

FINANCIAL PROPOSAL · SEPTEMBER 2026

Website & eCommerce Two Paths Forward

Following your manager's review, this proposal prices both routes side by side: customizing your current Salla store with an Odoo integration, or moving to a fully native Odoo Website. Pick either — or use this to decide between them.

Salla Customization

Salla ↔ Odoo Integration

Native Odoo Website

Pickup & Delivery Logic

SPL / SMSA / DHL / RedBox

QUOTATION NO.

CX-QAF-2026-01

DATE

24 September 2026

CURRENCY

SAR (Saudi Riyal)

PREPARED BY

Code-ox Technologies

OPTION 1

Customize Salla + Integrate with Odoo

SAR 40,000

Exclusive of VAT · 5 weeks

OPTION 2

Fully Native Odoo Website

SAR 70,000

Exclusive of VAT · 10 weeks

PREPARED FOR Qaf Coffee Roasters · Kingdom of Saudi Arabia. This quotation is based on requirements gathered by your sales team and management to date, and is valid for 30 days from the date of issuance.

OVERVIEW

Executive Summary

Qaf Coffee runs its online store on Salla today, alongside an existing Odoo instance across the roastery, cafés and back office. Your team raised a set of real operational gaps — store pickup that shouldn't require a delivery address, pickup pricing that should follow the pricelist, categories (like drinks) that should only be orderable for in-store pickup, and warehouse-based dispatch through your current couriers (SPL, SMSA, DHL, RedBox). Your manager then framed the decision as two paths, and asked for pricing and timeline on each.

This proposal prices both. **Option 1** keeps Salla as your storefront, customizes its checkout logic, and connects it to Odoo two-way so orders, stock and customers stay in sync. **Option 2** replaces Salla with a website built natively inside Odoo — one system, no integration layer, no sync lag. Both are priced and scoped independently below so you can compare them directly.

Prepared For Qaf Coffee Roasters Al Khobar, Kingdom of Saudi Arabia	Prepared By Code-ox Technologies raghib@code-ox.com +966 56 176 5707	Quotation Details No: CX-QAF-2026-01 Date: 24 September 2026 Currency: SAR (Saudi Riyal)
--	--	--

THE TWO OPTIONS, AT A GLANCE

	OPTION 1 — CUSTOMIZE SALLA + ODOO INTEGRATION	OPTION 2 — NATIVE ODOO WEBSITE
What it is	Keep Salla as the storefront. Customize its checkout logic and connect it to Odoo with a two-way sync.	Retire Salla. Build the storefront directly on Odoo Website + eCommerce, on the same database as your ERP.
Data	Two systems, kept in sync by an integration layer. Orders, stock and customers mirrored between Salla and Odoo.	One system. Orders, stock, pricelists and customers live in Odoo natively — nothing to sync.
Flexibility	Bounded by what Salla's platform and app store allow (see assumptions, page 9).	Full control — pickup/delivery rules, category restrictions and pricelists built exactly to spec.
Investment	SAR 40,000 (excl. VAT)	SAR 70,000 (excl. VAT)
Timeline	5 weeks from kickoff	10 weeks from kickoff

OUR RECOMMENDATION

If the pickup/delivery and category rules below are the only real friction, Option 1 solves them fastest and keeps your Salla investment. If you're already thinking about migrating fully to Odoo — for one system, no sync risk, and no Salla subscription — Option 2 is the stronger long-term move. Happy to walk through either in a call.

DISCOVERY

Requirements Captured From Your Team

These are the specific gaps your sales team and management flagged. Every line below is priced into both options unless marked **TO CONFIRM** — those need one short discovery call before build starts, so we scope and price them precisely rather than guess.

Requirement	What you told us	Status
Fulfillment method	Drop-off (home delivery) vs. customer pickup, decided by order volume — exact volume threshold still being checked by your team.	TO CONFIRM
Pickup origin	Customers pick up from the central warehouse, not individual café branches.	CONFIRMED
Current couriers	SPL, SMSA, DHL and RedBox — all four in active use for home delivery today.	CONFIRMED
Salla ↔ Odoo sync	Two-way integration requested — orders, products, stock and customers to flow between Salla and Odoo automatically.	CONFIRMED
Store-pickup checkout	For "Pickup in Store" orders, no delivery address should be required at checkout, and price should follow the applicable pricelist rather than the standard delivery price.	CONFIRMED
Category-level restriction	Certain categories (e.g. drinks / made-to-order items) should be sellable for in-store pickup only, not for home delivery.	CONFIRMED
Path decision	Management reviewed and asked for two priced options: (1) customize the current Salla site + integrate with Odoo, or (2) rebuild fully as an Odoo Website.	CONFIRMED
Transparency ask	For the Odoo Website path specifically — what's gained versus Salla, and a clear breakdown of annual charges and any fees not obvious up front.	CONFIRMED

