Partnership Proposal · Revision 2 · October 2026

Odoo ERP for WeCare Technology

Four Options, Every Cost Shown

Prepared for our partners in Riyadh. One connected system for CRM, Sales, Purchase, Inventory, Project and Accounting, plus employee self-service for the whole team. There are four ways to set it up. Each one shows what it costs to build, what it costs to run every year, and who you pay.

4 Options | **50–60** Staff | Employee **Self-Service** | VAT Invoices with **QR Code** | Server in **Riyadh** | **6 Months** Support Included

Official Odoo Partnership

Delivered by a Certified Odoo Silver Partner

Code-ox Technologies holds official Odoo Silver Partner status. We are authorised to sell, implement, configure and support Odoo ERP, with direct access to Odoo's partner support channels.

CX-WCT-2026-01 Rev. 2	11 October 2026	SAR (Saudi Riyal)	Code-ox Technologies

Overview

Executive Summary

WeCare Technology has supported Code-ox in Riyadh from the start, so we have written this the way we would want a partner to write it for us. Every riyal is shown, including the money that goes to Odoo and to the server provider, not to us.

This revision brings together everything we have discussed since our first quotation. It brings **the whole WeCare team of 50–60** into one system, from the office to every employee applying for leave, and it reflects **Odoo's updated pricing** for this year. It gives you four options, from the original set-up to a version with **no user licences at all**.

50–60
Staff to bring into one system: office, project/site and sales teams

6 modules
CRM, Sales, Purchase, Inventory, Project and Accounting with VAT invoicing, the same in every option

The four options at a glance

Option	Licences WeCare pays for (60 staff)	Build cost & timeline	Odoo licences per year*
1 · Full ERP + Employee Self-Service All staff can apply for leave, claim expenses and record attendance	5 full users 55 users free	SAR 16,000 30 working days	≈ SAR 7,200
2 · Option 1 + Project Access for Staff All staff users update project tasks and log timesheets	5 full users 55 users free, with Project access	SAR 18,000 33 working days	≈ SAR 7,200
3 · Option 2 + Sales Access for Staff Staff users also create and update quotations	5 full users 55 users free, with Project + Sales access	SAR 19,500 36 working days	≈ SAR 7,200
4 · Everything, on Odoo Community Recommended Everything in Option 3, for every member of staff, with no user licences	**No licences, for any number of users**	SAR 22,000 41 working days	**SAR 0**

* Odoo's standard rate from Year 2. Year 1 is slightly lower because of Odoo's first-year discount. All four options also need a server in Riyadh, from about SAR 1,247 a year depending on usage. Full workings are on the Cost Comparison page.

Our recommendation: Option 4

As our partners, **Code-ox covers the Odoo Light User licences for all of WeCare's staff**, so in Options 1–3 WeCare pays only for the 5 full users (≈ SAR 7,200 a year). Option 4 still costs the least overall. It has no licences at all, and over three years it costs **≈ SAR 25,740 in total**, against ≈ SAR 39,877–43,377 for Options 1–3. Every new hire, office staff included, joins at no extra cost.

For the Accounts Team

How Odoo charges for users

Odoo comes in two editions. **Odoo Enterprise** (Options 1–3) is paid per user, every year, directly to Odoo. **Odoo Community** (Option 4) is open-source and has no user fees. On Enterprise, every person in the system falls into one of the user types below.

User type	Who it is for	What they can do	Price per person
Full user Enterprise · Custom plan	Anyone who works in the system: sales, purchasing, stores, accounts, projects, timesheets	Everything their role allows, in every app	$25.50/mo Year 1 $32.00/mo after ≈ SAR 1,148 / 1,440 a year
Light User Enterprise	Employees who only need self-service	Standard: their own time off, expenses, attendance and appraisals; view payslips. Projects, timesheets and quotations are **not included as standard**, so Code-ox extends access in Options 2–3.	$5.90/mo ≈ SAR 266 a year **Covered by Code-ox**
Portal user Enterprise & Community	**Outside people only**: customers and suppliers	See and pay their invoices, accept quotations, follow their orders	Free
Community user Option 4	Anyone at WeCare	Everything their role allows in the Community apps	**Free** no licence

Prices are Odoo's official Saudi Arabia list prices (odoo.com/pricing, checked 11 October 2026), billed in US$ (SAR at 3.75). The Year 1 discount applies only to the users ordered at the start. Light User licences are arranged through an Odoo advisor, who confirms the final quote.

