

DEVELOPMENT PROPOSAL · 25 SEPTEMBER 2026

Build the MVP that turns data into decisions.

A complete design-and-build proposal for the Nabdha AI MVP — the business owner uploads their data, Nabdha AI analyzes it, and returns the top risks, the top opportunities, a 30-day forecast, and a prioritized action plan.

- Data Upload

Excel · CSV · PDF
- AI Risks & Opportunities Engine
- 30-Day Forecast
- Bilingual AR / EN

PROPOSAL REF. CX-NBD-2026-01	DATE 25 September 2026	CURRENCY SAR	PREPARED BY Code-Ox Technologies
---------------------------------	---------------------------	-----------------	-------------------------------------

01 · THE BRIEF

Project overview & our understanding

Nabdha AI has asked us to build the **MVP of its AI business intelligence platform** — a tool that reads an SME's own business data and tells the owner what to do next, not just what happened. The business owner uploads their data, Nabdha AI analyzes it, and the owner receives a Business Intelligence Report.

This is a **complete design-and-build engagement**: data upload and cleaning, an AI analysis engine, an AI-generated report, a web dashboard in Arabic and English, secure login, and go-live support. Every number in the report is calculated by code running on the owner's own data — the AI layer only explains, ranks and writes the recommended actions, keeping the output accurate and trustworthy from day one.

02 · OBJECTIVES

What the MVP sets out to achieve

Trustworthy numbers

Every figure in the report is calculated by code, not guessed by the AI — building confidence from the first report.

Decisions, not dashboards

Top risks, top opportunities and a prioritized action plan — not a wall of charts to interpret.

Fast, friction-free data entry

Excel, CSV or PDF upload — no system integrations required to get a first report.

Forward-looking

A 30-day sales forecast alongside the diagnosis, so owners see what's coming next.

Arabic-first, bilingual

Full Arabic and English report and dashboard for the Saudi SME market.

Architecture that scales

Built so direct system integrations and advanced features can be added later without a rebuild.

This MVP is data-upload only. Direct integrations with e-commerce, POS and accounting systems (Salla, Zid, Foodics, Odoo and similar) are a future phase, architecture-ready but not part of this build.

03 · SCOPE

What we'll design & build

Eight modules make up the MVP, from data upload through to a live, working report.

MODULE	SCOPE DESCRIPTION
1 • Data Upload & Ingestion	Excel (.xlsx), CSV and PDF upload with downloadable templates for sales, inventory, customer and expense data.
2 • Data Cleaning & Quality Layer	Common data model mapping, missing/duplicate detection, format standardization, and a data-quality score.
3 • AI Analysis Engine	Rule-based and statistical signal detection across sales, inventory, customer and cash-flow indicators.
4 • Business Intelligence Report	AI-generated Top Risks, Top Opportunities and a prioritized Action Plan, in Arabic and English.
5 • 30-Day Sales Forecast	Expected sales trend and revenue range for the next 30 days, based on uploaded historical data.
6 • Web Dashboard AR/EN	Decision-first report view presenting risks, opportunities, forecast and action plan.
7 • Secure Login & Organization Setup	Account authentication and an isolated data space per organization.
8 • QA, UAT & Go-Live	Functional and data-validation testing, UAT support, and production deployment.

NOT INCLUDED IN THIS MVP

Direct system integrations (Salla, Zid, Shopify, WooCommerce, Foodics, Odoo, Rewaa, Qoyod, Daftra, Zoho Books, Salesforce/Dynamics 365), the conversational AI Business Advisor, and automated alerts are future-phase items — architecture-ready, quoted separately when scoped.

04 · INVESTMENT

Your investment

COMPLETE MVP DESIGN & DEVELOPMENT

Data upload, AI analysis engine, Business Intelligence Report, 30-day forecast, web dashboard, secure login, QA & go-live — designed, built, tested and launched.

SAR 55,000

one-time project fee · exclusive of VAT

PAYMENT SCHEDULE

MILESTONE	%	AMOUNT (SAR)
Advance — on sign-off & kickoff	50%	27,500
Final — on UAT completion & go-live	50%	27,500
Total	100%	SAR 55,000

Exclusive of VAT. VAT (15%) will be added to each invoice as per KSA regulations.

ANNUAL MAINTENANCE**AFTER THE FREE SUPPORT PERIOD**

Go-live includes **4 months of complimentary support** at no extra cost. From month 5 onward, ongoing annual maintenance is **SAR 10,000 per year** (exclusive of VAT), covering bug fixes and configuration support — billed annually, first invoice issued at the end of the free support period.

THIRD-PARTY COSTS — CLIENT RESPONSIBILITY

LLM/AI API usage costs and server/hosting charges are **not included** in this quotation and are borne directly by Nabdha AI.

05 · TIMELINE

Indicative schedule — 30–40 days

The schedule below is **indicative**. Actual timing depends on data readiness, feedback turnaround and scope confirmation at kickoff. Stages may overlap.

PHASE	DURATION
1 • Discovery & Setup Confirm data templates, environment setup, architecture sign-off	Days 1–5
2 • Core Build Data upload & cleaning, AI analysis engine, signal detection	Days 6–20
3 • Report & Dashboard Business Intelligence Report generation, 30-day forecast, web dashboard (AR/EN)	Days 21–30
4 • QA & Go-Live Testing, UAT support, production deployment and handover	Days 31–40
Indicative total	30–40 days

06 · TERMS & CONDITIONS

Terms & conditions

- 1 Scope.** Work is limited to the scope set out in this proposal. Direct system integrations and features outside this scope are quoted and agreed separately.
- 2 Fees & payment.** The project fee is **SAR 55,000** exclusive of VAT, payable per the milestone schedule (50% on kickoff, 50% on go-live).
- 3 Client responsibilities.** Nabdha AI provides sample business data, timely feedback, and testing access within agreed deadlines. Delays caused by the client may impact the timeline.
- 4 Third-party costs.** LLM/AI API usage and server/hosting charges are not included and are Nabdha AI's responsibility, billed directly by those providers.
- 5 Intellectual property.** On receipt of full payment, all custom code and deliverables become Nabdha AI's property. Third-party libraries remain under their own licences.
- 6 Support & maintenance.** 4 months of complimentary bug-fix support are included from go-live. Annual maintenance thereafter is SAR 10,000/year, billed separately.
- 7 Confidentiality.** Both parties keep the contents of this proposal confidential, without prior written consent.
- 8 Governing law & validity.** This engagement is governed by the laws of the Kingdom of Saudi Arabia. This proposal is valid for 30 days from the date of issue.

07 · NEXT STEPS

Getting started

Three simple steps to move from proposal to a live MVP.

- 1 **A short discovery conversation** to confirm scope and sample data readiness.
- 2 **Confirm the terms** and the payment schedule set out in this proposal.
- 3 **Kick off** — on the signed proposal and advance payment, we begin discovery and environment setup.