ONE OPEN ITEM

The order-volume threshold that decides pickup vs. drop-off isn't finalized yet on your side. We've scoped both options assuming this becomes a configurable rule (by order value, weight, or item count) rather than a fixed number — so whatever your team settles on, it's a setting, not a rebuild.

1

OPTION 1

Scope of Work — Customize Salla + Integrate with Odoo

#	MODULE / DELIVERABLE & SCOPE DESCRIPTION
01	Store-Pickup Checkout Customization Custom Salla app/theme change: for "Pickup in Store" orders, remove the delivery-address requirement and apply pricelist-based pricing instead of standard delivery pricing.
02	Category-Level Fulfillment Rules Configure and code the restriction so selected categories (e.g. drinks) are only purchasable under "Pickup in Store," hidden from the home-delivery flow.
03	Volume-Based Fulfillment Logic Configurable rule engine to route orders to pickup vs. drop-off based on order volume (final threshold confirmed with your team during discovery, see page 3).
04	Salla ↔ Odoo Two-Way Integration Connector syncing products, prices, stock, orders and customers between Salla and Odoo in near real time, so online orders land in Odoo without re-keying.
05	Warehouse Pickup Workflow Odoo-side pickup workflow from the central warehouse — pick/pack confirmation, stock deduction and pickup-ready notification tied to the synced order.
06	Courier Integration — SPL, SMSA, DHL, RedBox Delivery carrier setup in Odoo Inventory/Delivery for all four active couriers, mapped to the correct fulfillment and pricelist rules per order.
07	Pricelist Configuration Pickup vs. delivery pricelists built and mapped so checkout price always reflects the correct fulfillment method automatically.
08	Testing & Go-Live Support End-to-end order testing across both fulfillment paths and all four couriers, plus go-live support and a short admin walkthrough.

DEPENDS ON SALLA'S PLATFORM

Items 01-03 require custom development through Salla's App/Partner tools. If Salla's platform does not expose an API or app hook for a specific behavior, we will flag it during discovery and propose the closest achievable alternative before development starts — see assumptions on page 9.

OPTION 1

Timeline & Investment

PHASE	DELIVERABLES	DURATION
1 Discovery & Rule Definition	Confirm the volume threshold, category list, and pricelist logic with your team; finalize Salla API feasibility check.	Week 1
2 Salla Customization	Build checkout changes: no-address pickup flow, category restriction, pricelist-based pricing.	Weeks 2-3
3 Odoo Integration & Couriers	Build Salla↔Odoo sync, warehouse pickup workflow, and SPL/SMSA/DHL/RedBox carrier mapping.	Weeks 3-4
4 Testing & Go-Live	End-to-end order testing across both fulfillment paths, admin walkthrough, go-live.	Week 5

DELIVERABLE	CATEGORY	AMOUNT (SAR)
OPTION 1 — SALLA CUSTOMIZATION + ODOO INTEGRATION		
Store-Pickup Checkout Customization	Development	Included
Category-Level & Volume-Based Fulfillment Rules	Development	Included
Salla ↔ Odoo Two-Way Integration	Integration	Included
Warehouse Pickup Workflow	Development	Included
Courier Integration — SPL, SMSA, DHL, RedBox	Integration	Included
Pricelist Configuration	Development	Included
Testing & Go-Live Support	QA & Launch	Included
Option 1 Total		40,000
Total Investment — Option 1		Exclusive of VAT SAR 40,000

Payment Schedule — Option 1

MILESTONE	TRIGGER	AMOUNT (SAR)
Advance Payment (50%)	Upon proposal sign-off and project commencement	20,000
Final Payment (50%)	Upon UAT completion and go-live	20,000
		40,000

* All amounts are exclusive of VAT. VAT (15%) will be added to each invoice as per KSA regulations.

