

FINANCIAL PROPOSAL · 4 OCTOBER 2026

Odoo 19 Upgrade & Urban Eats Implementation on One Odoo Foundation

Fixed pricing for the complete Odoo 18 → 19 upgrade and the Urban Eats / MYLK implementation — central kitchen, POS and Kitchen Display, delivery platforms, payments, ZATCA and the move off Foodics — with go-live on 1 January 2027.

Odoo 18 → 19 Full Upgrade

Central Kitchen Manufacturing

POS + Kitchen Display

3 Delivery Platforms

Foodics → Odoo

ZATCA Phase 2

Go-live 1 Jan 2027

OFFICIAL ODOO PARTNERSHIP

Delivered by a Certified Odoo Silver Partner

Code-ox Technologies holds official Odoo Silver Partner status — authorised to sell, implement, configure and support Odoo ERP deployments, with direct access to Odoo's partner support channels.

OVERVIEW

Pricing at a Glance

This proposal follows our response to your detailed review and prices the two pieces of work as fixed amounts. **Part 1** is the complete Odoo 18 → 19 upgrade. **Part 2** is the Urban Eats / MYLK implementation, offered in two options that differ only in how the delivery platforms are connected. Everything else in Part 2 is identical in both options.

1

PART 1 · FIXED PRICE

Full Odoo 18 → 19 Upgrade

SAR 4,950
excl. VAT**Studio customisations — SAR 2,700**

Custom fields, views, reports, automations, server actions and access rules.

Third-party modules — SAR 2,250

Review, migration and testing of the third-party modules you shared with us.

2

PART 2 · CHOOSE ONE OPTION

Urban Eats / MYLK Implementation

OPTION A

Direct Platform Integration

SAR 40,000 excl. VAT

- Code-ox builds the connectors for **HungerStation, Keeta and Jahez (incl. Noon)** — code owned by Tara Holding.
- Additional delivery platforms: **SAR 1,000 each**.
- No per-branch middleware fee.

OPTION B

Integration via UrbanPiper

SAR 35,000 excl. VAT

- Delivery platforms connected to Odoo through **UrbanPiper** middleware.
- Plus UrbanPiper subscription of approx. **SAR 1,700–1,900 per branch**, paid to UrbanPiper — final price confirmed through Odoo.

INCLUDED IN BOTH OPTIONS

Urban Eats structure, shared operations, product master & procurement, central kitchen manufacturing, Restaurant POS & Kitchen Display, settlement reporting, Foodics migration & archive, WhatsApp, Paymob, Tabby & Tamara, POS terminal integration, ZATCA Phase 2, training, go-live and 6 months of support.

SCOPE OF WORK

Upgrade & Operational Foundation

#	WORKSTREAM	WHAT'S INCLUDED
01	Odoo 18 → 19 Upgrade Part 1	Written assessment before work starts — compatibility issues, replacement modules or licences, exclusions and third-party vendor costs. Full backup, complete upgrade on a staging copy, data checks and functional testing. Studio customisations and the shared third-party modules migrated; a module with no Odoo 19 version is migrated or a replacement proposed — nothing removed without your written approval. Production upgraded outside working hours after your sign-off, with post-go-live support.
02	Standard Odoo First Applies to all work	Standard > Configuration > Studio > Supported module > Custom development only when necessary. Every custom item comes with a short written justification and your approval; custom code sits in separate, upgrade-safe, documented modules in a repository owned by Tara Holding.
03	Urban Eats Structure Architecture document for approval	Existing companies kept as they are. Urban Eats as one company (one CR, one VAT number, one set of accounts). Brand , Branch and Channel reporting dimensions — each brand with its own POS categories, menus, pricelists and website; one warehouse and one POS per outlet. P&L by brand, branch and channel. Includes the one small, documented module that tags POS sales by brand and branch.
04	Shared Operations	Main Warehouse receiving all supplier deliveries; Central Kitchen as its own warehouse; outlets resupplied automatically through standard routes and minimum stock rules. Shared finance with "Urban Eats Shared" cost tagging and optional brand allocation. B2B orders fulfilled from Main Warehouse or Central Kitchen. Access rules: central team sees everything, outlet staff see only their own POS and warehouse.
05	Product Master, Procurement & Inventory	One generic material per ingredient used in all recipes; supplier products as vendor lines with code, pack size and price, converted automatically on receipt; supplier barcodes on purchased packs only. Product types and an agreed coding scheme. Minimum stock rules at Main Warehouse, Central Kitchen and outlets, with lot and expiry tracking where needed. Production cost from materials (labour and overhead optional); waste recorded with a reason.
06	Central Kitchen Manufacturing	Demand plus minimum stock > daily production plan > manufacturing orders > automatic ingredient consumption > stock > transfers to outlets. Make-to-stock, make-to-order and no-carry-over items (expiry-dated, leftovers listed for daily disposal). One simple "what to make today" screen for kitchen staff. Outlets use recipe kits, so each POS sale deducts its ingredients from that outlet's stock.