Three rules from Odoo's Enterprise agreement that shape these options

- **The portal is for outside people.** Odoo keeps free portal accounts for *"external people"* such as customers and suppliers. Staff accounts are licensed separately.
- **Every employee record counts.** The agreement treats *"any active employee record … not linked to an active non-portal user account"* as a Light User. So once 60 staff are in Odoo's Employees app, Odoo bills at least 60 users.
- **User numbers are updated automatically.** The software reports user numbers to Odoo, and any users added during the year are billed at list price for the rest of the subscription.

What this means for WeCare

Leave, expenses and attendance fit within the standard Light User licence (Option 1). For Options 2 and 3, **Code-ox extends Light User access with a custom module**, so staff users can work in Project, Timesheets and Sales **without buying full licences**. **Code-ox pays the Light User licences for all staff**, so in all three Enterprise options WeCare pays only for the 5 full users. Please note that this extended access goes beyond Odoo's standard Light User, and Odoo counts anyone who logs timesheets as a paying user. If Odoo reviews the subscription, it may ask for these users to be upgraded to full licences. The cost of that is shown on the Cost Comparison page. Option 4 avoids the question entirely, because Community has no user licences.

1 Included in all four options

Scope of Work — CRM, Sales & Purchase

6	24	50–60	1	QR	BOQ
Modules	Features Configured	Staff	Fresh Instance	VAT Invoices	Quotation Ready

#	Module / Feature & Scope Description
CRM	
01	**Lead & Opportunity Pipeline** Every tender and RFQ tracked from first contact through award, replacing scattered emails and spreadsheets.
02	**Client, Consultant & Vendor Contacts** Centralized database of consultants, main contractors, and equipment vendors WeCare deals with.
03	**Tender & BOQ Document Versioning** Tender documents, drawings, and BOQ revisions attached and versioned against each opportunity — no more rebuilding submissions from memory or SharePoint.
04	**Pipeline Reporting & Forecasting** Win-rate, pipeline value, and forecast visibility by project type — CCTV, ELV, MEP, and beyond.
Sales	
05	**BOQ-Style Quotation Management** Line-item quotations that mirror BOQ structure, converted to confirmed orders with approval rules built in.
06	**Price Lists Linked to Vendor Cost** Sales prices tied to the latest vendor costs from Purchase, so margins stay accurate as vendor pricing changes.
07	**Quotation Revision Control** Every BOQ/price revision versioned and comparable — closing the untracked-revisions gap for good.
08	**Sales Order → Invoice Flow** Confirmed orders drive invoicing automatically, tied to project milestones.
Purchase	
09	**Vendor RFQ & Price Comparison** Request and compare quotes from multiple equipment vendors in one place — no more scattered vendor prices across emails.
10	**Vendor Price List Management** Every vendor's latest pricing stored centrally and versioned, always current for quoting.
11	**Purchase Order & Vendor Bill Matching** Purchase order, receipt, and vendor bill matched automatically before payment.
12	**Purchase Approval Workflows** Multi-level approval on purchase orders above defined value thresholds.

Why This Approach

CRM, Sales, and Purchase are configured as one connected flow — a tender becomes an opportunity, an opportunity becomes a BOQ-style quotation, and vendor pricing feeds straight into your margins. No more rebuilding submissions from memory or spreadsheets.

