OVERVIEW

One system for the whole factory

Code-Ox Technologies will implement a full **Odoo 19 Enterprise ERP** for Saudi Fiberglass Factory (SAUFICO) — one system covering the entire operation, from the first sales enquiry through purchasing, the warehouse, the GRP production floor, quality, finance and payroll. It is configured specifically for a fiberglass (GRP/FRP) manufacturer — your products, materials, process and Saudi compliance — and delivered as one fixed project in roughly **30–40 days** for **4 users**.

SELL & WIN WORK

- ✓ **CRM & Sales** — pipeline, quotations, e-sign, price lists

BUY & STORE

- ✓ **Purchasing** — RFQs, vendor scorecards, blanket orders
- ✓ **Inventory** — stock, lot traceability, barcode

MAKE

- ✓ **Manufacturing** — recipes, work centres, shop floor
- ✓ **Quality** — inspection checks & certificates
- ✓ **Engineering changes** — controlled formula updates

FINANCE & COMPLIANCE

- ✓ **Accounting** — VAT, Zakat, lease accounting, costing
- ✓ **ZATCA e-invoicing** — Fatoora Phase 2 (legal)

PEOPLE

- ✓ **HR & Payroll** — Saudi WPS & GOSI, Iqama reminders
- ✓ **Time Off & Expenses** — leave and staff claims

ACROSS EVERYTHING

- ✓ **Dashboards** — live KPIs per department
- ✓ **Documents** — COAs, test certs on the record

MOST TIME-CRITICAL ITEM — ZATCA E-INVOICING (FATOORA)

Saudi law requires every VAT-registered business to issue invoices electronically through ZATCA's Fatoora system, and Phase 2 is being rolled out in waves. This carries a **legal deadline set by the tax authority — not by the project plan**, so it is the most urgent piece. SAUFICO should confirm its wave from its ZATCA notification letter. Once configured, invoices are created exactly as before and the system handles the compliance part automatically.

SCOPE OF WORK

What Code-Ox delivers

Every module below is configured around SAUFICO's real operation, with your data loaded and your team trained — all included in the one implementation charge.

MODULE	WHAT WE DELIVER
CRM & Sales	Sales pipeline, branded quotation templates per product line, e-signature, price lists (pipe by metre, tanks/fittings by unit), win-rate reporting; real customers loaded.
Purchasing	Approved vendor list with pricing & lead times, RFQ-to-bill flow, automatic reordering, blanket orders and vendor on-time-delivery scorecard.
Inventory & Warehouse	Plant storage locations, verified opening stock, reorder/safety-stock rules, lot & serial traceability (resin batch → finished tank), barcode scanning.
Manufacturing	Material recipes (BoMs) and timed routings for every product line, work centres costed per hour, shop-floor tablet screens; production staff trained.
Quality	Incoming / in-process / outgoing checks (COA, cure, wall-thickness, hydrostatic test), checklists & certificates, automatic non-conformance alerts.
Engineering Change	Controlled formula/spec change approval flow linked to the affected recipe, with version history.
Accounting & Tax	Migrate chart of accounts & opening balances from the existing system, 15% VAT, Zakat, lease accounting, automatic stock valuation, management reports.
ZATCA e-Invoicing	Activate and configure Odoo's official ZATCA (Fatoora Phase 2) integration — onboarding, testing and automatic compliant invoices, credit & debit notes.
HR & Payroll	Employee master data, Saudi payroll with WPS setup completion, GOSI, leave types & approvals, Iqama-expiry reminders; one parallel payroll run before cutover.
Expenses & Barcode	Expense claims with approval routing; barcode scanning across inventory and production.
Go-live essentials	User roles & access per department, SAUFICO branding on documents, department training (Sales, Purchasing, Warehouse, Production, Quality, Finance, HR), go-live support.