SCOPE OF WORK

Sales Channels, Compliance & Go-Live

#	WORKSTREAM	WHAT'S INCLUDED
07	Restaurant POS & Kitchen Display	Odoo Restaurant POS for each branch and brand — menu, modifiers, combos, prices, taxes, payment methods and receipts. Odoo Kitchen Display for each branch, routed by station.
08	Delivery Platforms Option A: direct · Option B: UrbanPiper	HungerStation, Keeta and Jahez (incl. Noon), structured Brand > Branch > Platform Store > POS / Kitchen so a new branch or brand is added by configuration. Menu sync, stock and sold-out sync, order status updates back to each platform, failure and retry handling, multiple branches and store IDs. A detailed integration plan per platform is shared before build.
09	Settlement & Reconciliation	Reconciliation and reporting of gross sales, commissions, VAT on commissions, promotions, refunds, cancellations, adjustments and penalties, delivery charges and net payouts against Odoo, where the platform provides the data. The level of automation is confirmed in the separate settlement plan, following Odoo's official response.
10	Foodics Migration & Archive	Menus, categories, products, modifiers and customers migrated per brand; opening stock from a physical count at cutover. Sales, payment, discount, refund and inventory history archived in open formats on storage under your control — exported once before cutover and again after the last Foodics transaction.
11	WhatsApp	Standard Odoo Enterprise WhatsApp app with Meta-approved templates for receipts, order confirmations and customer messages, sent automatically where possible. Kitchen and delivery status messages reviewed with you case by case before anything is built.
12	Payments	Paymob online payments (Mada, Visa/Mastercard, Apple Pay as enabled on your account). Tabby and Tamara integration built by Code-ox. POS terminal integration for Geidea, NearPay and Paymob — Odoo 19 availability confirmed before you commit. Orders marked paid only on terminal or gateway confirmation; refunds to the original method where supported; failed payments retried or switched; all tested in UAT.
13	ZATCA Phase 2	Company, VAT, CR and address set up; each POS with its own invoice journal onboarded with ZATCA; compliance tests and switch to production just before go-live; one-tap default customer for walk-in sales; staff trained and ZATCA issues supported after go-live.
14	UAT, Training & Go-Live	Production-ready UAT environment on staging, UAT, training, data checks, fixes and a cutover rehearsal while Foodics stays live. Production go-live outside working hours, followed by 6 months of support under the SLA on page 8.

SOURCE CODE & OWNERSHIP

Tara Holding owns all custom code, held in your own repository with access granted to Code-ox — complete source, deployment instructions, migration scripts and technical, integration/API and configuration documentation. No dependency on any Code-ox proprietary licence. Third-party modules remain with their vendors.

DELIVERY PLATFORMS

Direct Integration vs UrbanPiper

Everything else in Part 2 is the same in both options. This is the only difference.

