

DESIGN PROPOSAL · [PROPOSAL DATE]

A bespoke website, designed around how Benchy sells furniture.

A complete, bespoke redesign of benchy.in — rebuilt around your product range, your customers, and the way people choose office and ergonomic furniture. The result: clearer product discovery, stronger presentation, easier navigation and simpler ways to enquire.

- Full bespoke redesign
- Custom to your brand
- Responsive desktop & mobile
- Design engagement

PROPOSAL REF.	DATE	CURRENCY	PREPARED BY
CX-BEN-2026-01	[Proposal Date]	INR (₹)	[Agency Name]

01 · THE BRIEF

Project overview & our understanding

Benchy has asked us to **revamp its existing website, benchy.in, with a proper bespoke design**. Today the site presents a broad and capable furniture range — workstations, office tables, chairs, reception tables, height-adjustable desks, storage solutions, conference tables, pantry tables and workpods — but on a design that no longer does that range justice or makes it easy for a buyer to explore.

This is a **full, custom website redesign**: we design a cohesive, brand-appropriate website tailored to Benchy's products and customers. The value is practical — a visitor can find the right furniture faster, see it presented well, move around the site with confidence on any device, and reach out to enquire without friction. Rather than reskinning the current site, we redesign the **key experiences it is built from** — the home page, the way products are browsed and viewed, the story and credentials of the business, the content, and the ways a customer gets in touch.

02 · OBJECTIVES

What the redesign sets out to achieve

Clearer product discovery

Help visitors move from a broad range to the exact category and product they need, quickly.

Stronger presentation

Show Benchy's furniture with the photography, layout and detail it deserves.

Easier navigation

A consistent, predictable structure across categories, products and content.

Mobile usability

Layouts that read and work well on phones, where much browsing now happens.

Accessible enquiry paths

Make it obvious and simple to get in touch and request information.

A cohesive brand feel

One consistent visual language across every page, from home to contact.

We are focused on design quality and usability. This proposal does **not** promise increased leads, search rankings or revenue — those depend on many factors beyond design alone.

03 · APPROACH

A cohesive, bespoke design approach

Rather than fitting Benchy into a generic template, we design a considered system tailored to your brand and your range — so every page feels part of the same whole, and each product is easy to understand and act on.

- **Brand-appropriate visual direction** — a look and tone developed around Benchy's furniture, customers and market, agreed with you during discovery.
- **Clear information hierarchy and navigation** — a structure that guides a visitor from range, to category, to product, to enquiry.
- **Consistent typography, colours, spacing and components** — a single design language applied across every page.
- **Strong furniture photography and product presentation** — layouts built to show products, features and specifications clearly.
- **Responsive desktop and mobile layouts** — each design considered for large screens and phones.
- **Accessible contrast, readable text and usable form states** — designs that are comfortable to read and simple to use.
- **Clear enquiry calls to action** — obvious, well-placed ways to get in touch on every relevant page.
- **Shared header and footer, reusable components and templates** — consistent global framing, so the whole site stays on-brand and is efficient to extend.
- **Design handoff** — final designs delivered with agreed assets and specifications, ready for build.

DECIDED TOGETHER, DURING DISCOVERY

We deliberately do **not** lock in a specific font, colour palette, CMS, framework or development platform before discovery. Those choices are made with you, informed by your brand assets and priorities — not assumed up front.

04 · SCOPE

What we'll design

The redesign covers the core pages and reusable templates that make up Benchy's website. Several are **reusable templates** — one bespoke design that every category, product, portfolio item or article then shares — so the whole site stays consistent and easy to extend.

