Colour Palette

A defined primary and secondary colour scheme applied consistently to all graphics, social posts, presentations, and documents.

Consistent Graphic Templates

Pre-designed templates for LinkedIn posts, Instagram carousels, product highlight graphics, and event announcements.

Typography Standards

A defined set of fonts applied consistently across digital and print materials. Typography is one of the most overlooked signals of brand professionalism.

RIC Branding Alignment

All content must reflect RIC Medical's existing brand identity — logo usage, brand colours, and brand voice must be consistent across every digital touchpoint.

Photography Standards

Use of high-quality, professional product and clinical photography. Avoid low-resolution or stock images that diminish brand perception.

Brand Voice Guidelines

A defined tone of voice — professional, clinically informed, and approachable — applied consistently to all captions, posts, messages, and communications.

15 · 90-DAY MARKETING ROADMAP

A Phased Approach to Launch and Growth

The 90-day roadmap is structured to build the marketing foundation correctly before accelerating into lead generation. Skipping the setup phase in favour of immediate outreach is a common error — a weak digital presence undermines the credibility of every sales conversation that follows.

1

MONTH 1 — FOUNDATION & SETUP

Platform Optimisation and Content Infrastructure

- Optimise RIC Medical LinkedIn company page — branding, keywords, description, contact information
- Optimise BDM LinkedIn personal profile — headline, about section, experience, featured content
- Establish Instagram account with brand-consistent profile, bio, and initial content grid
- Set up TikTok account and create initial 3–5 educational videos for publishing
- Define brand colour palette, typography, and graphic template suite
- Create content calendar for Months 2–3
- Audit and update website SEO basics (meta tags, page titles, keyword integration)
- Identify and build initial LinkedIn outreach target list of 100+ decision-makers

2

MONTH 2 — CONTENT GROWTH & AUDIENCE BUILDING

Consistent Publishing and Community Development

- Publish LinkedIn posts at minimum 4x per week — technology insights, clinical education, company updates
- Launch Instagram content schedule — 3–4 posts per week including Reels and carousels
- Begin TikTok publishing — 3 educational videos per week targeting clinical topics
- BDM begins LinkedIn outreach — 10–15 personalised connection requests per day to target audience
- Begin engagement strategy — commenting on relevant industry posts to increase profile visibility
- Monitor initial content performance and identify top-performing post formats
- Develop first case study or technology spotlight for LinkedIn

3

MONTH 3 — OUTREACH SCALING & LEAD GENERATION

Commercial Conversations and Pipeline Development

- Scale LinkedIn outreach — BDM initiating 20+ conversations per week with qualified prospects
- Convert LinkedIn conversations into product demonstration requests and introduction calls
- Introduce LinkedIn paid promotion for selected high-performing content to expand reach
- Begin tracking leads: source of discovery, conversion stage, and follow-up timeline
- Review KPIs against targets and refine content strategy based on data
- Prepare Month 4–6 roadmap based on learnings from first 90 days
- Present performance report to RIC Medical leadership with insights and recommendations

16 · SUCCESS METRICS

Measuring What Matters

Performance is tracked across a tiered metrics framework — from early-stage awareness indicators through to commercial outcomes. The primary measure of success is commercial — the number of qualified conversations and hospital meetings generated.

- 🔗 LinkedIn Connections Growth
- 👥 Instagram Followers
- ▶ TikTok Reach & Views
- 👁 Post Impressions (all platforms)
- 💬 LinkedIn Conversations Started
- 📩 Inbound Profile Visits & Enquiries
- 🎬 Product Demo Requests
- 🏥 Hospital Meetings Generated

METRIC CATEGORY	KPI	MONTH 1 TARGET	MONTH 3 TARGET
LinkedIn Growth	Company page followers	50+ new followers	300+ followers
LinkedIn Engagement	Average post impressions	200+ per post	800+ per post
Outreach	Connections sent / accepted	150 sent / 60 accepted	500+ connections / 200+ accepted
Commercial	Conversations initiated	10+ conversations	40+ conversations
Commercial	Product demos / meetings	2–3 meetings	10–15 meetings
Instagram	Follower growth	100+ followers	500+ followers
TikTok	Total video reach	5,000+ views	30,000+ cumulative views

17 · STRATEGIC CONCLUSION

Building RIC Medical's Future in Saudi Healthcare

The Saudi Arabian healthcare market is in a period of extraordinary transformation. Driven by Vision 2030's healthcare expansion agenda, demand for advanced medical technology is accelerating — and the suppliers who establish digital credibility and clinical relationships today will be the partners hospitals turn to tomorrow.