1

Included in all four options — continued

Scope of Work — Inventory, Project & Accounting

#	Module / Feature & Scope Description
Inventory	
13	**Multi-Location Stock (Warehouse & Site)** Equipment and materials tracked across warehouse and active job sites.
14	**Serial/Lot Tracking for Equipment** Cameras and ELV/MEP equipment tracked by serial number for warranty and maintenance history.
15	**Stock Reservation Against Projects** Materials earmarked to specific projects before installation, avoiding cross-site mix-ups.
16	**Real-Time Stock Valuation** Live stock value and quantity on hand, synced with Accounting automatically.
Project	
17	**Project & Task Management per Site** Every installation/commissioning job tracked as a project with tasks, milestones, and assigned engineers.
18	**Timesheets & Resource Allocation** Engineer time logged against projects for cost tracking and utilization.
19	**Project Profitability Tracking** Real cost — materials plus labor — tracked against quoted BOQ value, visible per project.
20	**Milestone-Based Project Invoicing** Clients invoiced as project milestones complete, tied directly to Sales.
Accounting	
21	**Chart of Accounts & AR/AP** Full bookkeeping with customer and vendor sub-ledgers set up around WeCare Technology's operations.
22	**Bank Reconciliation & VAT Invoicing** Bank statement import and reconciliation, plus VAT invoices with QR code, set up as WeCare issues them today.
23	**Financial Reporting & Dashboards** P&L, balance sheet, cash flow, and aged receivables/payables available live — no manual exports.
24	**Project Cost Consolidation** Project, Purchase, and Inventory costs roll up into one P&L view per project and company-wide.

Why This Approach

Inventory, Project, and Accounting close the loop — stock committed to a project, engineer time logged against it, and every cost rolling up into real project profitability and the company ledger. One instance, one source of truth across every active site.

Who Sees What

Admin / Owner
Full visibility across CRM, Sales, Purchase, Inventory, Project, and Accounting. Approves purchase orders and quotations above threshold, and views project profitability and financial reports company-wide.

Office, Project, Sales & Employees
Office users run purchasing, stores and accounts. All staff apply for leave and, depending on the option, update projects and quotations.

The Options in Detail

Options 1 & 2 · Odoo Enterprise

Every option includes the full ERP scope on the previous two pages. What changes is **who works in which part of the system**. The paid Odoo licences stay the same in Options 1–3: 5 full users, with everyone else on Light Users. The examples use 60 staff, the top of WeCare's 50–60 range: 5 office users on full licences and 55 staff users.

1 Option 1 — Full ERP + Employee Self-Service

SAR 16,000
One-time build · 30 working days

What's included

- The full ERP scope: CRM, Sales, Purchase, Inventory, Project and Accounting with VAT invoicing
- Employees app with all 50–60 staff, departments and reporting managers
- Self-service for every employee: **apply for leave**, see leave balance, submit expense claims, check in and out
- Leave types and approval flow (employee → manager → HR) set up to WeCare's policy
- Expense approvals that flow into Accounting
- Training for office users, plus a one-page self-service guide for staff

Who uses Odoo, and how

Office users (5)	**Full users**
All other staff (55)	**Light Users**
WeCare pays, Year 1 5 full users · 55 users free	**≈ SAR 5,738**
WeCare pays, Year 2 onward 5 full users	**≈ SAR 7,200 / yr**

Good fit if project and sales updates can stay with the office team. Site staff cannot log timesheets or update tasks themselves.

2 Option 2 — Option 1 + Project Access for All Staff

SAR 18,000
One-time build · 33 working days

Everything in Option 1, plus

- **Custom Light User extension by Code-ox**: all 55 staff users stay on the Light User licence but get access to the Project app for **their own tasks, status updates, site notes and photos**
- **Timesheets** entered daily or weekly from a phone, with manager approval
- Task stages that match WeCare's work: survey → installation → testing → commissioning → handover
- Approved hours flow straight into each project's real labour cost and profitability
- Project dashboards for managers: progress, hours, cost against BOQ

Who uses Odoo, and how

Office users (5)	**Full users**
All other staff (55)	**Staff users + Project**
WeCare pays, Year 1 5 full users · 55 users free	**≈ SAR 5,738**
WeCare pays, Year 2 onward 5 full users	**≈ SAR 7,200 / yr**

Good fit if you want each project's real labour cost tracked without adding a single full licence.

Extended Light User access is a Code-ox customisation, not a standard Odoo licence type. See "How Odoo charges for users" and the Cost Comparison page for what happens if Odoo asks for these users to be upgraded to full licences.

