

FINANCIAL PROPOSAL · SEPTEMBER 2026

Website & eCommerce Two Paths Forward

Following your manager's review, this proposal prices both routes side by side: customizing your current Salla store with an Odoo integration, or moving to a fully native Odoo Website. Pick either — or use this to decide between them.

Salla Customization

Salla ↔ Odoo Integration

Native Odoo Website

Pickup & Delivery Logic

SPL / SMSA / DHL / RedBox

QUOTATION NO.

CX-QAF-2026-01

DATE

25 September 2026

CURRENCY

SAR (Saudi Riyal)

PREPARED BY

Code-ox Technologies

OPTION 1

Customize Salla + Integrate with Odoo

SAR 40,000

Exclusive of VAT · 5 weeks

OPTION 2

Fully Native Odoo Website

SAR 70,000

Exclusive of VAT · 10 weeks

PREPARED FOR Qaf Coffee Roasters · Kingdom of Saudi Arabia. This quotation is based on requirements gathered by your sales team and management to date, and is valid for 30 days from the date of issuance.

OVERVIEW

Executive Summary

Since our first conversation, we didn't just talk about a native Odoo Website — we built one. **codeox-technologies-llp-qaf-roaster.odoo.com** is a live working demo on Odoo 19: storefront, product catalog with variants, a pickup-in-store vs. home-delivery selector at checkout, multi-branch pricing, and website orders flowing straight into POS. You tested the pickup flow yourself on 21 September and confirmed it works.

Testing it surfaced the real refinements you need: pickup shouldn't ask for a delivery address, pickup pricing should follow the branch pricelist, and some categories (like drinks) should be pickup-only. Your manager then framed the decision as two paths, and asked for pricing and timeline on each.

This proposal prices both. **Option 1** keeps Salla as your storefront, customizes its checkout logic, and connects it to Odoo two-way so orders, stock and customers stay in sync. **Option 2** takes the demo you've already tested to production — closing the remaining gaps above and switching your live traffic over, no integration layer, no sync lag. Both are priced and scoped independently below so you can compare them directly.

Prepared For Qaf Coffee Roasters Al Khobar, Kingdom of Saudi Arabia	Prepared By Code-ox Technologies raghib@code-ox.com +966 56 176 5707	Quotation Details No: CX-QAF-2026-01 Date: 25 September 2026 Currency: SAR (Saudi Riyal)
--	--	--

THE TWO OPTIONS, AT A GLANCE

	OPTION 1 — CUSTOMIZE SALLA + ODOO INTEGRATION	OPTION 2 — NATIVE ODOO WEBSITE
What it is	Keep Salla as the storefront. Customize its checkout logic and connect it to Odoo with a two-way sync.	Retire Salla. Build the storefront directly on Odoo Website + eCommerce, on the same database as your ERP.
Data	Two systems, kept in sync by an integration layer. Orders, stock and customers mirrored between Salla and Odoo.	One system. Orders, stock, pricelists and customers live in Odoo natively — nothing to sync.
Flexibility	Bounded by what Salla's platform and app store allow (see assumptions, page 10).	Full control — pickup/delivery rules, category restrictions and pricelists built exactly to spec.
Investment	SAR 40,000 (excl. VAT)	SAR 70,000 (excl. VAT)
Timeline	5 weeks from kickoff	10 weeks from kickoff

OUR RECOMMENDATION

If the pickup/delivery and category rules below are the only real friction, Option 1 solves them fastest and keeps your Salla investment. If you're already thinking about migrating fully to Odoo — for one system, no sync risk, and no Salla subscription — Option 2 is the stronger long-term move. Happy to walk through either in a call.

PROOF, NOT PROMISES

What's Already Built & Tested

This isn't a proposal to build a website from a blank page. We built one, gave you the login, and you tested it. What follows is what's genuinely live today at **codeox-technologies-llp-qaf-roaster.odoo.com** (Odoo 19) — verified directly against the demo's storefront and backend, not just described.

