

COMMERCIAL PROPOSAL · JULY 2026

A Growth Engine Built on What Al Saber Already Owns.

A 12-month SEO and AI Search (AEO) strategy for alsabercars.com — technical fixes, a 205-page evergreen content build, local SEO for both showrooms, and the schema work that earns citations from ChatGPT and AI Overviews, not just Google.

Technical Foundation

205 Pages Phase 1

Local SEO · 2 Showrooms

AI Search (AEO)

ENGAGEMENT MODEL

Monthly Retainer

Technical fixes, content build, local SEO, AI search & reporting — full pricing on page 8

Roadmap

12 Months

PREPARED FOR

Al Saber Cars Co. · Kingdom of Saudi Arabia. This proposal is based on our independent technical audit of alsabercars.com and cited research into the GCC automotive SEO/AI-search landscape, and is valid for 30 days from the date of issuance.

OVERVIEW

Executive Summary

Al Saber Cars carries 75 years of import heritage, in-house Murabaha financing, and a range from Toyota to Ferrari — a genuine advantage no online-only marketplace can copy. None of it shows up in search today: our own audit found 8 of 9 core technical checks failing, zero structured data anywhere on the site, and an English version that's invisible to Google entirely.

This proposal is a 12-month, six-track growth engine: fix the technical foundation, build a 205-page evergreen content map (growing to ~735 pages as it matures), win local search for both Riyadh showrooms, and write content the way AI Overviews and ChatGPT actually quote — schema and answer-first, not keyword-stuffed. Every fact below is verified against our own audit or cited research; every projection is honestly labelled.

Heritage

75-year import history — a trust signal Google and AI search weight heavily, and no competitor can replicate.

In-House Financing

Murabaha offered directly on cars sold — not a marketing page about it, an actual product.

Dual Range

Credibly serves a first-car buyer and a Rolls-Royce buyer on the same site.

Two Showrooms

Real local trust signal an online-only rival cannot claim — local SEO is a wide-open lane today.

GROUNDING IN EVIDENCE

The technical findings in this proposal are confirmed on our own audit of alsabercars.com. Market and competitor claims are drawn from cited research into GCC automotive SEO. This is not a generic SEO package — it is the fix for what's specifically broken today, plus the content Al Saber's competitors haven't built yet.

CONFIRMED ON OUR OWN AUDIT

What's Actually Broken, Right Now

8 of 9 core technical checks fail on alsabercars.com today — this is the foundation Phase 1 fixes before any content build compounds on top of it.

Meta & H1s	Blank/missing sitewide, every page checked	
Sitemap	404. robots.txt has no Sitemap directive	
Structured data	Zero schema anywhere on the site	
Open Graph	Shared WhatsApp links show as bare URLs	
English version	Session-based, invisible to search engines	
www vs. apex	Both live — ranking signals split in half	
Image alt text	125 of 126 images have none	
Core Web Vitals	Mobile score 55, 57.5-second LCP measured	
HTTPS & robots.txt	Both valid — a clean base to build on	

WHO'S WINNING THIS MARKET

Competitor Scoreboard, In Brief

THE HONEST READ

Marketplaces like Syarah, YallaMotor, and dubizzle already publish deep price/buying-guide and financing content across the GCC market. Al Saber cannot out-publish a marketplace on volume — the plan below wins on the one thing they can't copy: 75 years of real import history, in-house financing, and two physical showrooms, expressed as genuinely useful, specific content.

1

THE STRATEGY

Six Connected Tracks, Executing in Parallel

#	TRACK & WHAT IT COVERS
01	Topical Authority Brand hubs, model guides, comparisons — one connected content map instead of disconnected pages.
02	Answer-First Content Direct answer first, real prices, real proof — every page written to satisfy the reader immediately.
03	Technical Fixes Meta, schema, hreflang, canonical, evergreen page structure — the foundation everything else builds on.
04	Local Search Both Google Business Profiles done properly, branch pages, NAP consistency, steady review velocity.
05	AI Search (AEO) Schema and answer blocks — what actually earns citations from ChatGPT and Google AI Overviews.
06	Authority Steady, relevant backlinks and digital PR on the 75-year story — quality over volume.

THE CONTENT BUILD

One Topical Map, Built in Phases

205 pages in the Phase 1 build, growing to roughly 735 as the map matures over 12–24 months. Every brand becomes its own mini-map, sized by how much it sells — worked example: Mercedes-Benz gets 18 pages (1 hub, 8 model guides, 4 comparisons, 2 new-vs-used, 2 trust guides). Full page-by-page list available as a separate workbook.