The Options in Detail

Option 3 · Enterprise and Option 4 · Community

3 Option 3
Option 2 + Sales Access for All Staff

SAR 19,500
One-time build · 36 working days

Everything in Option 2, plus

- **Custom Light User extension by Code-ox**: all staff users also get access to CRM and Sales for **their own pipeline, creating and updating quotations** and BOQ revisions
- Ready-made quotation templates for CCTV, ELV and MEP work
- Discount limits: quotations above a set discount or value go to a manager for approval
- Each salesperson sees their own deals; managers see everything
- Sales dashboards: pipeline, win rate, quotations awaiting approval

Who uses Odoo, and how

Office users (5)	**Full users**
All other staff (55)	**Staff users + Project + Sales**
WeCare pays, Year 1 5 full users · 55 users free	**≈ SAR 5,738**
WeCare pays, Year 2 onward 5 full users	**≈ SAR 7,200 / yr**

Good fit if you want every staff member working in projects and quotations on Odoo Enterprise, at the same licence cost as Option 1.

4 Option 4 · Recommended
Everything, on Odoo Community: no user licences

SAR 22,000
One-time build · 41 working days

Everything in Option 3, for everyone

- Built on **Odoo Community**, Odoo's official open-source edition. Your team has **no user licences to pay, now or as it grows**
- All 50–60 staff as real users, each with access set to their role: self-service, project, sales, stores, accounts or management
- Same core apps: CRM, Sales, Purchase, Inventory, Project, Timesheets, Invoicing, Employees, Time Off, Expenses, Attendance
- **VAT invoices with QR code**, using Odoo's own Saudi accounting set-up, which is part of Community
- **Enterprise-only features built by Code-ox on Community**: financial reports (P&L, balance sheet, aged balances), bank reconciliation, timesheet and project views, dashboards
- Server set up by Code-ox in **Riyadh**: security hardening, SSL, daily backups to a second location, and monitoring

Who uses Odoo, and how

All 50–60 staff	**Users, no licence**
Licences, every year	**SAR 0**
Server (Riyadh) grows with users and traffic	**from ≈ SAR 1,247 / yr**
Adding staff later	**Free**

Our recommendation. It is the only option with no licence bill at all, and it has the lowest total cost from Year 2 and over any period of two years or more. What is different from Enterprise is set out on the next page.

Why Option 4 costs more to build

Community and Enterprise do not have the same features. **Code-ox builds the Enterprise-only features WeCare needs on top of Community** (full accounting reports, bank reconciliation, timesheet and project views, dashboards), so WeCare gets the same working system as Option 3 without licences. The extra SAR 2,500 covers this development plus the secured Riyadh server. It is a one-time cost that removes the yearly licence bill (≈ SAR 7,200 for the full users).

Option 4 · What You Should Know

Community vs Enterprise

Community is the open-source core that Odoo Enterprise is built on, used by thousands of companies. Here is exactly what differs for WeCare and how we cover each point.

Area	Enterprise (Options 1–3)	Community (Option 4)	How it's handled in Option 4
User licences	Paid per user, every year	**None**	The biggest difference: no yearly licence bill, whatever the headcount
CRM, Sales, Purchase, Inventory, Project, Timesheets	**Included**	**Included**	Same core apps; WeCare's scope is fully covered
Time off, expenses, attendance	**Included**	**Included**	Every employee uses them as a normal user
Accounting reports & bank reconciliation	Full Accounting app	Invoicing app	Built by Code-ox on top of Community: P&L, balance sheet, aged balances, VAT reports and bank reconciliation
Changing screens and reports yourself	Odoo Studio (no-code)	**Not available**	Changes are made by Code-ox: small ones within the 6-month support period, larger ones quoted
Support	Odoo + Code-ox	Code-ox	6 months included; an optional support plan after that
Version upgrades	Odoo's upgrade service included	Not included	No need to upgrade every year. Stay on your version and upgrade later as a separate project if you want to
Hosting	Odoo cloud or own server	Own server	Code-ox-managed server in Riyadh: your data stays in Saudi Arabia
AI features	Odoo's built-in AI app	**Not available**	Code-ox can build AI features to WeCare's requirements in future, e.g. reading tenders and BOQs or drafting quotations. Quoted when needed
Enterprise-only apps	**Available**	**Not available**	Helpdesk, Sign, Documents, Planning, Payroll, Gantt views and the barcode app. None of these are in WeCare's scope today
Changing your mind later	Odoo supports moving the same database from Community to Enterprise		If WeCare ever needs Enterprise, your data and set-up carry over. You start paying licences only then