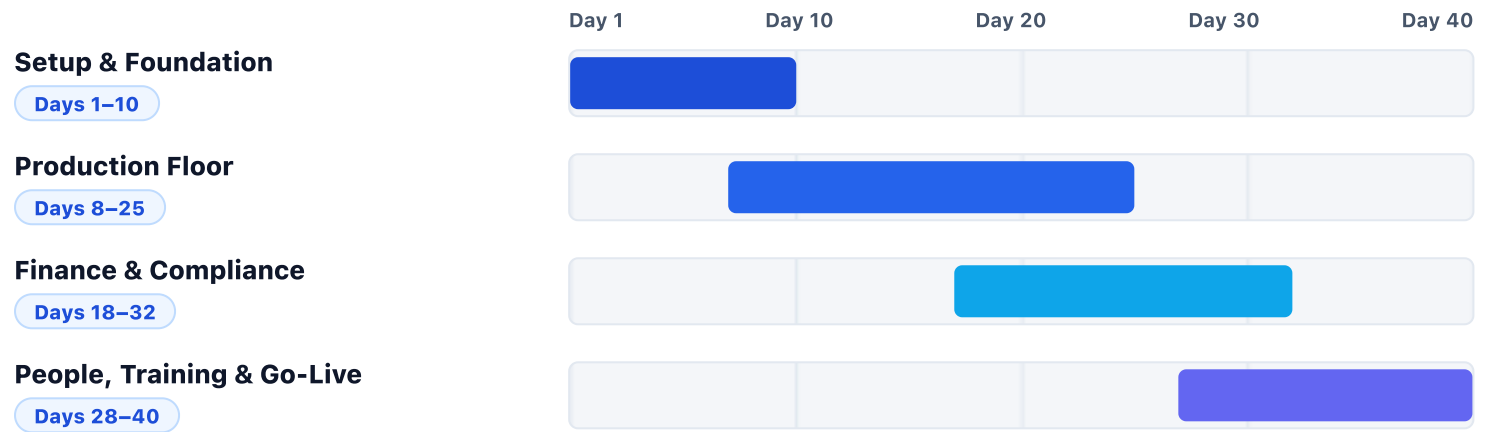

INCLUDED AFTER GO-LIVE

4 months of complimentary support — bug fixes and configuration adjustments on every module, at no extra cost.

DELIVERY PLAN

One project, delivered in 30–40 days

The whole system is delivered as a single fixed project. The work runs as four overlapping streams so different parts of the setup progress in parallel and the go-live date stays tight — not a staggered, part-by-part rollout.

≈ 30–40 days from kickoff to go-live — the complete system, delivered as one fixed project.

WHAT EACH STREAM COVERS

Setup & Foundation — company setup, users, CRM & Sales, Inventory. **Production Floor** — Manufacturing, Quality, engineering change. **Finance & Compliance** — accounts migration, VAT/Zakat, ZATCA e-invoicing. **People, Training & Go-Live** — payroll/WPS, time off, expenses, department training, cutover.

Day ranges are indicative and confirmed at planning. The streams overlap on purpose, which is how the whole system lands in roughly 30–40 days rather than running end to end.

INVESTMENT

Commercial summary

Three parts: a one-time **implementation charge** (Code-Ox), the recurring **Odoo licences** (paid to Odoo), and the recurring **server / hosting**. Licences and hosting are paid by SAUFICO directly to the providers.

1 · IMPLEMENTATION CHARGE (ONE-TIME)	AMOUNT
Full Odoo ERP implementation — all modules, 4 users Configuration, data migration, ZATCA e-invoicing, training, go-live + 4 months complimentary support	SAR 21,000
One-time implementation total	SAR 21,000

Paid once — not annual, not recurring. Payment: 50% on kickoff (SAR 10,500) + 50% on go-live (SAR 10,500).

2 · ODOO ENTERPRISE LICENCES — 4 USERS (CUSTOM PLAN)	MONTHLY	ANNUAL
Year 1 — with first-year discount	\$81.60 ≈ SAR 306	\$979 ≈ SAR 3,672
Year 2 onward — standard rate	\$102 ≈ SAR 383	\$1,224 ≈ SAR 4,590

Paid annually to Odoo. Each added/removed user ≈ SAR 918 in Year 1, ≈ SAR 1,148/year thereafter. SAR indicative at 3.75.

3 · SERVER / HOSTING (PER INSTANCE, NOT PER USER)	MANAGED BY	ANNUAL
Odoo.sh RECOMMENDED Fully managed, multi-region backups, Odoo support	Odoo	≈ SAR 3,960
LightNode VALUE 8 GB Middle-East VPS, Code-Ox managed	Code-Ox	≈ SAR 1,350

YEAR 1 TOTAL (IMPLEMENTATION + LICENCES + HOSTING, 4 USERS)	YEAR 1	YEAR 2+ / YR
With Odoo.sh recommended	≈ SAR 28,632	≈ SAR 8,550
With LightNode value	≈ SAR 26,022	≈ SAR 5,940

Year 1 = one-time implementation (SAR 21,000) + first-year licences (discounted) + one year of hosting. From Year 2, only licences + hosting recur. Figures indicative at SAR 3.75 to the US dollar, confirmed at subscription/provisioning.

TERMS

Terms & acceptance

- **Payment** — 50% on kickoff, 50% on go-live, of the SAR 21,000 implementation charge.
- **Licence & hosting** — paid by SAUFICO directly to Odoo / the hosting provider; not invoiced by Code-Ox. For the managed VPS, Code-Ox handles setup and maintenance.
- **Master data** — SAUFICO provides chart of accounts, product recipes, vendor list, customer contacts and employee details at project kickoff.
- **ZATCA** — configuration assumes SAUFICO's VAT/ZATCA registration is in order; SAUFICO confirms its Phase 2 wave and deadline. Registration itself is out of scope.
- **Hardware** — barcode scanners/printers and shop-floor tablets procured by SAUFICO where not already available; Code-Ox advises on specification.
- **Support** — 4 months complimentary support after go-live (bug fixes and configuration adjustments on all modules).
- **Validity** — this proposal is valid for 30 days from the date of issuance.
