

COMMERCIAL QUOTATION · AUGUST 2026

AI Procurement Agent + Odoo Enterprise ERP

A proposal to automate Alamco Spaceworks' procurement end to end — an AI agent that reads any BOQ, matches every line to your catalogue, and raises purchase requisitions directly inside Odoo 19 — and a fresh Odoo Enterprise install that centralises procurement, projects, inventory, and finance in one system.

- AI Procurement Agent
- BOQ Parsing
- Odoo 19 Enterprise

QUOTATION NO. CX-ALM-2026-01	DATE 30 August 2026	CURRENCY SAR (Saudi Riyal)	PREPARED BY Code-ox Technologies
--	-------------------------------	--------------------------------------	--

OVERVIEW

Executive Summary

Code-ox Technologies is pleased to submit this commercial quotation for a custom AI Procurement Agent and a fresh Odoo Enterprise ERP implementation for Alamco Spaceworks, covering CRM, Sales, Purchase, Inventory, Project, Employees, and Accounting.

As a fit-out and bespoke joinery contractor delivering complex, multi-division BOQs across commercial, hospitality, and retail projects, Alamco's real bottleneck is procurement: BOQ files re-uploaded to ChatGPT session after session, prompts rewritten by hand, output cleaned up manually, and every purchase order re-typed into a system that has no knowledge of your catalogue or vendors. This proposal closes that gap on two fronts — an AI agent that turns a raw BOQ into live purchase requisitions in Odoo in minutes instead of days, and a single Odoo Enterprise instance that centralises the operations you run today across Zoho and a separate project app. Per our discussions, the initial rollout is 1–5 users, with the full module set configured from day one.

WHAT WE WILL DELIVER

- ✓

AI BOQ Intelligence

Reads any Excel or PDF BOQ — merged cells, multi-sheet, non-standard formats — and extracts every division, line item, quantity, and unit.
- ✓

Auto Purchase Requisitions in Odoo

Matched line items pushed into Odoo 19 as live requisitions — products cross-referenced, vendors matched, zero manual entry.
- ✓

Procurement Tracker

Every requisition monitored per item — ordered, pending, overdue — with automated delay alerts before they become site problems.
- ✓

Purchase Module

Vendor RFQs, price-list management, PO-to-bill matching, and multi-level approval — the ERP backbone the agent writes into.
- ✓

Inventory Module

Multi-location stock across warehouse and job sites, material reservation per project, and real-time stock valuation.
- ✓

Project Module

Every fit-out job tracked as a project — tasks, timesheets, and real material-plus-labour cost against quoted BOQ value.
- ✓

CRM Module

Client, consultant, and vendor pipeline — every enquiry and tender tracked from first contact through award, documents attached per opportunity.
- ✓

Sales Module

BOQ-style quotations with revision control, price lists, and a clean quotation-to-invoice flow.
- ✓

Employees Module

Employee directory and records, with timesheets and attendance linked to projects for accurate labour cost.
- ✓

Accounting Module

Full AR/AP, bank reconciliation, and ZATCA e-invoicing compliance — replacing Zoho as the finance system of record.
- ✓

Fresh Odoo Enterprise Install · 1–5 Users · Training · 6 Months Complimentary Support — Included

New Odoo 19 instance built from scratch around Alamco's workflows, access configured per role, hands-on training, go-live support, and bug fixes on every module at no extra cost for 6 months. Full scope on the Terms page.

OUR COMMITMENT

Code-ox configures Odoo around how your business actually runs — the AI agent and all seven modules set up as one connected flow, from the first BOQ uploaded to the first invoice issued.

1

SECTION 1

Scope of Work — AI Procurement Agent

The AI Procurement Agent is the custom-built layer that turns a raw BOQ into live purchase requisitions in Odoo. You do Step 1 — upload the file. The agent handles the rest.