Our view

For a team of 50–60 whose main needs are CRM, quotations, purchasing, stock, projects, timesheets, VAT invoicing, and leave, **Community covers what WeCare needs today**. What Community does not include (Studio, Odoo's own support desk, Enterprise-only apps) is either covered by Code-ox or not needed today. And because the move to Enterprise stays open, choosing Community now does not close any doors.

For the Accounts Team

Cost comparison: 60 staff

All money in and out over three years, for each option. The build cost is paid once to Code-ox. Licences are paid yearly to Odoo, and the server monthly to the hosting provider. All amounts are in SAR, rounded to the nearest riyal.

SAR	Option 1	Option 2	Option 3	Option 4
Licences WeCare pays for full users · 55 users free	5	5	5	none
Build cost (one-time) Code-ox	16,000	18,000	19,500	22,000
Delivery time working days from kickoff	30	33	36	41
Odoo licences, Year 1 Odoo · first-year discount	5,738	5,738	5,738	0
Odoo licences, Year 2 onward Odoo · per year, standard rate	7,200	7,200	7,200	0
Server, per year LightNode Riyadh · 4 vCPU · 8 GB	1,247	1,247	1,247	1,247
Year 1 total	**22,984**	**24,984**	**26,484**	**23,247**
Each year after Year 1	**8,447**	**8,447**	**8,447**	**1,247**
3-year total	**39,877**	**41,877**	**43,377**	**25,740**

Rates used

Full user $25.50/mo Year 1, $32.00/mo after (≈ SAR 1,148 / 1,440 a year). Light User $5.90/mo (≈ SAR 266 a year, covered by Code-ox). Server $27.70/mo (≈ SAR 1,247 a year) for 4 vCPU · 8 GB. If users, traffic or data grow, the next size (8 vCPU · 16 GB, $52.70/mo ≈ SAR 2,372 a year) is a quick upgrade with no reinstall. US$ converted at SAR 3.75.

If headcount changes

Each employee added or removed changes the yearly cost by **SAR 1,440** a year for each full user (Options 1–3). Staff on Light Users cost WeCare nothing, and in Option 4 nobody does.

If Odoo asks for extended Light Users to be upgraded

If Odoo treats the 55 staff users in Options 2–3 as full users, the licence cost from Year 2 would become ≈ **SAR 86,400** a year for 60 full users (+ ≈ SAR 79,200 a year). Option 4 carries no such risk.

Odoo's prices are from odoo.com/pricing (Saudi Arabia, checked 11 October 2026); server prices are from LightNode's Saudi Arabia page on the same date. These prices are set by Odoo and LightNode and may change. Light User pricing is confirmed by an Odoo advisor. Figures do not include the optional support plan after the 6 included months.

Financials

Payment schedule & who you pay

The build cost is paid to Code-ox in two equal parts. Nothing else is invoiced by Code-ox: licences and the server are paid by WeCare directly to Odoo and the hosting provider, in WeCare's name.

Code-ox build cost (SAR)	Option 1	Option 2	Option 3	Option 4
Advance (50%) On sign-off and project start	8,000	9,000	9,750	11,000
Final (50%) On training completion and go-live	8,000	9,000	9,750	11,000
Total build cost	**16,000**	**18,000**	**19,500**	**22,000**

Who you pay, and when

Paid to	For	Options	How it's billed
Code-ox Technologies	Building the system, data set-up, training, go-live, 6 months' support	All	Two payments, as above
Odoo S.A.	Enterprise licences for the 5 full users. Code-ox pays the staff Light User licences	1, 2, 3	Yearly in advance, in US$, by card or bank transfer
LightNode	Server in Riyadh	All	Monthly in US$, by card. Account opened in WeCare's name
Nobody	User licences	4	Community has no licence fees