CAPABILITY	WHAT WE VERIFIED
Storefront	Full Website + eCommerce store live — home, shop, category filters (Espresso Drinks, Roasted Coffee), and product pages with real variant options (espresso origin, shot type, milk type, cup type).
Pickup vs. delivery	Checkout already has a "Home Delivery / Pickup In Store" selector with a store picker — the exact feature you asked for. You tested it yourself on 21 September and confirmed it working ("Tested  ").
Multi-branch pricing	Two POS shops configured (Nada Branch, ARAMCO), proving the "different price for the same product in different stores" behavior demoed on 18 September.
Website → POS flow	37 real orders logged across both branches between 17–22 September, with real customer names — the website-to-POS order flow has been genuinely exercised, not just clicked through once in a demo.
Kitchen / prep display	Kitchen Display app installed and connected, for order preparation workflow at the counter.

ONE REAL CONSTRAINT

The demo currently sits on an **Odoo.sh trial database** — the platform itself warns it "will be automatically deleted on 17 October 2026" and that "trial servers are not backed up." Whichever option you choose, migrating this to a permanent, backed-up production instance is a required step before go-live — it's included in Option 2's scope on page 7.

FLAGGED, NOT COMMITTED

During our call you referenced the **Bonat** app as something you liked (loyalty/reward vouchers). Odoo's POS already has a Bonat integration panel available — it isn't configured or priced into either option below. If it's something you want, we'll scope and price it separately once we understand what specifically appealed to you about it.

DISCOVERY

Refinements Needed On What's Already Live

Testing the demo surfaced specific, real gaps — not a wishlist, a punch list. Every line below is priced into both options unless marked **TO CONFIRM** — those need one short discovery call before build starts, so we scope and price them precisely rather than guess.

Requirement	What you told us	Status
Fulfillment method	Drop-off (home delivery) vs. customer pickup, decided by order volume — exact volume threshold still being checked by your team.	TO CONFIRM
Pickup origin	Customers pick up from the central warehouse, not individual café branches.	CONFIRMED
Current couriers	SPL, SMSA, DHL and RedBox — all four in active use for home delivery today. None are configured on the demo yet (it currently has one generic "Standard delivery" method only). SPL is reused from an integration Code-ox already built elsewhere — lower effort than SMSA, DHL and RedBox, which are net-new.	CONFIRMED
Salla ↔ Odoo sync	Two-way integration requested: sync inventory and product data, then receive real-time orders in Odoo along with any charges or discounts applied on the Salla side.	CONFIRMED
Store-pickup checkout	The pickup-vs-delivery selector already exists and you tested it — but pickup still asks for a delivery address, and price doesn't yet follow the branch pricelist. Both need fixing.	CONFIRMED
Category-level restriction	Certain categories (e.g. drinks / made-to-order items) should be sellable for in-store pickup only, not for home delivery.	CONFIRMED
Optional variants	Product variants (espresso origin, milk type, etc.) are currently required at checkout — you asked for these to be optional instead.	CONFIRMED
Online payment	Customers should be able to pay for themselves online — confirmed feasible once a payment gateway is configured; not yet set up on the demo.	CONFIRMED
Path decision	Management reviewed and asked for two priced options: (1) customize the current Salla site + integrate with Odoo, or (2) take the tested Odoo Website to production.	CONFIRMED
Transparency ask	For the Odoo Website path specifically — what's gained versus Salla, and a clear breakdown of annual charges and any fees not obvious up front.	CONFIRMED

ONE OPEN ITEM

The order-volume threshold that decides pickup vs. drop-off isn't finalized yet on your side. We've scoped both options assuming this becomes a configurable rule (by order value, weight, or item count) rather than a fixed number — so whatever your team settles on, it's a setting, not a rebuild.