#	MODULE / FEATURE & SCOPE DESCRIPTION
MODULE 1 — BOQ INTELLIGENCE	
01	Multi-Format BOQ Parsing (Excel & PDF) Reads standard, non-standard, and legacy BOQ formats — including merged cells and multi-sheet workbooks — with no manual prompting per file.
02	Division → Section → Item Extraction Full BOQ hierarchy captured; every line item extracted with its description, quantity, and unit — nothing missed.
03	Quantity & Unit Validation Extracted quantities verified against BOQ subtotals so errors are caught before anything reaches Odoo.
04	Project & Site Tagging Project name, site, and delivery date tagged to every extracted BOQ automatically for full context.
MODULE 2 — ODOO 19 INTEGRATION	
05	Product Catalogue Matching Each material matched to your Odoo product catalogue and linked to its internal SKU; low-confidence matches flagged for a quick human check.
06	Approved-Vendor Matching Line items matched to vendors from your approved supplier list before any requisition is raised.
07	Auto Purchase Requisition Creation Validated procurement lists pushed into Odoo 19 as live Purchase Requisition records — zero manual re-entry.
08	Full Audit Trail in Odoo Every agent action recorded against the requisition inside Odoo — who, what, and when — for complete traceability.
MODULE 3 — PROCUREMENT TRACKER	
09	Per-Item Real-Time Status Live visibility on every requisition — ordered, pending, or overdue — across all active projects.
10	Automated Delay Alerts & Escalation Delays surfaced automatically before materials fail to arrive on site, with escalation to the responsible user.
11	Cross-Project Procurement Dashboard One dashboard view across every project, with historical reporting and analytics on procurement performance.
12	Secure File Handling Uploaded BOQs validated, scanned, and de-duplicated before processing.

WHY THIS APPROACH — AND THE HAND-OFF TO ODOO

The agent replaces the fragile manual ChatGPT workflow — re-uploading files, rewriting prompts, cleaning output, and re-typing every PO — with one repeatable pipeline. A 200-line BOQ that takes half a day today is processed in minutes, and every requisition it raises is written **directly into the Odoo Purchase module** covered in Section 2 — from there it flows through native Odoo purchasing, inventory, and accounting as one connected system. Section 3 shows the full data flow.

Centralised System

THE PROCUREMENT BACKBONE — WHERE THE AI AGENT WRITES

Purchase

ODOO · PURCHASE

Odoo's procurement engine — turns every requisition into a tracked purchase order and controls what gets bought, from whom, and at what price.

✓

Auto purchase requisitions raised by the AI agent, converted to POs

✓

Vendor RFQs & central price lists — compare quotes in one place

✓

3-way PO → receipt → vendor bill matching before payment

✓

Multi-level approval routing above value thresholds

FEEDS →

Inventory · goods received

Accounting · vendor bills

READS ←

AI Agent · requisitions

Project · material demand

Inventory

ODOO · INVENTORY

Real-time stock across your warehouse and every job site — so you always know what's on hand, what's reserved, and what it's worth.

✓

Multi-location stock — warehouse plus active fit-out sites

✓

Materials reserved against specific projects — no cross-site mix-ups

✓

Lot / serial traceability for warranty & handover

✓

Real-time valuation, posted to the ledger automatically

FEEDS →

Project · materials issued

Accounting · stock value

READS ←

Purchase · goods received

Project

ODOO · PROJECT

Every fit-out and joinery job as a live project — the point where materials, labour, and quoted value meet, so you see real profit per site, not at year-end.

✓

Per-site projects with tasks, stages & milestones

✓

Timesheets from the site team logged against the job

✓

Real cost — materials + labour — vs. quoted BOQ value

✓

Milestone-based invoicing tied straight to Sales

FEEDS →

Sales · milestone invoicing

Accounting · job cost

READS ←

Sales · order

Inventory · materials

Employees · labour

Purchase · subcontract cost

SECTION 2 — CONTINUED

Scope of Work — CRM, Sales, Employees & Accounting

FRONT OFFICE & FINANCE — THE BUSINESS AROUND THE BACKBONE

CRMODOO · CRM

The front door — every enquiry and tender in one pipeline, so nothing is chased from an inbox or lost in a spreadsheet.