Delivery timeline (working days)

Phase	Option 1	Option 2	Option 3	Option 4
Discovery & design Workflows, roles, BOQ and leave policies	4	4	4	4
Core ERP set-up CRM, Sales, Purchase, Inventory, Project, Accounting	12	12	12	13 incl. server
Staff access & custom features Self-service, Project / Sales access, Enterprise-only features (Opt. 4)	4	7	10	12
Data import & testing	6	6	6	7
Training & go-live	4	4	4	5
Total working days	**30**	**33**	**36**	**41**

Terms & Conditions

General Terms

- **Scope of Work:** This proposal covers fresh installation and configuration of CRM, Sales, Purchase, Inventory, Project, and Accounting as described, plus the employee, project and sales access of the option WeCare selects. Any features outside this scope will require a separate written agreement and may incur additional charges.
- **WeCare's Part:** WeCare Technology provides master data (chart of accounts, client/consultant/vendor contacts, product-service catalog, opening balances, staff list and leave policy) and timely feedback. If either side needs more time, we agree an adjusted timeline together.
- **Licences & Hosting:** For Options 1–3, Odoo Enterprise licences (full users and Light Users) are billed by Odoo directly to WeCare Technology. Option 4 (Community) has no licence fees. In all options, the server is billed by the hosting provider directly to WeCare. None of these are invoiced by Code-ox. Code-ox sets up every option in line with Odoo's licence terms.
- **Data Migration:** This quotation covers a fresh install with master data setup. Migration of historical transactional data from any prior system is not included and can be scoped separately if required.
- **Revisions:** Configuration includes up to two (2) rounds of adjustment post-training. Additional rounds will be charged separately at an agreed rate.
- **Warranty:** Code-ox Technologies provides **6 months of complimentary support** post go-live, covering all configured modules — see scope and terms below. Extended support retainer packages are available upon request after this period.
- **Data Ownership:** All data entered into WeCare Technology's Odoo instance — records, documents, and configuration — remains WeCare Technology's property at all times and is exportable on request, including after project completion.
- **Delivery Timeline:** Delivery times shown for each option (30, 33, 36 or 41 working days) are counted from kickoff, meaning the advance payment has been received and master data provided. Code-ox keeps WeCare informed of progress every week. Any delay on Code-ox's side is never billed to WeCare Technology.
- **Limitation of Liability:** Each party's liability to the other under this agreement is capped at the total value of this quotation, and neither party is liable for indirect or consequential losses. This limit does not apply to breaches of confidentiality or misuse of client data.
- **Termination:** Either party may terminate this engagement with 14 days' written notice. WeCare Technology pays only for work completed up to the termination date; Code-ox Technologies delivers all configuration and documentation completed to that point.
- **Confidentiality:** Both parties agree to keep the contents of this proposal confidential and not disclose them to any third party without prior written consent.
- **Governing Law:** This agreement shall be governed by the laws of the Kingdom of Saudi Arabia, with both parties entitled to equal recourse under it.

Highlight — 6 Months Complimentary Support

Covered for 6 months from go-live, at no extra cost: bug fixes and configuration corrections on the CRM, Sales, Purchase, Inventory, Project, Accounting and employee self-service modules as built (and, in Option 4, the server), plus minor adjustments to fields, roles, and templates — target response **2 business days**. **Not covered:** new features, changes from Odoo platform updates, or issues from WeCare Technology's own post-launch configuration changes — these are scoped separately, keeping the period fair to both sides. An optional retainer covers support after 6 months.

