PRICE BREAKDOWN · OCTOBER 2026

Odoo Licences & Hosting Cost Breakdown

What WeCare Technology will pay each month and each year to run Odoo: the user licences, and two server options (Odoo.sh or a LightNode server). The example uses 10 users.

10 Users (example) | Odoo **Custom** plan | Option A · **Odoo.sh** | Option B · **LightNode**

Odoo prices as of **October 2026**

OFFICIAL ODOO PARTNERSHIP

Delivered by a Certified Odoo Silver Partner

Code-ox Technologies holds official Odoo Silver Partner status. We are authorised to sell, implement, configure and support Odoo ERP, with direct access to Odoo's partner support channels.

Official Partner

REFERENCE	DATE	CURRENCY	PREPARED BY
CX-WCT-2026-01	11 October 2026	US$ · SAR	Code-ox Technologies

PART 1 · RECURRING

Odoo user licences

Odoo charges a licence fee for each user every month. There are two parts to the running cost: these licences, and the server (next page). Both are paid by WeCare Technology directly to Odoo or to the server provider. Code-ox does not invoice them.

1 PRICE PER USER

Odoo Custom plan · Saudi Arabia pricing

1 USER · ODOO CUSTOM	PER MONTH	PER YEAR
Year 1 · first-year discount Odoo's discount for the first 12 months, on the users ordered at the start. Billed yearly.	$25.50 ≈ SAR 96	$306 ≈ SAR 1,148
Year 2 onward · standard rate Odoo's list price once the first-year discount ends. Billed yearly.	$32.00 ≈ SAR 120	$384 ≈ SAR 1,440
Billed monthly instead (alternative) No yearly commitment, at a higher rate per user.	$40.00 ≈ SAR 150	$480 ≈ SAR 1,800

2 WORKED EXAMPLE

10 users · Odoo Custom · billed yearly

10 USERS	RATE / USER / MO	MONTHLY (10 USERS)	ANNUAL (10 USERS)
Year 1 · with first-year discount 10 × $25.50	$25.50 ≈ SAR 96	$255 ≈ SAR 956	$3,060 ≈ SAR 11,475
Year 2 onward · standard rate 10 × $32.00	$32.00 ≈ SAR 120	$320 ≈ SAR 1,200	$3,840 ≈ SAR 14,400

Each user added or removed changes the total by ≈ SAR 1,148 in Year 1 and ≈ SAR 1,440 a year after that. For 5 users, halve the 10-user figures. Prices are from Odoo's official Saudi Arabia pricing (odoo.com/pricing) as of 11 October 2026 and are billed in US$. SAR amounts use 3.75 SAR per US$ and are a guide only; the exact amount is set when you subscribe.

WHY THE CUSTOM PLAN

Odoo's cheaper **Standard plan** ($13.50 per user per month in Year 1, $16.90 after that) runs only on Odoo's shared online cloud. It **cannot be hosted on Odoo.sh or on your own server**, and it does not include Odoo Studio, the external API or multi-company. Both server options in this document need the **Custom plan**. It covers every Odoo app and leaves room for custom features and integrations later.

PART 2 · RECURRING

Server options & total cost

Odoo needs a server to run on. The server price is fixed for the instance and does not depend on the number of users. Either option below runs a 10-user Odoo Custom setup comfortably.

SERVER OPTION	MANAGED BY	≈ MONTHLY	≈ ANNUAL
A · Odoo.sh RECOMMENDED Odoo's own cloud platform	Odoo (fully managed)	$88.00 ≈ SAR 330	$1,056 ≈ SAR 3,960
B · LightNode VALUE Private cloud server (VPS) · 8 GB RAM · Middle East region	Code-ox	$30.00 ≈ SAR 113	$360 ≈ SAR 1,350

HOW THE ODOO.SH PRICE IS MADE UP (ODOO · SAUDI ARABIA)

1 worker **$57.60/mo** + 80 GB storage **$16.00/mo** ($0.20 per GB) + 1 staging (test) copy **$14.40/mo** = **$88.00 a month** ($1,056 a year). One worker is enough for a 10-user team. If usage grows, each extra worker adds $57.60 a month.

10 USERS · LICENCE + SERVER	YEAR 1 / MO	YEAR 1 / YR	YEAR 2+ / MO	YEAR 2+ / YR
Custom × 10 + Odoo.sh Recommended	≈ SAR 1,286 $343	≈ SAR 15,435 $4,116	≈ SAR 1,530 $408	≈ SAR 18,360 $4,896
Custom × 10 + LightNode Value	≈ SAR 1,069 $285	≈ SAR 12,825 $3,420	≈ SAR 1,313 $350	≈ SAR 15,750 $4,200

These are the recurring running costs only, for licences and server. The one-time Code-ox implementation fee is quoted separately in CX-WCT-2026-01 and is not included above. All figures are billed in US$; SAR amounts use 3.75 SAR per US$ and are a guide only.

OUR RECOMMENDATION

Option A: Odoo.sh. This is the safest choice. Backups are kept on **3 servers in different locations**, Odoo supports the platform directly, and Odoo monitors it around the clock. Upgrades and test copies are handled on the platform. For business-critical data, this protection is worth the extra cost.

Option B: LightNode. Choose this if keeping costs down matters most. It is a low-latency Middle East server that Code-ox sets up and maintains for you, and it saves about SAR 2,600 a year compared with Odoo.sh.