1

OPTION 1

Scope of Work — Customize Salla + Integrate with Odoo

#		
01	Store-Pickup Checkout Customization	Custom Salla app/theme change: for "Pickup in Store" orders, re
02	Category-Level Fulfillment Rules	Configure and code the restriction so select
03	Volume-Based Fulfillment Logic	Configurable rule engine to route orders to pickup
04	Salla ↔ Odoo Two-Way Integration	Sync products, prices and stock between Salla and Odoo, and p
05	Warehouse Pickup Workflow	Odoo-side pickup workflow from the central
06	Courier Integration — SPL, SMSA, DHL, RedBox	
	Delivery carrier setup in Odoo Inventory/Delivery for all four active couriers, mapped to the correct fulfillment and pricelist rules per order. SPL reuses an integration Code-ox alre	
07	Pricelist Configuration	Pickup vs. deliv
08	Testing & Go-Live Support	End-to-end order t

DEPENDS ON SALLA'S PLATFORM

Items 01-03 require custom development through Salla's App/Partner tools. The specifics of "customizing your current website" were only discussed by voice call so far — we'll confirm the exact behavior in writing during discovery week 1. If Salla's platform does not expose an API or app hook for something, we'll flag it and propose the closest achievable alternative before development starts — see assumptions on page 10.

OPTION 1

Timeline & Investment

PHASE	DELIVERABLES	DURATION
1Discovery & Rule Definition	Confirm the volume threshold, category list, and pricelist logic with your team; finalize Salla API feasibility check.	Week 1
2Salla Customization	Build checkout changes: no-address pickup flow, category restriction, pricelist-based pricing.	Weeks 2-3
3Odoo Integration & Couriers	Build Salla↔Odoo sync, warehouse pickup workflow, and SPL/SMSA/DHL/RedBox carrier mapping.	Weeks 3-4
4Testing & Go-Live	End-to-end order testing across both fulfillment paths, admin walkthrough, go-live.	Week 5

DELIVERABLE	CATEGORY	AMOUNT (SAR)
OPTION 1 — SALLA CUSTOMIZATION + ODOO INTEGRATION		
Store-Pickup Checkout Customization	Development	Included
Category-Level & Volume-Based Fulfillment Rules	Development	Included
Salla ↔ Odoo Two-Way Integration	Integration	Included
Warehouse Pickup Workflow	Development	Included
Courier Integration — SPL, SMSA, DHL, RedBox	Integration	Included
Pricelist Configuration	Development	Included
Testing & Go-Live Support	QA & Launch	Included
Option 1 Total		40,000
Total Investment — Option 1		Exclusive of VAT SAR 40,000

Payment Schedule — Option 1

MILESTONE	TRIGGER	AMOUNT (SAR)
Advance Payment (50%)	Upon proposal sign-off and project commencement	20,000
Final Payment (50%)	Upon UAT completion and go-live	20,000
		40,000

* All amounts are exclusive of VAT. VAT (15%) will be added to each invoice as per KSA regulations.

2

OPTION 2

Scope of Work — Take the Tested Demo to Production

The storefront, product variants, and pickup/delivery checkout are already built and tested (page 3). This scope is what's left to turn that demo into your live, production store — not a rebuild from a blank page.

#		
01	Production Migration Off Trial Database	Move off the current Odoo.sh trial instance (auto-deleted)
02	Full Catalog Import	Replace the demo's 3 sample products with your real Qaf catalog
03	Optional Product Variants	Change variant selection (e.g. size, color)
04	Pickup Checkout Refinement	Fix the two issues found in testing: pickup orders currently still allow delivery, and delivery orders cannot be changed to pickup
05	Category-Level & Volume-Based Fulfillment Rules	Restrict selected categories (e.g. drinks) to pickup-only, and route orders to specific carriers based on volume
06	Courier Integration — SPL, SMSA, DHL, RedBox	Configure all four as native Odoo delivery carriers (the demo currently has one generic "Standard delivery" method only). SPL reuses an integration Code-ox already has built; SMSA and DHL are new integrations
07	Payment Gateway Integration	Configure local payment methods (mada, cash on delivery)
08	QA, UAT & Go-Live Cutover	Full regression testing on the production environment

WHY THIS IS DIFFERENT

Because the storefront and Odoo ERP share one database, everything above ships without an integration layer to build, maintain or debug. Full comparison and the annual-cost breakdown are on page 9.