A

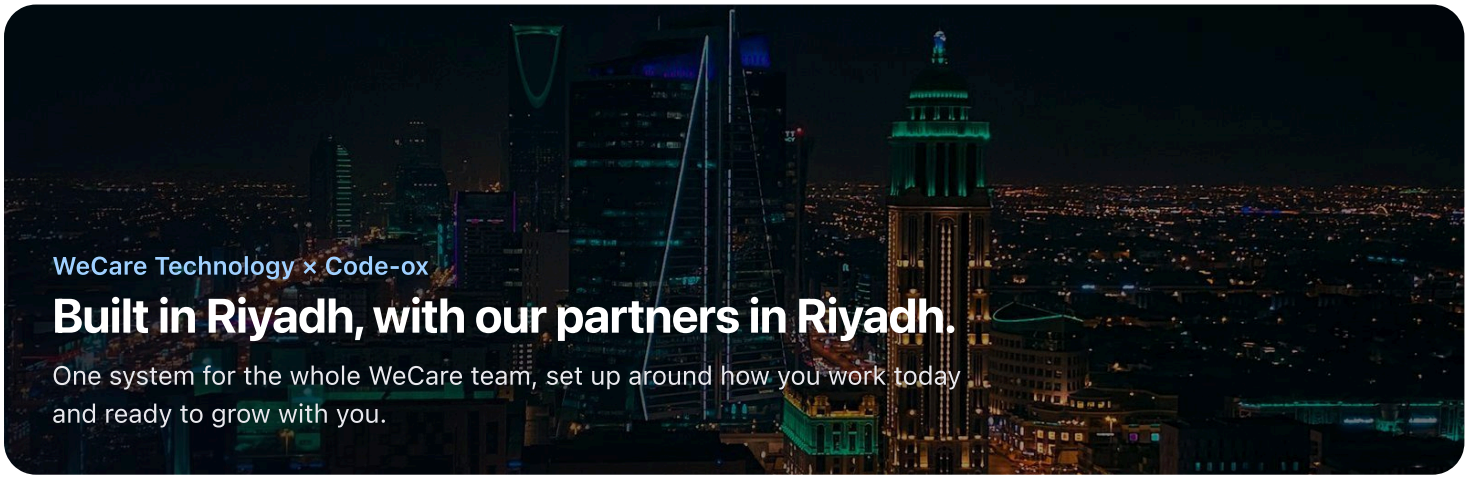

Assumptions & Exclusions

Key Project Assumptions

- WeCare Technology will provide master data — chart of accounts, product/service catalog, client, consultant, and vendor contacts — within **5 business days** of kickoff.
- Costs are worked out for **60 staff** (WeCare has 50–60): 5 office users on full licences and 55 staff users. The final split is confirmed at kickoff. In Options 2–3, staff users use Light User accounts with access extended by a Code-ox custom module. In Options 1–3, Code-ox pays Odoo for the Light User licences of WeCare's staff for as long as WeCare's Odoo subscription is managed through Code-ox. WeCare buys the full-user licences directly from Odoo before implementation starts, and Code-ox helps with the order and the Odoo advisor call for Light Users.
- The server account (LightNode, Riyadh) is opened in WeCare's name. Code-ox sets it up and looks after it during the support period. Separate off-site backup storage, if used, is billed at cost.
- Payroll, Helpdesk, e-signature and other apps not listed in the scope are not included. They can be added later on request.
- Sample tender documents and BOQs from at least 2–3 recent projects are provided during discovery so CRM and Project templates are configured against WeCare's actual submission format.
- Invoices are set up as VAT invoices with QR code, the way WeCare Technology issues them today.
- Since this is a fresh install, no legacy Odoo data or configuration exists to migrate or clean up.
- This quotation is valid for **30 days** from the date of issuance.

You own everything

In every option, the Odoo database, server account and all data belong to WeCare Technology and are registered in WeCare's name. In Option 4, WeCare also holds the full system and source code on its own server, so there is no dependency on any single vendor, including Code-ox.

Authorization

Acceptance & Authorization

By signing below, both parties confirm the option selected, and agree to start the project under the terms, scope, and payment schedule set out above.

Selected Option · tick one

- ☐ **Option 1** · Full ERP + Employee Self-Service (Enterprise) · SAR 16,000
- ☐ **Option 2** · Option 1 + Project Access for All Staff (Enterprise) · SAR 18,000
- ☐ **Option 3** · Option 2 + Sales Access for All Staff (Enterprise) · SAR 19,500
- ☐ **Option 4** · Everything on Odoo Community, no user licences · SAR 22,000 Recommended