DESIGN	REFERENCE / EXAMPLES	PURPOSE
1 • Home	benchy.in	Introduce the brand, communicate its value, showcase key furniture categories, and guide visitors toward products and enquiries.
2 • About	/about/	Present the brand story, values, design approach, craftsmanship and ergonomic focus.
3 • Company Profile	/company-profile/	Present company capabilities and business credentials using client-approved information — distinct from About. No certifications, capacity, customer names or achievements are invented.
4 • Products Overview	/products/	A clear gateway into the full product range.
5 • Product Category TEMPLATE	/office-tables/ · /chairs/ · /work-station/ · /reception-tables/ · /height-adjustable-table/	One reusable category design. Content and imagery vary per category; substantially different layouts would need a separate scope agreement.
6 • Product Detail TEMPLATE	/chairs/silla/ · /giro/ · /mode/ · /eco/	A reusable layout for imagery, descriptions, features, available specifications and enquiries. Does not assume e-commerce, online payments, live stock or product configuration.
7 • Portfolio Detail TEMPLATE	/portfolio/item/workstations/ · /office-tables/ · /workpods/	A reusable visual showcase layout. Existing entries appear to represent furniture categories; they are not described as completed customer projects without confirmation.
8 • Blog Listing	/blog/	A clear, readable article-discovery experience.
9 • Blog Article TEMPLATE	/blog/types-of-office-chairs/	A reusable article layout with strong reading hierarchy, imagery and relevant next steps.
10 • Contact	/contact/	Make it easy to enquire, using client-approved contact details and an enquiry-form design.

OPTIONAL ADDITIONAL DESIGN — PORTFOLIO LISTING / GALLERY

A portfolio gallery archive exists at </portfolio/category/gallery/>, but no dedicated main portfolio page was confirmed. A dedicated portfolio listing that leads visitors to the portfolio detail pages can be added as an **optional add-on design**, priced separately so the core package stays clear.

05 · DELIVERABLES

What you receive

The engagement delivers a complete, consistent set of bespoke designs ready to be built, along with the shared elements and specifications that keep the site coherent as it grows.

A Bespoke page designs

Full custom designs for the site's core pages, including the reusable templates (category, product detail, portfolio detail, blog article and listing patterns) that carry the design across the whole site.

B Shared header & footer

A consistent global navigation, site framing and footer design applied across all pages.

C Responsive layouts

Each design considered for desktop and mobile, with readable text and usable layouts at both sizes.

D Reusable components

A component set — buttons, cards, product blocks, forms and more — so future pages stay on-brand and consistent.

E Enquiry-focused design

Clear calls to action and an enquiry-form design that make it simple for visitors to get in touch.

F Design handoff

Final designs delivered with agreed assets and specifications, ready for a development team to build.

DESIGN, NOT BUILD

This package is the **design** of the website — the visual designs, templates, components and specifications. Whether Benchy also needs the site **built and deployed** has not yet been established; development is listed as a separately confirmable item later in this document.

06 · PRICING

Design pricing

The redesign is delivered as a bespoke design package, priced on our design rate of ₹7,500 per unique page design.

ITEM	AMOUNT (₹)
Bespoke website redesign — core package Custom design of the site's core pages and reusable templates: Home, About, Company Profile, Products Overview, Product Category, Product Detail, Portfolio Detail, Blog Listing, Blog Article and Contact — with a shared header, footer and component set.	₹75,000
Optional · Portfolio Listing / Gallery design	₹7,500
Total if the optional design is added	₹82,500

Applicable taxes: **to be confirmed** (tax treatment has not been supplied). Figures are for **design** only.

This package is the **design** of the redesigned site. Development, CMS work, content migration, redirects, integrations, hosting and related services are **not** included in this figure — they are listed as separately confirmable or separately quotable items in the scope-exclusions section.

07 · PROCESS

How we deliver

- 1

Discovery — understand Benchy's brand, products, customers and priorities; agree visual-direction inputs, and gather brand assets and product information.
- 2

Structure — agree the site's information architecture and how the designs map across the range, so navigation and hierarchy are settled before visuals.
- 3

Visual direction — establish the design language: typography, colour, spacing and components, agreed with you before full page design begins.
- 4

Page design — design the core pages and the reusable templates, plus the shared header and footer, for desktop and mobile.
- 5

Review — present designs, gather your consolidated feedback, and refine to an agreed point.
- 6

Handoff — deliver final designs with agreed assets and specifications, ready for build.

08 · INDICATIVE SCHEDULE

The schedule below is **indicative and proposed**. Actual timing depends on content availability, scope confirmation and the speed of feedback and approvals. No delivery deadline has been agreed.

STAGE	INDICATIVE DURATION
Discovery & structure	≈ 1 week
Visual direction	≈ 1 week
Page design	≈ 2–3 weeks
Review & refinement	≈ 1 week
Handoff	≈ a few days

Durations are proposed for planning only and are confirmed once scope, content readiness and a revision approach are agreed. Stages may overlap.