CRITERION	OPTION A — DIRECT	OPTION B — URBANPIPER
How it connects	Code-ox connectors per platform, inside your Odoo, in your repository.	Odoo's standard, built-in UrbanPiper integration, configured by Code-ox.
Platforms	HungerStation, Keeta and Jahez (incl. Noon) included. The Chefz, ToYou, Ninja and others: SAR 1,000 each, subject to each platform's API.	KSA platform coverage confirmed in writing by Odoo / UrbanPiper before you select this option.
Orders, POS & Kitchen Display	Orders received straight into Odoo POS and routed to Kitchen Display — no tablets, no re-keying — in both options.	
Menu, price, sold-out & status sync	Built per platform to the extent each platform's API allows, including cancellations and rejected orders.	Through UrbanPiper's sync; coverage per platform confirmed by Odoo / UrbanPiper.
Brands, branches & store IDs	Brand > Branch > Platform Store > POS / Kitchen — a new brand, branch or store ID is added by configuration, without redevelopment, in both options.	
Settlement & reporting	Reporting by platform, brand and branch in both; reconciliation per the settlement plan.	
Code & Odoo upgrades	Custom code owned by Tara Holding; re-validated by Code-ox at each Odoo upgrade.	Standard Odoo — no custom code in the aggregator layer; maintained by Odoo.
Platform API changes	Minor changes included during the 6-month support, then under AMC.	Handled by UrbanPiper / Odoo.
Code-ox track record	HungerStation–Odoo integration delivered for an existing client; the others built for Tara Holding.	Standard Odoo feature; Code-ox configures and tests.
One-time cost	SAR 40,000	SAR 35,000
Recurring cost	No per-branch middleware fee.	Approx. SAR 1,700–1,900 per branch, paid through Odoo. Billing period, setup fees and any per-platform charges confirmed by Odoo before signing.

CODE-OX RECOMMENDATION

Option B — UrbanPiper, provided Odoo confirms it covers your required platforms in KSA. It is standard Odoo, keeps custom code out of the aggregator layer and is carried forward by Odoo through future upgrades — in line with your standard-first principle. **Option A** is the better choice if a required platform is not covered, or if the per-branch fee across your planned branches outweighs the one-time saving.

API ACCESS — EITHER OPTION

Each platform issues the integration credentials for your account. We need your aggregator / store IDs per branch, an authorisation letter for us to contact each platform on your behalf, and your account contact at each platform. Approvals sit with the platforms.

DELIVERY PLAN

Weekly Plan to 1 January 2027

Based on kick-off by mid-October 2026. Workstreams overlap where dependencies allow, and Foodics data preparation runs in parallel throughout.

WINDOW	ACTIVITIES	MILESTONE
11 – 22 Oct Weeks 1–2	Kick-off; access and data handed over; written upgrade assessment; Urban Eats architecture document shared for approval.	Assessment & architecture approved
18 Oct – 5 Nov Weeks 2–4	Backup and complete Odoo 19 upgrade on staging; Studio customisations and third-party modules migrated; data checks and functional testing.	Upgrade signed off on staging
25 Oct – 12 Nov Weeks 3–5	Urban Eats company, dimensions, warehouses and routes; access rules; product master, coding scheme, vendor lines and minimum stock rules.	Foundation configured
8 – 26 Nov Weeks 5–7	Central kitchen manufacturing, recipes and recipe kits, production plan screen, expiry and waste handling.	Kitchen flow ready
8 Nov – 30 Nov Weeks 5–8	Restaurant POS and Kitchen Display per branch; payments (Paymob, Tabby, Tamara, terminals); ZATCA compliance setup; WhatsApp templates.	POS & payments ready
15 Nov – 30 Nov Weeks 6–8	Delivery platform connections (direct or UrbanPiper); menu, stock and status sync; settlement reporting — subject to platform approvals.	Platforms connected in test
1 – 3 Dec Week 8	Internal technical testing complete; production-ready UAT environment available on staging.	UAT environment live
6 – 24 Dec Weeks 9–11	UAT, staff training, data checks and fixes. Foodics stays live.	UAT acceptance
27 – 31 Dec Week 12	Cutover rehearsal, ZATCA production onboarding, physical stock count, final Foodics export.	Ready for cutover
1 Jan 2027 Go-live	Production upgrade and cutover outside working hours; no new transactions on Foodics. Six months of support begins.	Go-live acceptance

CONDITIONS FOR THE 1 JANUARY DATE

Signed agreement and kick-off by mid-October; access and data provided within 5 business days of kick-off; timely UAT feedback; delivery platform approvals, which are outside Code-ox's control.