✓ Lead & opportunity pipeline — tender to award

✓ Central client, consultant & vendor contacts

✓ Tender & BOQ documents attached and versioned per opportunity

✓ Win-rate & pipeline reporting by project type

FEEDS →Sales · won opportunity → quotation

READS ←Entry point — starts the flow

SalesODOO · SALES

Turns a won opportunity into a BOQ-style quotation and, once confirmed, into an order that drives the whole project and its invoicing.

✓ BOQ-style line-item quotations with revision control

✓ Price lists tied to live vendor cost — margins stay accurate

✓ Order confirmation → project creation

✓ Clean quotation → invoice flow, milestone-linked

FEEDS →Project · order → jobAccounting · customer invoices

READS ←CRM · opportunityPurchase/Inventory · cost for margin

EmployeesODOO · EMPLOYEES

The HR foundation — who your people are and where their time goes, so labour lands as a real cost on the right job.

✓ Employee directory — contracts, roles, documents, contacts

✓ Timesheets logged against projects

✓ Attendance tracking for site teams

✓ Utilisation visibility across projects

FEEDS →Project · labour cost & utilisation

READS ←Project · task assignment

AccountingODOO · ACCOUNTING

The central ledger every other module posts into — replacing Zoho, with KSA e-invoicing built in and live financials instead of month-end exports.

✓ Chart of accounts, AR/AP, bank reconciliation

✓ ZATCA Phase-2 e-invoicing compliance

✓ Live P&L, balance sheet, cash flow, aged AR/AP

✓ Project cost consolidation — per job & company-wide

FEEDS →Dashboards · live financials

READS ←Sales · invoicesPurchase · billsInventory · valuationProject · cost

SECTION 3

How It All Connects

Every module above is configured as one connected system — no re-keying between them, no separate apps to reconcile. A tender enters CRM and becomes a Sales quotation; when a BOQ arrives, the AI Agent pushes it through Purchase; POs receive into Inventory; materials and Employee labour land on the Project; and every cost and invoice rolls into Accounting. One instance, one source of truth — end to end.

DATA FLOW — TENDER TO LEDGER

ONE SOURCE OF TRUTH

Because Purchase, Inventory, and Project share the same records, a cost entered once is visible everywhere it matters — the vendor bill, the stock valuation, the project P&L, and the company ledger all reconcile automatically. Replacing Zoho and your separate project app removes the double entry and the gaps between them.

WHO SEES WHAT

Admin / Owner

Full visibility across the AI agent, CRM, Sales, Purchase, Inventory, Project, Employees, and Accounting. Approves purchase orders and quotations above threshold, and views project profitability and financial reports company-wide.

Procurement / Project User

Uploads BOQs to the agent, reviews flagged items, manages opportunities, quotations, requisitions and vendor POs, and logs stock movements and timesheets against assigned projects.

FINANCIALS

Investment Summary

DELIVERABLE	CATEGORY	AMOUNT (SAR)

Advance Payment (50%)	Upon proposal sign-off and project commencement	12,000
Final Payment (50%)	Upon training completion and go-live	12,000
Project Total		24,000

COSTS NOT INCLUDED IN THIS QUOTATION

Odoo Enterprise user licence/subscription fees for however many of the 1–5 users Alamco activates are billed directly by Odoo to Alamco Spaceworks and paid directly by Alamco — not invoiced by Code-ox. The subscription also covers Odoo's own hosting for the instance. AI model usage (Claude API) for the procurement agent is billed at cost against Alamco's own API key, or estimated separately if Code-ox hosts it.

