Scope

9 Pages · AR/EN

PREPARED FOR

Platin Hotel · Al-Majd Dist., King Abdul-Aziz Road, Yanbu, Madinah Province, KSA. Based on our discovery call and a live audit of platinhotel.com, this proposal is valid for 30 days from the date of issuance.

— OVERVIEW

Executive Summary

Following our discovery call, Platin Hotel is looking to elevate its online presence to match the calibre of its 4-star, 65-suite property — with Ritz-Carlton and Mövenpick named as the visual benchmark. We reviewed platinhotel.com directly and identified the specific gaps holding the current site back from that positioning: a broken, off-brand booking handoff, no working bilingual experience, and a generic template look that undersells the property.

This proposal covers a full redesign — an elegant, photography-led design system, true Arabic/English bilingual support with mirrored RTL layout, and a simple on-brand reservation inquiry flow. No payment gateway is included: guests settle payment directly at the hotel, exactly as requested.

"The destination you'll adore to reside in" — Platin's own words, finally given a website that looks like it.

— WHAT WE WILL DELIVER

✓ Elegant Design System Full-bleed photography, refined typography and a gold/charcoal palette carried from Platin's existing identity — in the register of Ritz-Carlton and Mövenpick.	✓ Full Website Rebuild 9 pages, from homepage to contact, replacing the current single-template layout with a structured, premium experience.
✓ On-Brand Reservation Flow Dates, room type and guest details submitted in one flow — routed to hotel email/WhatsApp for manual confirmation. Replaces today's off-site redirect entirely.	✓ True Bilingual AR/EN Fully mirrored RTL Arabic layout — not a string-swap — with a visible language switcher, matching the standard set by every reference brand named.
✓ WhatsApp Integration Click-to-chat and reservation handoff, so guests and staff can confirm bookings instantly without a payment step.	✓ SEO, QA & Go-Live Hotel schema markup, bilingual SEO structure, cross-device testing and a smooth handover to Platin's team.

OUR COMMITMENT

Code-ox Technologies will deliver a website that finally matches the standard of a 4-star property — elegant, fast, bilingual, and simple for hotel staff to run, with no unnecessary complexity added around payment.

Where the Current Site Falls Short

We reviewed the live site directly rather than assuming. The current build has good bones — real photography, a clear amenities list, a defined suite range — but several gaps are actively working against the premium positioning Platin Hotel wants. These are normal maturing steps for a site built on an earlier template, and every one of them is directly addressed in the redesign.

MOST URGENT FINDING

The "BOOK NOW" button does not lead to a Platin Hotel experience at all — it redirects to an unbranded third-party engine (**booking.staygrid.com**, "Powered by Hotelogix"): a generic blue template with no logo, no photography, and no visual connection to the hotel. For the single most important action on the site, guests land somewhere that looks nothing like a 4-star property.

AREA	CURRENT EXPERIENCE	REDESIGNED EXPERIENCE
Booking	— "Book Now" exits the site to an unbranded, unstyled third-party booking engine — no trust continuity.	— On-page reservation inquiry widget in Platin's own design; guest never leaves the site.
Bilingual	— Nav items are hardcoded "Home (EN)", "Contact (EN)" — a language switcher that was never finished. No Arabic version exists.	— Full Arabic/English site with true mirrored RTL layout and a working language switcher.
Visual Identity	— Boxy sections, flat mauve/tan color blocks, generic system fonts — reads as a stock template.	— Full-bleed cinematic photography, refined typography, restrained gold/charcoal palette in the register of Ritz-Carlton and Mövenpick.
Photography	— One recycled room photo reused across multiple sections; no gallery.	— Curated photography plan per suite category, facility and dining space — with a shoot brief if new photos are needed.
Call to Action	— A single small "Book Now" button buried mid-page; no persistent reservation prompt.	— A floating, always-visible reservation widget on the hero, matching how every reference brand surfaces booking.
Suite Presentation	— Suite categories listed as plain paragraphs with no visual comparison.	— Structured suite cards with imagery, amenities and rate, side by side for easy comparison.

WHY THIS MATTERS

None of this reflects badly on the hotel itself — it reflects a site that was never finished to the standard the property now wants to compete at. Closing these six gaps is what turns platinhotel.com into a site guests trust enough to book directly, instead of bouncing to an OTA.

— DIRECTION

Design Direction — Referencing Ritz-Carlton & Mövenpick

We reviewed both reference brands live to extract the specific patterns that read as "premium" rather than describe them in the abstract. Both share one structural idea worth borrowing directly: a full-bleed photographic hero with the reservation widget floating on top of it — never a separate, disconnected booking page.