This strategy positions RIC Medical not as a distributor of products, but as a **medical technology partner** — a company that brings globally validated, clinically advanced solutions to Saudi Arabia's healthcare institutions and supports them in delivering better patient outcomes.

> STRATEGIC NORTH STAR
>
> **Every decision in this strategy returns to a single principle:** RIC Medical is not selling products — it is enabling healthcare providers across Saudi Arabia to access the technologies they need to serve their patients better. When this mission is communicated clearly, consistently, and credibly across every digital platform, the commercial outcomes follow.

Global Technologies

RIC Medical brings world-class medical innovations from leading global manufacturers to the Saudi healthcare market.

Local Expertise

Deep understanding of the Saudi healthcare landscape, procurement processes, and clinical community creates an unmatched local advantage.

Strategic Momentum

This 90-day blueprint creates the digital infrastructure for sustained commercial growth well beyond the initial campaign period.

Investment & Payment Breakdown

CodeOx → RIC Medical · Riyadh International Corporation for Medical Equipment

REFERENCE
RICE-2026-BP-001

Date: 09 April 2026	**Reference:** RICE-2026-BP-001	**Valid For:** 12 Months

Summary

This document outlines the proposed annual payment breakdown for digital marketing services provided by **CodeOx** to **Riyadh International Corporation for Medical Equipment (RIC Medical)** over a twelve-month period. The total annual value of the agreement is structured into quarterly payment schedules as detailed below.

In addition to the monthly service retainer, RIC Medical will allocate a separate advertising budget paid directly to social platforms (LinkedIn, Instagram, TikTok) to amplify content reach and drive paid lead generation. Based on market study, the recommended range is **SAR 1,000–2,000/month** once platforms are optimised and active — reviewed and agreed quarterly.

Total Annual Service Retainer **SAR 72,000**

Quarterly Service Retainer Schedule

QUARTER	MONTHS COVERED	MONTHLY RETAINER (SAR)	QUARTER TOTAL (SAR)
Q1	April – May – June 2026	5,000	15,000
Q2	July – August – September 2026	5,000	15,000
Q3	October – November – December 2026	6,000	18,000
Q4	January – February – March 2027	8,000	24,000
		Annual Retainer Total	**72,000**

Platform Advertising Budget (Paid Directly by RIC to Platforms)

MARKET-BASED AD SPEND ESTIMATE

Based on our market study of B2B healthcare advertising in the Saudi Arabian digital landscape, we recommend RIC Medical allocate a **separate advertising budget of SAR 1,000–2,000 per month** paid directly to social platforms (LinkedIn, Instagram, TikTok). This budget is in addition to the monthly service retainer and covers paid post promotion, sponsored content, and targeted audience reach campaigns.

This estimated range applies **once the social media platforms are properly set up, optimised, and have sufficient published content** — typically from Month 2 onwards. Initial ad spend in Month 1 is minimal as the focus is on organic foundation-building. The exact monthly allocation will be reviewed and agreed with RIC Medical at the start of each quarter based on performance data and campaign objectives.

ANNUAL INVESTMENT SUMMARY

Service Retainer: SAR 72,000/year (per quarterly schedule above) · **Ad Spend:** SAR 1,000–2,000/month paid directly to platforms by RIC Medical, reviewed quarterly.

PAYMENT STRUCTURE NOTES

· Retainer is billed on a **monthly basis** according to the quarterly schedule above.
· Q1 and Q2 introductory rate of **SAR 5,000/month** covers full strategy execution and content delivery.
· Q3 increases to **SAR 6,000/month** reflecting expanded content scope and audience growth management.
· Q4 increases to **SAR 8,000/month** reflecting peak service delivery and lead generation scaling.
· Ad spend of **SAR 1,000–2,000/month** (market-estimated range) is paid directly to advertising platforms by RIC Medical, separate from the retainer, and reviewed quarterly based on performance.