TERMS & CONDITIONS

General Terms

- **Scope of Work:** This proposal covers the custom AI Procurement Agent and fresh installation and configuration of Odoo Enterprise (CRM, Sales, Purchase, Inventory, Project, Employees, Accounting) as described. Any features outside this scope will require a separate written agreement and may incur additional charges.
- **AI Agent Accuracy:** The agent flags low-confidence extractions for human review before any requisition is raised. It is a decision-support tool; final confirmation of quantities, products, and vendors rests with Alamco's procurement team.
- **Client Responsibilities:** Alamco Spaceworks agrees to provide master data (chart of accounts, product catalogue, approved vendor list, client/consultant contacts, opening balances) and timely feedback within agreed deadlines. Delays caused by the client may impact the project timeline.
- **Odoo & AI Costs:** Odoo Enterprise user licence/subscription fees (1–5 users, exact count confirmed at kickoff) and AI model (Claude API) usage are billed directly to Alamco Spaceworks and are not included in this quotation.
- **Data Migration:** This quotation covers a fresh install with master data setup. Migration of historical transactional data from Zoho or any prior system is not included and can be scoped separately if required.
- **Revisions:** Configuration includes up to two (2) rounds of adjustment post-training. Additional rounds will be charged separately at an agreed rate.
- **Warranty:** Code-ox Technologies provides **6 months of complimentary support** post go-live, covering the AI agent and all configured Odoo modules — see scope and terms below. Extended support retainer packages are available upon request after this period.
- **Data Ownership:** All data entered into Alamco Spaceworks' Odoo instance — records, documents, and configuration — remains Alamco's property at all times and is exportable on request, including after project completion.
- **Delivery Timeline:** Estimated delivery is 30–35 business days from kickoff. Code-ox Technologies will confirm the detailed timeline at kickoff and keep Alamco informed of progress. Delays caused by Code-ox outside of agreed client-dependency delays will not be billed to Alamco.
- **Limitation of Liability:** Each party's liability to the other under this agreement is capped at the total value of this quotation, and neither party is liable for indirect or consequential losses. This limit does not apply to breaches of confidentiality or misuse of client data.
- **Termination:** Either party may terminate this engagement with 14 days' written notice. Alamco Spaceworks pays only for work completed up to the termination date; Code-ox Technologies delivers all configuration and documentation completed to that point.
- **Confidentiality & Governing Law:** Both parties agree to keep the contents of this proposal confidential. This agreement shall be governed by the laws of the Kingdom of Saudi Arabia, with both parties entitled to equal recourse under it.

HIGHLIGHT — 6 MONTHS COMPLIMENTARY SUPPORT

Covered for 6 months from go-live, at no extra cost: bug fixes and configuration corrections on the AI Procurement Agent and the CRM, Sales, Purchase, Inventory, Project, Employees, and Accounting modules as built, plus minor adjustments to fields, roles, and templates — target response **2 business days**. **Not covered:** new features, changes from Odoo platform updates, or issues from Alamco's own post-launch configuration changes — these are scoped separately, keeping the period fair to both sides. An optional retainer covers support after 6 months.

ASSUMPTIONS & EXCLUSIONS

Key Project Assumptions

- ☐ Alamco Spaceworks will provide master data — chart of accounts, product catalogue, approved vendor list, and client/consultant contacts — within **5 business days** of kickoff.
- ☐ Odoo Enterprise licence/subscription (1–5 users, exact count confirmed at kickoff) is purchased and paid for directly by Alamco with Odoo before implementation begins.
- ☐ Sample BOQs from at least **3–5 recent projects** — in the formats Alamco actually receives — are provided during discovery so the AI agent is tuned against your real submission structure.
- ☐ An Anthropic (Claude) API key is provided by Alamco, or Code-ox provisions one and bills model usage at cost; AI usage fees are not part of this quotation.
- ☐ ZATCA e-invoicing configuration assumes Alamco's existing ZATCA registration and compliance status is in order; ZATCA registration itself is not part of this scope.
- ☐ Since this is a fresh install, no legacy Odoo data or configuration exists to migrate or clean up.
- ☐ This quotation is valid for **30 days** from the date of issuance.

AUTHORIZATION

Acceptance & Authorization

By signing below, both parties confirm acceptance of this commercial quotation and authorize the commencement of the project under the terms, scope, and payment schedule set out above.