2

OPTION 2

Scope of Work — Fully Native Odoo Website

#	MODULE / DELIVERABLE & SCOPE DESCRIPTION	
01	UI/UX Design	Wireframes and high-fidelity mockups for the full storefront, aligned to Qaf's brand. Bilingual (AR/EN), mobile-first.
02	Catalog Migration from Salla	All products, variants, images, categories and pricing migrated into Odoo's Website/eCommerce system.
03	Storefront Build — All Pages	Home, category, product detail, cart, checkout, account, order history, content/blog pages built on Odoo Website + e-commerce module.
04	Native Pickup & Delivery Checkout	Built-in fulfillment selection: home delivery vs. in-store pickup, with pickup skipping the address step and pricing per pricelist automatically — no workaround needed since it's native Odoo.
05	Category-Level & Volume-Based Fulfillment Rules	Native Odoo rules restricting categories (e.g. drinks) to pickup-only, and routing orders to pickup/delivery by volume.
06	Warehouse & Multi-Location Stock	Central warehouse pickup workflow plus stock visibility across roastery, warehouse and café locations — natively, with no third-party apps.
07	Courier Integration — SPL, SMSA, DHL, RedBox	All four couriers configured as native Odoo delivery carriers, tied directly to order and stock locations.
08	Payment Gateway Integration	Local payment methods (mada, cards, Apple Pay) integrated at checkout via native Odoo modules.
09	Bilingual (AR/EN) & SEO	Full RTL/LTR implementation, on-page SEO, sitemap, schema markup, redirects mapped from existing Salla URLs to preserve search rankings.
10	QA, UAT & Go-Live	Cross-browser/device testing, UAT with your team, staging-to-production cutover, and admin training.

WHY THIS IS DIFFERENT

Because the storefront and Odoo ERP share one database, everything in the row above ships without an integration layer to build, maintain or debug. Full comparison and the annual-cost breakdown are on page 8.

OPTION 2

Timeline & Investment

PHASE	DELIVERABLES	DURATION	
1	Discovery & Design	Rule confirmation, catalog audit, UI/UX design system, sign-off before development.	Weeks 1–2
2	Catalog Migration & Storefront Build	Migrate products/pricing from Salla; build all storefront pages on Odoo Website + eCommerce.	Weeks 3–5
3	Fulfillment, Couriers & Payment	Native pickup/delivery checkout, category and volume rules, courier integration, payment gateway.	Weeks 6–7
4	Bilingual, SEO & Content	AR/EN implementation, SEO setup, URL redirects from Salla, content migration.	Week 8
5	QA, UAT & Go-Live	Full regression testing, UAT with your team, cutover, admin training and handover.	Weeks 9–10

DELIVERABLE	CATEGORY	AMOUNT (SAR)
OPTION 2 — FULLY NATIVE ODOO WEBSITE		
UI/UX Design System	Design	Included
Catalog Migration from Salla	Development	Included
Full Storefront Build (Odoo Website + eCommerce)	Development	Included
Native Pickup/Delivery & Category Rules	Development	Included
Courier Integration — SPL, SMSA, DHL, RedBox	Integration	Included
Payment Gateway Integration	Integration	Included
Bilingual (AR/EN), SEO & Redirects	SEO	Included
QA, UAT Support & Go-Live	QA & Launch	Included
Option 2 Total		70,000
Total Investment — Option 2		Exclusive of VAT SAR 70,000

Payment Schedule — Option 2

MILESTONE	TRIGGER	AMOUNT (SAR)
Advance Payment (40%)	Upon proposal sign-off and project commencement	28,000
Milestone Payment (30%)	Upon storefront build & fulfillment logic complete (end Week 7)	21,000
Final Payment (30%)	Upon UAT completion and go-live	21,000
		70,000

* All amounts are exclusive of VAT. VAT (15%) will be added to each invoice as per KSA regulations.

FOR THE ODOO WEBSITE PATH

What You Get More — and the Real Annual Charges

	SALLA + ODOO INTEGRATION (OPTION 1)	NATIVE ODOO WEBSITE (OPTION 2)
Where data lives	Two systems, synced by a connector. A sync failure or delay can show stale stock/price on the site.	One system. Stock, price and orders are the same record everywhere — no sync to fail.
Custom logic limits	Bounded by what Salla's app platform permits (see page 9).	No platform ceiling — any rule Odoo can model, we can build.
Storefront subscription	Salla subscription fee continues (billed by Salla directly, separate from this proposal).	No separate storefront subscription — Website & eCommerce apps are bundled into your existing Odoo plan (below).
Integration maintenance	The connector is a piece of software that needs monitoring and occasional maintenance as either platform updates.	Nothing to maintain — it's the same Odoo instance your team already uses.

