

COMMERCIAL QUOTATION · 25 SEPTEMBER 2026

Full Odoo Implementation for Qaf Coffee Roasters

One Odoo system running the roastery, cafés, wholesale and franchise, connected live to your existing Salla store (qafcoffee.com) — for true cost per cup, live stock, profit per branch, and ZATCA-compliant invoices.

OVERVIEW

Executive Summary

Code-ox Technologies is pleased to submit this commercial quotation for a full Odoo implementation for Qaf Coffee Roasters — one live system running the roastery, ~10 café branches, wholesale and franchise, integrated in real time with your existing Salla storefront (qafcoffee.com). Scope, delivery phases and full pricing follow.

★ INCLUDED — MAJOR VERSION UPGRADE

Your Odoo is upgraded from version 17 to version 19 — the latest release — as part of this project, with all data, customisations and configuration migrated and fully tested before go-live. No separate upgrade fee.

Prepared For Qaf Coffee Roasters Al Khobar, Kingdom of Saudi Arabia	Prepared By Code-ox Technologies raghib@code-ox.com +966 56 176 5707	Quotation Details No: CX-QAF-2026-02 Date: 25 September 2026 Currency: SAR (Saudi Riyal)

WHAT WE WILL DELIVER

- ✓ **Roastery in Odoo**
Bill of materials for green → roasted → packed, with yield and lot tracking.
- ✓ **POS Across Every Branch**
~10 cafés on Odoo POS, drink recipes deducting stock per cup.
- ✓ **Salla ↔ Odoo Integration**
qafcoffee.com stays live on Salla, synced in real time with Odoo stock, pricing and ZATCA invoicing.
- ✓ **Wholesale & Franchise**
B2B customer portal, plus 9% loyalty billing for franchisees.
- ✓ **ZATCA Phase 2**
Compliant e-invoicing live on every POS and the website from day one.
- ✓ **HR & Saudi Payroll**
Shift planning, attendance, GOSI and WPS/Mudad payroll runs.

OUR COMMITMENT

Code-ox configures Odoo around how Qaf's roastery, counters and warehouse actually run — not a generic template. Every item in this proposal is scoped against your current Odoo instance and Salla site, verified directly.

CREDENTIALS

Why Code-ox

An official Odoo partnership, a team certified on the exact version we're implementing, and a track record with other Saudi F&B operators — not a first attempt at a roastery-to-retail build.

Official Odoo Partner Tier

COFFEE & F&B TRACK RECORD

Code-ox has already delivered Odoo for a **coffee powder & coffee beans trading business**, as well as other multi-location food & beverage operators — projects with the same core needs as Qaf: recipe-driven and batch stock deduction, multi-branch POS, and KSA-compliant invoicing. We're not learning the coffee-trade or F&B playbook on this project.

WHAT SETS THIS ENGAGEMENT APART

✓ Scoped Against Your Real System

Every line item in this proposal was verified against your live Odoo 17 system and the Odoo 19 demo we built, not assumed from a template.

✓ Direct Odoo Partner Support

Silver Partner status gives us a direct escalation channel into Odoo SA for anything beyond standard configuration.

✓ One Accountable Team

ERP, website and integrations delivered by the same team under one contract — no handoff gaps between vendors.

✓ Post-Launch Warranty

90 days of complimentary bug-fix support after go-live, with extended retainers available.

1

SCOPE OF WORK — PART 1 OF 2

Nine Odoo Modules, One System

Modules 1–8 below. Every item runs on Odoo 19 — we upgrade your existing Odoo 17 instance to version 19 as part of this project.

#	MODULE & WHAT'S INCLUDED
01	CRM & Sales Wholesale customer pipeline for cafés, hotels and offices from lead to repeat order · tiered pricelists per customer type · franchise account tracking with automated 9% loyalty billing · quotations through to invoicing.
02	Purchase Supplier records for green coffee and packaging · purchase agreements and reorder points · landed-cost tracking on imported beans (freight, duty, handling).
03	Inventory Multi-location stock across the roastery, central warehouse and ~10 branches · real-time transfers · the full unit-of-measure chain from kg green to roasted, to packs, to 8g dose.
04	Point of Sale Odoo POS live at all ~10 branches · drink recipes that automatically deduct stock per cup · per-branch pricing, offline-capable terminals · customer loyalty points and rewards.
05	Manufacturing Bills of materials for green → roasted → packed coffee · roast yield and moisture-loss tracking (typically 15–20%) · full batch and lot traceability from bean to bag.
06	HR & Employee Management Employee records across ~10 branches and the roastery · shift planning and attendance · company, user roles and access set up by branch and department for all 36 existing users.
07	Payroll Management GOSI-compliant payroll runs · WPS/Mudad wage-protection submissions · Saudi labor law leave and end-of-service calculations.
08	Accounting Full KSA chart of accounts · bank reconciliation · multi-branch P&L · ZATCA Phase 2 compliant invoicing (simplified B2C + cleared B2B, bilingual QR receipts) across every sales channel.