Ritz-Carlton pattern

Full-bleed dark hero imagery, a refined serif wordmark, a destination/date search bar floating directly on the hero, minimal top navigation, generous whitespace throughout.

Mövenpick pattern

Warm lifestyle photography as the hero, gold/cream accents on white, a "Find a hotel" search card overlapping the image, clean sans-serif navigation, visible language switcher.

— PROPOSED PALETTE — BUILT ON PLATIN'S EXISTING GOLD IDENTITY

CHARCOAL
#14110E

PLATIN GOLD
#C9A24B

WARM IVORY
#F4EFE6

DEEP BRONZE
#3A3227

— YOUR OWN PHOTOGRAPHY, ELEVATED

Entrance — hero photography

Suite — gallery photography

Corridor — editorial crop

NO RESHOOT REQUIRED

These are Platin's existing photographs — the redesign doesn't need new imagery to look like a different hotel. Full-bleed crops, consistent color grading and generous whitespace do the work.

— DIRECTION APPLIED TO PLATIN HOTEL

- ☐ Homepage hero: full-bleed photo or slow-motion video loop of the property, reservation widget floating on top — not a separate page.
- ☐ Typography pairs a refined display serif for headings with a clean sans-serif for body text, mirroring the restraint both reference brands use.
- ☐ Platin's existing gold logo mark is carried through as the accent color rather than replaced — the redesign elevates the brand, it doesn't reinvent it.
- ☐ Language switcher placed top-right in the nav, exactly where both Ritz-Carlton and Mövenpick surface it.
- ☐ Suite categories presented as an editorial gallery grid rather than plain text blocks, with a comparison-friendly layout.

1

SECTION 1

Scope of Work — Design & Core Pages

#

MODULE / DELIVERABLE & SCOPE DESCRIPTION

- 01

UI/UX Design System

Elegant premium design system — typography, gold/charcoal palette, hero treatment, component library. Bilingual (AR/EN) layouts, mobile-first.
- 02

Home Page

Full-bleed hero photography/video, floating on-brand reservation widget, amenities highlight strip, suite teaser gallery, guest reviews, location teaser.
- 03

Suites & Accommodation

Full room category gallery with comparison cards — Junior Suite, Deluxe Suite Twin, Deluxe King — amenities per suite, rate display, "Enquire to Book" CTA.
- 04

Facilities & Services

Fitness centre, pool, spa, 24-hour concierge — presented as an elegant icon-and-photo grid, not a text list.
- 05

Cafe & Restaurant

Imagery-led dining page showcasing the café/restaurant experience.
- 06

Meetings & Events

Wedding hall and meeting room presentation, capacity details, dedicated enquiry CTA.
- 07

Nearby Attractions

Yanbu Waterfront, airport distance, transport links — presented as lifestyle content with map context.
- 08

Gallery

Curated photography grid across rooms, facilities and dining — replacing the single recycled photo.
- 09

Contact

Location with embedded map, contact form, phone/email, WhatsApp click-to-chat.

Junior Suite · 410 SR/night

Deluxe Suite Twin · 490 SR/night

Deluxe King Suite · rate on request

CONTINUED ON NEXT PAGE

Reservation flow, bilingual implementation, WhatsApp integration, SEO and QA — plus the complete pricing summary — are on the following pages.

1

SECTION 1 — CONTINUED

Scope of Work — Booking, Bilingual & Integrations

#

MODULE / DELIVERABLE & SCOPE DESCRIPTION

- 10

Reservation Inquiry Flow

Guest selects dates, room type, and submits name/phone/email. Submission routes to hotel email and WhatsApp for manual confirmation by staff. No payment gateway — guest pays at the hotel.
- 11

Bilingual (AR/EN) Implementation

Full Arabic/English site with true mirrored RTL layout (not string-swap), language switcher in navigation.
- 12

WhatsApp Integration

Click-to-chat widget across all pages plus direct reservation handoff for instant back-and-forth confirmation.
- 13

SEO Optimization

On-page SEO, Hotel schema markup, sitemap, robots.txt, bilingual SEO structure, image alt tags.
- 14

Performance Optimization

Image compression, lazy loading, caching, Core Web Vitals tuning for fast load on mobile.
- 15

QA, Testing & Launch

Cross-browser and cross-device QA, staging-to-production deployment, staff walkthrough.