OPTION 2

Timeline & Investment

PHASE	DELIVERABLES	DURATION	
1	Migration & Discovery	Migrate off the trial database onto a production instance; confirm the pickup/volume rule and catalog scope with your team.	Weeks 1–2
2	Catalog Import & Checkout Fixes	Import your real product catalog; make variants optional; fix pickup's address and pricelist behavior.	Weeks 3–5
3	Fulfillment Rules, Couriers & Payment	Category/volume fulfillment rules, SPL/SMSA/DHL/RedBox courier integration, payment gateway setup.	Weeks 6–8
4	QA, UAT & Go-Live Cutover	Full regression testing, UAT with your team, cutover of live traffic from Salla, admin training.	Weeks 9–10

DELIVERABLE	CATEGORY	AMOUNT (SAR)
OPTION 2 — PRODUCTION-READY ODOO WEBSITE		
Production Migration Off Trial Database	Development	Included
Full Catalog Import	Development	Included
Optional Variants & Pickup Checkout Refinement	Development	Included
Category & Volume Fulfillment Rules	Development	Included
Courier Integration — SPL, SMSA, DHL, RedBox	Integration	Included
Payment Gateway Integration	Integration	Included
QA, UAT Support & Go-Live Cutover	QA & Launch	Included
Option 2 Total		70,000

Total Investment — Option 2	Exclusive of VAT	SAR 70,000
-----------------------------	------------------	------------

Payment Schedule — Option 2

MILESTONE	TRIGGER	AMOUNT (SAR)
Advance Payment (40%)	Upon proposal sign-off and project commencement	28,000
Milestone Payment (30%)	Upon catalog import, checkout fixes & fulfillment rules complete (end Week 8)	21,000
Final Payment (30%)	Upon UAT completion and go-live	21,000
		70,000

* All amounts are exclusive of VAT. VAT (15%) will be added to each invoice as per KSA regulations.

FOR THE ODOO WEBSITE PATH

What You Get More — and the Real Annual Charges

	SALLA + ODOO INTEGRATION (OPTION 1)	NATIVE ODOO WEBSITE (OPTION 2)
Where data lives	Two systems, synced by a connector. A sync failure or delay can show stale stock/price on the site.	One system. Stock, price and orders are the same record everywhere — no sync to fail.
Custom logic limits	Bounded by what Salla's app platform permits (see page 10).	No platform ceiling — any rule Odoo can model, we can build.
Storefront subscription	Salla subscription fee continues (billed by Salla directly, separate from this proposal).	No separate storefront subscription — Website & eCommerce apps are bundled into your existing Odoo plan (below).
Integration maintenance	The connector is a piece of software that needs monitoring and occasional maintenance as either platform updates.	Nothing to maintain — it's the same Odoo instance your team already uses.

\$

TRANSPARENCY

Annual Charges — Odoo's Own Published Pricing

PLAN	PRICE PER USER	WEBSITE & ECOMMERCE APPS
Odoo Standard	~\$13.50–16.90 / month (billed annually)	Bundled at no extra charge, alongside every other Odoo app on the plan.
Odoo Custom	~\$25.50–32.00 / month (billed annually)	Bundled at no extra charge. Adds Odoo Studio, on-premise/Odoo.sh options, external API access.

PLAN	YOUR 36 USERS — ANNUAL	YOUR 36 USERS — MONTHLY
Odoo Standard	~\$5,832–7,301 (≈ SAR 21,870–27,379)	~\$486–608 (≈ SAR 1,823–2,282)
Odoo Custom	~\$11,016–13,824 (≈ SAR 41,310–51,840)	~\$918–1,152 (≈ SAR 3,443–4,320)

THE HONEST ANSWER

There is no separate "Website app fee." Odoo's own pricing page states both plans "include unlimited support, hosting and maintenance" with "no hidden costs" — the Website and eCommerce apps are included in whatever per-user plan you're already paying for your ERP, at your existing **36 users**. Because Qaf already runs Odoo, going live with the Odoo Website adds **zero new licence cost** above the figures shown — unless you add new user seats (e.g. a dedicated web/content admin), billed at the same per-user rate. *Source: [odoo.com/pricing-plan](https://www.odoo.com/pricing-plan), fetched 24 September 2026; SAR converted at a fixed 3.75 peg — verify current rates and your actual plan tier before signing, as Odoo revises pricing periodically.*

WHAT'S GENUINELY NOT INCLUDED — EITHER OPTION

Domain registration, SSL (typically free via Odoo/Cloudflare but confirm with your registrar), payment gateway transaction/subscription fees, and SMS costs for order notifications are third-party costs billed directly to Qaf, not to Code-ox. This is the same disclosure we give on every Code-ox quotation.