\$

TRANSPARENCY

Annual Charges — Odoo's Own Published Pricing

PLAN	PRICE	WEBSITE & ECOMMERCE APPS
Odoo Standard	~\$13.50–16.90 per user / month (billed annually)	Bundled at no extra charge, alongside every other Odoo app on the plan.
Odoo Custom	~\$25.50–32.00 per user / month (billed annually)	Bundled at no extra charge. Adds Odoo Studio, on-premise/Odoo.sh options, external API access.

THE HONEST ANSWER

There is no separate "Website app fee." Odoo's own pricing page states both plans "include unlimited support, hosting and maintenance" with "no hidden costs" — the Website and eCommerce apps are included in whatever per-user plan you're already paying for your ERP. Because Qaf already runs Odoo, going live with the Odoo Website adds **zero new licence cost**, unless you add new user seats (e.g. a dedicated web/content admin) — billed at the same per-user rate above. *Source: [odoo.com/pricing-plan](https://www.odoo.com/pricing-plan), fetched September 2026 — verify current rates before signing, as Odoo revises pricing periodically.*

WHAT'S GENUINELY NOT INCLUDED — EITHER OPTION

Domain registration, SSL (typically free via Odoo/Cloudflare but confirm with your registrar), payment gateway transaction/subscription fees, and SMS costs for order notifications are third-party costs billed directly to Qaf, not to Code-ox. This is the same disclosure we give on every Code-ox quotation.

TERMS & CONDITIONS

General Terms

- **Scope of Work:** Each option covers only the items listed on its respective scope page. Features outside that scope require a separate written agreement and may incur additional charges.
- **Client Responsibilities:** Qaf agrees to confirm the pickup/delivery volume threshold, provide Salla admin/API access (Option 1) or full catalog export (Option 2), and give timely feedback. Delays on these may impact the timeline.
- **Third-Party Costs:** Salla subscription fees (Option 1), Odoo per-user licence fees, domain, SSL, payment gateway fees, and SMS/notification costs are not included and are Qaf's responsibility.
- **Intellectual Property:** Upon receipt of full payment, all custom code and design deliverables become the exclusive property of Qaf Coffee Roasters. Salla and Odoo platform code remain subject to their own licences.
- **Revisions:** Each design/build phase includes up to two (2) rounds of revisions. Additional rounds are charged separately at an agreed rate.
- **Warranty:** 30 days of complimentary bug-fix warranty post go-live, covering all delivered modules. Extended support retainers are available on request.
- **Confidentiality:** Both parties agree to keep the contents of this proposal confidential and not disclose them to any third party without prior written consent.
- **Governing Law:** This agreement shall be governed by the laws of the Kingdom of Saudi Arabia.

ASSUMPTIONS & EXCLUSIONS

Key Project Assumptions

- ☐ Option 1 depends on Salla's App Store/Partner API exposing hooks for checkout address-requirement removal and category-level purchase restriction. If a specific behavior isn't exposed by Salla, we'll propose the closest achievable alternative before development on that item begins.
- ☐ Order-volume threshold for pickup vs. drop-off will be confirmed by Qaf's team within the first week of either option and configured as an editable rule, not hardcoded.
- ☐ Qaf holds active accounts with SPL, SMSA, DHL and RedBox with API/webhook access available for integration; account setup with any of these carriers is not included.
- ☐ Domain and hosting are **client-provided** for either option. Code-ox provides deployment/configuration support only.
- ☐ For Option 2, Qaf's existing Odoo subscription plan (Standard or Custom) already includes Website & eCommerce apps — no new Odoo licence line item is added by this proposal.
- ☐ Payment gateway subscription and per-transaction fees are borne directly by Qaf Coffee Roasters under either option.
- ☐ Only one option will be built. If Qaf starts with Option 1 and later chooses to migrate to Option 2, that migration is a separate, newly-scoped engagement.

AUTHORIZATION

Acceptance & Authorization

Please indicate which option Qaf Coffee Roasters is proceeding with, then sign below. By signing, both parties confirm acceptance of the selected option's scope, price and payment schedule, and authorize commencement of the project. A formal Statement of Work will follow the signed proposal and advance payment.

☐ **Option 1 — Salla Customization + Odoo Integration**
SAR 40,000 excl. VAT · 5 weeks

☐ **Option 2 — Fully Native Odoo Website**
SAR 70,000 excl. VAT · 10 weeks