ALSO INCLUDED

Integrations for in-branch POS card terminals so store card payments post straight to Odoo · online payments and courier/delivery stay on Salla for qafcoffee.com, with settlement reconciled into Odoo · **Data sync** — product catalogue, customers and stock kept continuously in sync between Salla and Odoo, plus one-time import of BOMs, opening stock and balances from your current setup. Custom modules move to Odoo.sh hosting; Odoo Online doesn't support them.

9

SCOPE OF WORK — PART 2 OF 2 · MODULE 9

Salla ↔ Odoo Integration

qafcoffee.com stays live on Salla — no rebuild, no downtime, no lost SEO. A two-way integration keeps stock, pricing and orders in sync with Odoo behind the scenes. Everything below is delivered as one module.

#	INTEGRATION COMPONENT & WHAT'S INCLUDED
A	Two-Way Inventory & Product Sync Real-time stock and product sync between Odoo and the existing Salla storefront — qafcoffee.com stays live throughout.
B	Order Sync & Fulfillment Every Salla order automatically creates a sales order, delivery and ZATCA invoice in Odoo.
C	Payment Reconciliation Salla settlement and payout data reconciled against Odoo accounting.
D	QA & Go-Live Parallel testing against real Salla orders before cutover to live two-way sync.

HOW THIS OPTION WORKS

qafcoffee.com stays on Salla exactly as it is today. Odoo becomes the connected back-end for stock, pricing and ZATCA invoicing, kept in sync in real time rather than replacing the storefront.

RECOMMENDATION — ONE PLATFORM

Qaf currently runs HR & payroll on Jisr. As Odoo HR & Payroll (GOSI, WPS/Mudad-ready) is included in this build alongside POS, inventory, manufacturing and accounting, we recommend a **phased migration off Jisr onto Odoo** — moving the team across comfortably so the whole business ends up under one umbrella, with a single source of truth.

DELIVERY PLAN

Project Timeline

Seven phases, delivered in sequence over an indicative **30–35 working days** from kickoff, so Qaf can review and sign off at each stage.

#	STAGE	DURATION
00	Discovery & Design Workshops to confirm branch list, processes and fulfillment rules.	Days 1–4
01	Foundation & Finance Odoo 17 → 19 upgrade, Odoo.sh migration, company setup, accounting, ZATCA Phase 2.	Days 5–8
02	Roastery & Inventory Purchase, landed costs, roasting/packing BOMs, warehouses.	Days 9–13
03	Café POS Rollout All ~10 branches live, menu rebuild, terminals, receipts.	Days 14–18
04	Salla ↔ Odoo Integration Two-way sync build, checkout customization, courier mapping.	Days 19–24
05	Wholesale & Franchise B2B portal, franchise ordering, loyalty billing.	Days 25–29
06	HR & Payroll Employees, shifts, attendance, KSA payroll live.	Days 30–33
	Indicative Total	30–35 Days

Phases may overlap where dependencies allow; day counts are indicative estimates based on comparable full-ERP builds.

HOW WE'LL SET THE SCHEDULE

Exact calendar dates for each phase are confirmed during Discovery, once we've verified your branch list, data readiness, and team availability for training and sign-off. That schedule becomes part of the Statement of Work issued after this quotation is signed. Payment milestones for each phase are set out separately on the Investment page.

FINANCIALS

Investment & Payment Schedule

DELIVERABLE	CATEGORY	AMOUNT (SAR)
FULL ODOO IMPLEMENTATION — 9 MODULES		
1. CRM & Sales	Development	Included
2. Purchase	Development	Included
3. Inventory	Development	Included
4. Point of Sale — All ~10 Branches	Development	Included
5. Manufacturing — Roastery	Development	Included
6. HR & Employee Management	Development	Included
7. Payroll Management — GOSI, WPS/Mudad	Development	Included
8. Accounting — incl. ZATCA Phase 2	Integration	Included
9. Salla ↔ Odoo Integration, 4 Components	Integration	Included
POS Card Terminal Integration	Integration	Included
Training, UAT Support & Go-Live	QA & Launch	Included
Project Total		70,000
Total Investment	Exclusive of VAT	SAR 70,000

MILESTONE	TRIGGER	AMOUNT (SAR)
Advance (40%)	Upon sign-off and commencement	28,000
After UAT (40%)	User acceptance testing complete across all 9 modules	28,000
After Go-Live (20%)	Full production go-live, all branches live	14,000
Project Total		70,000

* All amounts are exclusive of VAT. VAT (15%) will be added to each invoice as per KSA regulations.