09 · CLIENT RESPONSIBILITIES

What we'll need from Benchy

A bespoke design is only as strong as the material behind it. To keep the work moving and true to your brand, we'll need brand assets (logo, guidelines, references), good-quality product imagery, accurate specifications, approved copy, client-approved contact details, and a single consolidated set of feedback at each review point.

10 · EXCLUSIONS & ASSUMPTIONS

Separately confirmable or separately quotable

This engagement is the **design scope**. The following are **not** included in ₹75,000 and are confirmed or quoted separately:

- Frontend and backend **development**
- **CMS** setup or changes
- Population or **migration** of existing content
- Mapping existing URLs into the new structure
- **Redirects** and technical SEO work
- Form integrations and enquiry delivery
- Analytics setup
- Hosting, domain, maintenance, deployment
- Copywriting, photography, paid stock, translations
- E-commerce or advanced product configuration
- Additional unique layouts or functionality
- Anything not listed in the design scope

OPEN SCOPE ITEM — ANCILLARY PAGES

The site also includes Privacy Policy, Grievance and brochure pages (e.g. [/privacy-policy/](#), [/grievance/](#), [/benchy-desk-brochure/](#), [/benchy-executive-excellence/](#)). Their treatment is **open**: they may be **retained**, **adapted** to an agreed standard layout, or **quoted separately** if bespoke designs or extra functionality are needed. They are not silently included in the package, and nothing here suggests removing them.

11 · COMMERCIAL TERMS REQUIRING AGREEMENT

Proposed terms — to be confirmed together

The confirmed commercial input is the **bespoke design rate of ₹7,500 per unique page design**. The terms below are **proposed for discussion**; none is a commitment until agreed in writing.

ITEM	PROPOSED (SUBJECT TO AGREEMENT)
Engagement	Full bespoke website redesign — core design package (optional add-on: portfolio listing).
Design fee	₹75,000 core · ₹82,500 with the optional portfolio listing.
Taxes	To be confirmed — tax treatment not yet supplied.
Revision allowance	A defined number of review rounds per design — to be agreed .
Payment schedule	A milestone-based schedule (e.g. on kickoff and on handoff) — to be agreed .
Delivery schedule	Indicative only; confirmed after scope and content readiness — to be agreed .
Support / after-handoff	Any post-handoff support period — to be agreed .
Proposal validity	A validity period for these figures — to be agreed .
Design vs development	Whether development is also required — to be established ; quoted separately if so.

12 · NEXT STEPS

- 1 A short discovery conversation** to confirm scope: design-only or design-and-development, the optional portfolio listing, and treatment of the ancillary pages.
- 2 Agree the open commercial terms** above — taxes, revisions, payment, schedule and validity.
- 3 Confirm and begin** — on written agreement, we start with discovery and gathering your brand assets and product content.

● INTERNAL · NOT PART OF THE CLIENT-FACING PROPOSAL — REMOVE BEFORE SENDING

BEFORE SENDING

Decisions we must confirm internally

This page is for our team only. It is not part of the proposal Benchy receives. Remove it (or export only pages 1–9) before sharing.

DECISION	WHY IT MATTERS / WHAT TO SETTLE
Design-only vs design + development	The whole framing hinges on this. Confirm whether Benchy wants only the ₹75,000 design scope, or also the build. If build is wanted, prepare a separate development quote.
Optional portfolio listing	Include the add-on design (→ ₹82,500) or keep the core ₹75,000? Confirm before final pricing.
Ancillary pages	Privacy, Grievance, brochure pages — decide: retain / adapt to standard layout / quote bespoke separately. Don't let these creep into the package silently.
Content migration	Who moves the existing site's content (≈ 58 content URLs) into the new templates? Confirm it's out of design scope and price separately if we own it.
Revision allowance	Set the number of review rounds per design before extra rounds are chargeable. Protects margin.
Schedule	Confirm we can meet the indicative timeline given current capacity; adjust before committing dates.
Payment terms	Decide the split (e.g. 50% kickoff / 50% handoff) and invoicing for an India (INR) client.
Tax treatment	GST applicability for this INR engagement — confirm rate/registration before quoting tax; currently “to be confirmed”.
Placeholders & branding	Fill [Agency Name], [Proposal Date], [Agency Contact], signatory. Confirm branding (Code-Ox) and which contact to use.
404 finding	7 of ≈58 URLs returned 404 while serving content during review — note for the dev/implementation phase, not a design blocker.