65 Brand hubs	40 Price & buying guides	15 Comparisons	15 New vs. used guides	20 Reviews & journal (pilot)
------------------	-----------------------------	-------------------	---------------------------	---------------------------------

2

AN OPEN LANE, UNUSED TODAY

Local SEO for the Riyadh Showrooms

Two real, physical showrooms — a genuine advantage online-only rivals don't have. None of the benchmarked competitors publish true branch-level content; this lane is wide open.

01	Google Business Profile Fully completed per showroom — photos, hours, brand-specific category (outperforms generic "Car Dealer").
02	Branch Pages Map, address, hours, stock available there, contact — one page per showroom.
03	NAP Consistency Identical name, address, phone across the site, both profiles, and every directory.
04	Review Velocity Steady post-purchase review requests — velocity beats total count for map-pack ranking.

WHY IT MATTERS

76% of local searchers visit a business within 24 hours of searching — the map pack is the digital forecourt. Exact branch names/addresses to be confirmed with Al Saber directly in Phase 1.

BEYOND GOOGLE

Getting Quoted by ChatGPT and AI Overviews

Buyers increasingly ask AI tools for answers, not just a list of links. Answer Engine Optimization (AEO) means writing so an AI can lift Al Saber's content directly into its answer.

01	Answer Blocks A self-contained 40–60 word answer under every question heading.
02	FAQ & Product Schema Labelled markup that tells AI exactly what's a question, an answer, a price.
03	Price & Comparison Tables Structured, specific data — AI quotes numbers and facts, not adjectives.

AN HONEST CORRECTION TO COMMON 2026 ADVICE

No major LLM (OpenAI, Google, Anthropic, Meta, Mistral) reads an llms.txt file in production, and Google's own May 2026 guidance says not to bother creating one — we won't spend budget there. Schema and answer-first content is what actually earns AI citations; the same build that helps classic Google ranking wins AI search too. One build, two payoffs.

THE ROADMAP

12 Months, Sequenced by What Pays Off First

PHASE I-II – MONTHS 1-4

- 1

FOUNDATION – MO. 1-2

Technical Base

 - Sitemap, meta, schema, canonical, hreflang, GA4/GSC set up
- 2

EVERGREEN CONTENT – MO. 2-4

First Content Wave

 - First 20 brand hubs and 40 price guides go live

PHASE III-IV – MONTHS 3-9

- 3

LOCAL SEO – MO. 3-5

Both Showrooms Live

 - Both Google Business Profiles claimed, reviews flowing
- 4

THE MOAT CONTENT – MO. 5-9

Financing & Comparison Clusters

 - Murabaha, import, and comparison clusters — first AI citations expected

PHASE V-VI – MONTHS 8-12

- 5

AUTHORITY – MO. 8-12

Digital PR & Backlinks

 - Digital PR on the 75-year story, citations, backlinks
- 6

REFRESH & SCALE – MO. 11-12

Data Refresh, Plan Year Two

 - Real-data refresh across the map; plan the full Arabic rollout for year two

REPORTED MONTHLY

What Gets Measured

Al Saber hasn't been measured in a keyword tool yet — Phase 1 sets the real baseline. Everything below is tracked against it, every month, from there.

Metric	What It Tracks	Baseline
Ranking Keywords	Growth in keywords ranking, especially page one	Set in Phase 1
Priority Rankings	Positions for target brand and price searches	Set in Phase 1
Organic Traffic	Monthly organic visits, and which pages earn them	Set in Phase 1
Search Enquiries	Purchase & finance enquiries attributable to organic	Set in Phase 1
AI Citations	Tested monthly across 10–20 fixed category questions	Set in Phase 1
Local Visibility	GBP views, direction requests, calls per showroom	Set in Phase 1

WHAT YOU RECEIVE

Deliverables

Audit & Strategy Technical audit, topical map, keyword research.	On-Page Meta, schema, hreflang, evergreen page structure.	Content Brand hubs, price guides, comparisons, financing guides.
Local SEO Both Google Business Profiles, branch pages, citations.	AI Search FAQ schema, answer blocks, price/comparison tables.	Reporting Monthly — rankings, traffic, enquiries, AI citations.

HONEST NOTE

No exact ranking can be guaranteed — the algorithm isn't ours to control. Baseline traffic is currently too low for Google's own field data to register, so real projections come after Phase 1's baseline, not before it.

