

What CodeOx delivers for *Vitality Home Care*

A complete AI transformation for home care operations — from patient booking to therapist dispatch, payments, and reporting. Everything below is included in one annual price with no hidden costs.

SAR 65,000

PER YEAR · ALL-INCLUSIVE

No setup fee · No extra vendors · Saudi-hosted

PILOT COMPLETED

RIYADH & JEDDAH

ARABIC + ENGLISH

Pilot already completed on Vitality's live workflow. The system has been tested in your actual environment — bookings, therapist matching, and HMS sync are all validated and ready to go live.

AI COMMUNICATION CHANNELS

AIKA — AI Voice Agent

Handles outbound calls to patients in Arabic (Najdi dialect + MSA) and English. Confirms bookings, sends reminders, and follows up — automatically, without a human agent making the call.

12,000 MIN / YEAR INCLUDED

AIWA — AI WhatsApp Agent

Handles the complete patient journey over WhatsApp — booking requests, service questions, payment, location sharing, and appointment confirmation. Works 24/7 without coordinator involvement for routine cases.

48,000 MESSAGES / YEAR INCLUDED

SMART OPERATIONS

WhatsApp Location Intelligence

When a patient shares a Google Maps pin in WhatsApp, the AI reads the coordinates, identifies the Riyadh service district, and immediately notifies the assigned therapist. No manual address copying or follow-up call needed.

Therapist Matching — Riyadh & Jeddah

The AI knows which therapist covers which district and their live availability across all Riyadh and Jeddah service areas. It automatically matches and assigns the right therapist to each patient booking — no coordinator needed for routing decisions.

Custom Operations Dashboard

A single screen built specifically for Vitality's team — showing all active bookings, patient conversations, therapist status, escalation alerts, and district coverage in real time.

Human Escalation Workflow

When the AI encounters a complex query, complaint, or medical concern, it automatically routes the conversation to a human coordinator — along with the full patient history so nothing needs to be repeated.

Nixpend HMS Integration

Direct, live connection to Vitality's Nixpend system. Reads real-time therapist availability and writes confirmed bookings back automatically. No double-entry, no manual sync.

Payment Gateway

Patients complete payment directly inside the WhatsApp conversation. A secure payment link is sent in-chat and confirmed before the booking is finalised. No separate payment vendor required.

SMS Gateway

Appointment confirmations and reminders are sent by SMS to patients who do not use WhatsApp. Ensures full patient coverage with no additional vendor or cost.

— PLATFORM & INFRASTRUCTURE

Saudi-Region Cloud Hosting

All infrastructure runs inside Saudi Arabia, meeting PDPL and NCA data residency requirements. All hosting and running costs are covered in the annual fee — no separate cloud invoices.

Arabic + English · Full Coverage

AI communicates fluently in Arabic (Najdi dialect and Modern Standard Arabic) and English — covering the full range of Vitality's patients and staff in Riyadh.

Multi-Entity Scalability

The platform can be extended to other Burjeel entities on separate WhatsApp numbers — same infrastructure, same AI, no new contracts. Future expansion at minimal additional cost.

— INCLUDED USAGE – PER YEAR

AIKA Voice Minutes

Outbound AI voice calls to patients — booking confirmation, reminders, follow-ups **12,000 min / yr**
≈ 1,000 min / month
