01 OVERVIEW

Executive summary

Customers don't shop by menu. They write **"a gift for my wife, rose gold, under 3,000"** or send a photo of a design they like. Our **WhatsApp agent** — a chat-based AI agent — understands these messages in Arabic and English, answers in Adiba's tone, recommends pieces from your collections, books showroom visits and gathers custom-design requests — then hands warm, qualified customers to your team.

The WhatsApp agent also runs your **WhatsApp marketing**: campaigns go to opted-in customer segments, and when customers reply, the agent picks up the conversation immediately. It covers everything a menu bot does, plus real conversation.