FINANCIALS

Investment Summary

Deliverable	Category	Amount (SAR)
Month 1 – Foundation (Included)		
Technical Audit & Fixes – Sitemap, Meta, Schema, Hreflang	Technical	Included
Keyword Research & Topical Map	Strategy	Included
Included Every Month		
Evergreen Content Build – Brand Hubs, Guides, Comparisons	Content	Included
Local SEO – Google Business Profiles & Branch Pages	Local	Included
AI Search (AEO) – Schema & Answer Blocks	AI Search	Included
Authority & Digital PR	Authority	Included
Monthly Report – Rankings, Traffic, Enquiries, AI Citations	Reporting	Included
Monthly Investment	Exclusive of VAT	SAR 3,000
Monthly Investment	Inclusive of 15% VAT	SAR 3,450

Billing Terms

Item	Trigger	Excl. VAT	Incl. 15% VAT
Month 1 – Foundation & Retainer	Due upon signed proposal, before kickoff	3,000	3,450
Month 2 Onward – Retainer	Billed on the 1st of each calendar month	3,000 / mo	3,450 / mo
12-month roadmap, billed monthly throughout			12 Months

VAT

All prices in this proposal are quoted exclusive of VAT. 15% VAT applicable per KSA regulations will be added to each invoice — SAR 3,000/month becomes SAR 3,450/month inclusive of VAT. Paid link-building or PR placement costs, if pursued, are billed separately at cost with no management markup.

GROWING THE ENGAGEMENT FURTHER

Paid search (Google Ads), video production, and translated case-study assets sit outside this scope and are quoted separately on request — nothing is billed beyond the SAR 3,000/month retainer without prior written agreement.

BEING UPFRONT

Assumptions & Risks

01	To Confirm Early Real keyword volumes (AR/EN), best-selling models per brand, and exact showroom names/addresses — confirmed with Al Saber before anything publishes.
02	No Guaranteed Rankings Google's and AI systems' algorithms aren't ours to control. The commitment is to the method, the work, and honest reporting.
03	Templates Aren't Filler Every page still needs genuinely useful, specific content — a thin page built on a template will not rank.
04	Financing Isn't Uncontested Marketplace competitors already publish Murabaha guides — Al Saber wins on in-house, dealer-backed credibility, not the keyword alone.

TERMS & CONDITIONS

General Terms

- **Scope of Work:** This proposal covers technical SEO, content production, local SEO, AI search optimization, authority building, and monthly reporting as described. Paid search campaigns, video production, and translated case-study assets sit outside this scope and are quoted separately.
- **Mutual Responsibilities:** Al Saber agrees to provide brand/inventory data, showroom details, and timely content-review feedback. Code-ox commits to delivering the agreed monthly content volume and reporting on schedule. Delays on either side shift the roadmap accordingly, without penalty to the party that kept its commitments.
- **Approval Flow:** Published content follows the agreed topical map; any material deviation is confirmed with Al Saber first. If Al Saber does not respond to a review request within 5 business days, it is treated as approved so the monthly build isn't blocked.
- **Payment Terms:** Invoices are due within 7 days of issue. If a payment runs more than 14 days late, Code-ox may pause content production until it is settled — this is a pause, not a termination, and work resumes on the same cadence once payment clears.
- **Intellectual Property:** Published content and all associated rights transfer to Al Saber Cars Co. upon payment for the month in which it was delivered.
- **Third-Party Costs:** Any paid link-building, PR placement, or tooling costs, if pursued, are billed separately at cost with no management markup.
- **Limitation of Liability:** Neither party is liable to the other for indirect or consequential losses, including lost rankings or traffic caused by third-party algorithm changes. Code-ox's total liability under this engagement is capped at the fees paid in the three (3) months preceding any claim.
- **Contract Term:** This is a 12-month roadmap billed monthly throughout. Either party may cancel with 30 days' written notice; work already delivered and invoiced is non-refundable.
- **Confidentiality:** Both parties agree to keep the contents of this proposal confidential and not disclose them to any third party without prior written consent.
- **Governing Law:** This agreement shall be governed by the laws of the Kingdom of Saudi Arabia.
- **Proposal Validity:** This proposal is valid for 30 days from the date of issue. After this period, pricing may be subject to revision.

CLOSING

A Growth Engine Built on What Al Saber Already Owns

This is Code-ox's SEO and AI search growth solution for Al Saber — a proven structure borrowed from the sites already winning this market, wrapped in the one advantage none of them can copy: 75 years of real import history, in-house Murabaha financing, and a range from Toyota to Ferrari. Every fact here is verified against our own audit or independent research; every projection is honestly labelled. This is the plan we execute.

205

Pages in the Phase 1 build, growing to ~735 as the map matures

6

Connected tracks — technical, content, local, AI search, and authority

12

Months from technical foundation to a compounding organic growth engine

AGREEMENT & SIGN-OFF