POST-LAUNCH

Support, Maintenance & Add-Ons

Annual Maintenance Contract (AMC)

SAR 20,000 / year

Optional and renewable · billed annually, exclusive of VAT · begins after the 90-day complimentary post-launch warranty.

INCLUDED IN THE AMC

NOT INCLUDED

- Bug fixes & defect resolution
- Odoo security patches & minor version updates
- Minor configuration, report & template changes
- Salla ↔ Odoo integration monitoring & upkeep
- Priority support channel (email & phone)
- System performance monitoring & health checks
- Silver Partner escalation into Odoo SA when needed

- New features & custom requirements
- Additional branch rollouts
- New integrations & major redesigns
- Odoo licences, hosting, gateway & SMS costs

Custom Development & Features

USD 50 / hour (≈ SAR 190)

Any work beyond the agreed scope is delivered on a time-and-materials basis at the rate above — each request estimated and agreed in writing before work begins:

- New features & functionality
- Custom modules & workflow automation
- Custom reports & dashboards
- Additional branch rollouts
- Third-party & API integrations beyond scope
- UI/UX customisations & change requests
- Data imports & one-off migrations
- Training beyond the included sessions

Integrations — Payments & Delivery

Included in the project fee. Odoo's built-in connectors work out of the box; on top of those we integrate the local providers listed below. Only integrations beyond the counts shown are chargeable, at the Custom Development rate above.

Payment gateways

Odoo default: Stripe, PayPal and other built-in providers.
1 additional (local) included — to accept Mada, Apple Pay and Tabby/Tamara:

- Tap Payments
- and others on request

Delivery

Odoo default: DHL, FedEx and other built-in couriers.
Any 2 of the 3 below included free — orders routed into Odoo:

- SPL (Saudi Post)
- SMSA
- RedBox
- a 3rd courier is quoted separately

Beyond the counts included per category: each further local gateway or courier is scoped, integrated, tested and billed at the rate above.

TERMS & CONDITIONS

General Terms

- **Scope of Work:** Covers the nine modules set out on pages 4–5. Features outside that scope require a separate written agreement and may incur additional charges.
- **Client Responsibilities:** Qaf names one project owner who approves each phase within 5 working days, and provides product lists, recipes, yields, supplier lists, opening balances, and Salla/ZATCA credentials in our templates.
- **Third-Party Costs:** Odoo per-user licence, domain, SSL, POS card-terminal/payment-provider fees, and SMS/notification costs are not included and are Qaf's responsibility. Salla plan, online payment gateway and courier/delivery fees remain on Qaf's Salla account.
- **Intellectual Property:** Upon full payment, all custom code and configuration become Qaf's exclusive property. Odoo platform code remains subject to its own licence.
- **Revisions, Warranty & Maintenance:** Up to two (2) revision rounds per phase. 90 days of complimentary bug-fix warranty post go-live, followed by an optional Annual Maintenance Contract at **SAR 20,000/year** (inclusions set out in Financials).
- **Confidentiality & Law:** Both parties keep this proposal confidential. Governed by the laws of the Kingdom of Saudi Arabia. Valid for **30 days** from issuance.

ASSUMPTIONS & EXCLUSIONS

Key Project Assumptions

- ☐ Migrating off the current Odoo.sh trial database (auto-deletes 17 October 2026) to a permanent production instance is included and is a hard dependency for go-live.
- ☐ Online payments and courier/delivery are handled by Salla on qafcoffee.com and are outside Odoo scope. Any POS card-terminal or payment-provider accounts and their setup are Qaf's responsibility. Domain and hosting are client-provided.
- ☐ qafcoffee.com remains live on Salla throughout and after this engagement. Qaf provides Salla API/webhook access and admin credentials from kickoff — this is a hard dependency for the integration build.
- ☐ This scope was built from the live demo and a backend review, and will be re-verified once fresh Odoo backend credentials are confirmed.

AUTHORIZATION

Acceptance & Authorization

By signing below, both parties confirm acceptance of the scope, price and payment schedule, and authorize commencement of the project. A formal Statement of Work will follow the signed quotation and advance payment.
