MODULES COVERED

Every Odoo module installed in Qaf's system — standard, custom and integration modules alike, not a fixed list. Any module in use is maintained under this AMC.

AMC SERVICE	WHAT'S INCLUDED
Corrective Maintenance	- Bug fixing and error resolution across all configured and custom modules. - Root-cause analysis so recurring issues are fixed at source. - Fixes tested on staging before release to live.

Updates & Compatibility	- Application of Odoo minor updates, security patches and localisation (ZATCA) updates. - Compatibility checks of custom modules after every Odoo update.
Minor Changes	- Small adjustments within existing modules — fields, views, report layouts, filters. - User, access-rights and company-setting changes. - Workflow tweaks that do not require new development.
System Health	- Periodic health checks — scheduled actions, error logs, database performance. - Verification that hosting-provider backups are running.
User Support	- Dedicated support channel (email / WhatsApp) to the Code-ox team. - How-to assistance and refresher guidance for staff.