FINANCIALS

Investment & Payment

DELIVERABLE	AMOUNT (SAR)
PART 1 — FULL ODOO 18 → 19 UPGRADE	
Studio customisations, custom fields, views, reports, automations, server actions & access rules	2,700
Third-party modules — review, migration & testing	2,250
Part 1 Total — fixed	SAR 4,950
PART 2 — URBAN EATS / MYLK IMPLEMENTATION (SELECT ONE OPTION)	
Option A — Direct platform integration (HungerStation, Keeta, Jahez incl. Noon)	40,000
Option B — Integration via UrbanPiper (UrbanPiper subscription billed separately)	35,000
Each additional delivery platform (Option A)	1,000 each

* All amounts are exclusive of VAT. VAT (15%) is added to each invoice as per KSA regulations.

PAYMENT SCHEDULE

MILESTONE	PART 1	OPTION A	OPTION B
Advance (40%) — on signing & kick-off	1,980	16,000	14,000
UAT acceptance (30%) — UAT environment accepted Part 1: upgrade signed off on staging	1,485	12,000	10,500
Go-live acceptance (30%) — production live	1,485	12,000	10,500
Total	4,950	40,000	35,000

THIRD-PARTY & RECURRING COSTS — NOT INCLUDED ABOVE

ITEM	BASIS
Odoo Enterprise subscription	Your existing Odoo subscription; please register Code-ox as implementation partner.
UrbanPiper (Option B only)	Approx. SAR 1,700–1,900 per branch, paid to UrbanPiper; final price confirmed through Odoo.
WhatsApp messages	Meta's message charges, paid directly to Meta. No third-party provider (BSP) expected.
Payment providers	Paymob, Tabby, Tamara and terminal provider fees, paid directly to each provider.
Third-party module licences	Listed in the written upgrade assessment before work starts and arranged by Code-ox directly with the vendors.

SUPPORT & SLA

6 Months Support — Included

PRIORITY	RESPONSE	FIX / WORKAROUND
Critical POS, payment, platform, order sync or ZATCA down	1 hour, 7 days a week, by phone or WhatsApp	4 hours, including Friday and Saturday
High	4 hours	1 business day
Normal	1 business day	3 business days

Standard hours Sunday–Thursday, 9:00–18:00 Riyadh time. Third-party issues get the same response times and are escalated to the provider. Minor API changes needed to keep our delivered platform and payment integrations working are included during the support period; a major change or full API replacement is estimated and agreed first. Vendor updates to third-party modules are applied and tested. After six months, support continues under an AMC with defined SLAs.

ACCEPTANCE CRITERIA

- **Upgrade:** all agreed business flows pass functional testing on staging and Tara Holding signs off before production is touched.
- **UAT:** the agreed UAT scenarios pass on staging with no open Critical or High issues.
- **Go-live:** production live on Odoo 19, POS selling, ZATCA invoices accepted, and orders flowing in from the connected platforms — with any remaining Normal issues listed and scheduled.

TERMS

- **Change management:** any genuine scope change is raised before work starts, with approach, effort, timeline and cost — nothing proceeds without your approval.
- **Client inputs:** Odoo.sh, staging and GitHub access; product list, supplier items and recipes; kitchen ordering and shelf lives; Foodics export authorisation; brand and branch list; verified WhatsApp Business account; terminal brand per branch; Fatoora portal access.
- **Platform access:** delivery platform partner / API approvals are granted by each platform and sit outside Code-ox's control.
- **Validity & law:** this proposal is valid for 30 days and is governed by the laws of the Kingdom of Saudi Arabia. Both parties keep its contents confidential.

AUTHORIZATION

Acceptance & Authorization

By signing below, both parties confirm acceptance of this financial proposal for the selected items and authorize the commencement of the project under the scope, timeline and payment schedule set out above. All amounts are exclusive of VAT.