TERMS & CONDITIONS

General Terms

- **Scope of Work:** Each option covers only the items listed on its respective scope page. Features outside that scope require a separate written agreement and may incur additional charges.
- **Client Responsibilities:** Qaf agrees to confirm the pickup/delivery volume threshold, provide Salla admin/API access (Option 1) or full catalog export (Option 2), and give timely feedback. Delays on these may impact the timeline.
- **Third-Party Costs:** Salla subscription fees (Option 1), Odoo per-user licence fees, domain, SSL, payment gateway fees, and SMS/notification costs are not included and are Qaf's responsibility.
- **Intellectual Property:** Upon receipt of full payment, all custom code and design deliverables become the exclusive property of Qaf Coffee Roasters. Salla and Odoo platform code remain subject to their own licences.
- **Revisions:** Each design/build phase includes up to two (2) rounds of revisions. Additional rounds are charged separately at an agreed rate.
- **Warranty:** 30 days of complimentary bug-fix warranty post go-live, covering all delivered modules. Extended support retainers are available on request.
- **Confidentiality:** Both parties agree to keep the contents of this proposal confidential and not disclose them to any third party without prior written consent.
- **Governing Law:** This agreement shall be governed by the laws of the Kingdom of Saudi Arabia.

ASSUMPTIONS & EXCLUSIONS

Key Project Assumptions

- ☐ Option 1 depends on Salla's App Store/Partner API exposing hooks for checkout address-requirement removal and category-level purchase restriction. If a specific behavior isn't exposed by Salla, we'll propose the closest achievable alternative before development on that item begins.
- ☐ Order-volume threshold for pickup vs. drop-off will be confirmed by Qaf's team within the first week of either option and configured as an editable rule, not hardcoded.
- ☐ Qaf holds active accounts with SPL, SMSA, DHL and RedBox with API/webhook access available for integration; account setup with any of these carriers is not included.
- ☐ Domain and hosting are **client-provided** for either option. Code-ox provides deployment/configuration support only.
- ☐ For Option 2, Qaf's existing Odoo subscription plan (Standard or Custom) already includes Website & eCommerce apps — no new Odoo licence line item is added by this proposal.
- ☐ Payment gateway subscription and per-transaction fees are borne directly by Qaf Coffee Roasters under either option.
- ☐ Only one option will be built. If Qaf starts with Option 1 and later chooses to migrate to Option 2, that migration is a separate, newly-scoped engagement.
- ☐ For Option 2, migrating off the current Odoo.sh trial database (auto-deletes 17 October 2026, not backed up) to a permanent production instance is included in scope and is a hard dependency for go-live.
- ☐ This scope was built from the live demo, the WhatsApp discovery thread, and a backend review. It will be re-verified and updated once fresh Odoo backend admin credentials are confirmed, as planned between our teams.
- ☐ The Bonat loyalty/voucher integration referenced during our call is **not included** in either option's price. If wanted, it will be scoped and quoted separately once requirements are confirmed.

AUTHORIZATION

Acceptance & Authorization

Please indicate which option Qaf Coffee Roasters is proceeding with, then sign below. By signing, both parties confirm acceptance of the selected option's scope, price and payment schedule, and authorize commencement of the project. A formal Statement of Work will follow the signed proposal and advance payment.

☐ **Option 1 — Salla Customization + Odoo Integration**
SAR 40,000 excl. VAT · 5 weeks

☐ **Option 2 — Fully Native Odoo Website**
SAR 70,000 excl. VAT · 10 weeks