COMPLETE SCOPE

15 Modules

Full pricing and payment schedule on the Investment Summary page

TIMELINE

2 Weeks

from project kickoff

IMPORTANT NOTE

Domain and hosting costs are not included and are borne directly by Platin Hotel. No payment gateway subscription applies, as reservations are confirmed manually and payment is settled at the hotel. The 2-week timeline requires all content and photography to be provided by Platin Hotel on Day 1 of kickoff.

— FINANCIALS

Investment Summary

MILESTONE	TRIGGER	AMOUNT (SAR)
Advance Payment (50%)	Upon proposal sign-off and project commencement	4,000
Final Payment (50%)	Upon UAT completion and website go-live	4,000
		8,000

* All amounts are exclusive of VAT. VAT (15%) will be added to each invoice as per KSA regulations.

— PROJECT TIMELINE

Delivery Plan — 2 Weeks

FAST-TRACK TIMELINE

A 2-week delivery is achievable because the scope excludes a payment gateway and live PMS availability sync — the two items that typically extend a hotel website build. It requires Platin Hotel to hand over all content, rates and photography on Day 1, and to turn around design and content feedback within 24 hours at each checkpoint.

ELEGANT WEBSITE & RESERVATION FLOW

- 1

DAYS 1-2

Kickoff, Content & Design System

 - Kickoff meeting — goals, brand direction and content confirmed; suite details, rates, photography and brand assets collected
 - Elegant design system created — typography, gold/charcoal palette, hero treatment, reservation widget layout
 - Homepage and one interior page designed and sent for approval same day
- 2

DAYS 3-4

Design Sign-Off & Core Build Starts

 - Full design set approved across all 9 pages, including the bilingual RTL layout structure
 - Development begins on homepage, suites, facilities and dining pages in parallel
 - Technical setup — hosting, domain, and reservation routing (email/WhatsApp) confirmed
- 3

DAYS 5-7

Remaining Pages & Reservation Flow

 - Meetings & Events, Nearby Attractions, Gallery and Contact pages built
 - Reservation inquiry flow built and wired to hotel email/WhatsApp
 - WhatsApp click-to-chat integrated across all pages
- 4

DAYS 8-10

Bilingual Implementation & SEO

 - Full RTL/LTR switching implemented — Arabic and English live across all pages
 - Hotel schema markup and bilingual SEO structure applied; Google Analytics and Search Console connected
 - Performance pass — image compression, lazy loading, Core Web Vitals tuning
- 5

DAYS 11-14

QA, Go-Live & Handover

 - Full QA across devices, browsers and both languages, including the reservation flow end to end
 - Production deployment, SSL and DNS configuration
 - Staff walkthrough on managing reservation inquiries and content

— TERMS & CONDITIONS

General Terms

- **Scope of Work:** This proposal covers all design, development, and integration work described. Features outside this scope require a separate written agreement and may incur additional charges.
- **Client Responsibilities:** Platin Hotel agrees to provide content (text, images, rates, brand assets) and timely feedback within agreed deadlines. Delays may impact the project timeline.
- **Third-Party Costs:** Hosting and domain registration are not included and remain the client's responsibility.
- **Intellectual Property:** Upon receipt of full payment, all custom code and design deliverables become the exclusive property of Platin Hotel. Third-party libraries remain subject to their respective licences.
- **Revisions:** The design phase includes up to two (2) rounds of revisions. Additional rounds are charged separately at an agreed rate.
- **Warranty:** Code-ox Technologies provides 30 days of complimentary bug-fix warranty post go-live. Extended support retainers are available on request.
- **Confidentiality:** Both parties agree to keep the contents of this proposal confidential without prior written consent.
- **Governing Law:** This agreement is governed by the laws of the Kingdom of Saudi Arabia.

A

ASSUMPTIONS & EXCLUSIONS

Key Project Assumptions

- ☐ Client will provide written content (Arabic & English), suite photography, rates, and brand assets within **5 business days** of kickoff.
- ☐ Domain and hosting are **client-provided**. Code-ox provides deployment support only; hosting costs are not included.
- ☐ No online payment gateway is included — reservations are confirmed manually and guests pay directly at the hotel, per the agreed model.
- ☐ Live availability/inventory syncing with a PMS or channel manager is **out of scope** and available as a future phase.
- ☐ Professional photography, if commissioned, is a separate cost and not included in this quotation.

— AUTHORIZATION

Acceptance & Authorization

By signing below, both parties confirm acceptance of this proposal and authorize the commencement of the project under the terms, scope, and payment schedule set out above. A formal Statement of Work will be issued following receipt of the signed proposal and the 50% advance payment.
