

COMMERCIAL QUOTATION · 25 SEPTEMBER 2026

Full Odoo Implementation for Qaf Coffee Roasters

One Odoo system running the roastery, cafés, wholesale, franchise and the online store — replacing Salla and manual processes with true cost per cup, live stock, profit per branch, and ZATCA-compliant invoices.

Roastery & Manufacturing

POS × 10 Branches

Wholesale B2B

Franchise Royalty Billing

Native Odoo Website

ZATCA Phase 2

OFFICIAL ODOO PARTNERSHIP

Delivered by a Certified Odoo Silver Partner

Code-ox Technologies holds official Odoo Silver Partner status — authorised to sell, implement, configure and support Odoo ERP deployments, with direct access to Odoo's partner support channels.

OVERVIEW

Executive Summary

Code-ox Technologies is pleased to submit this commercial quotation for a full Odoo implementation for Qaf Coffee Roasters — taking your existing Odoo 19 instance from a partly configured demo to one live system that runs the roastery, ~10 café branches, wholesale, franchise and the online store. This is our lead recommendation and what Qaf is targeting. A lighter alternative — keeping Salla and connecting it to Odoo — is included for reference on page 11, with pricing still under internal review. What follows here sets out the current state of your Odoo demo and Salla site as found; the full scope is then set out module by module, with one investment total on the Financials page.

Prepared For Qaf Coffee Roasters Al Khobar, Kingdom of Saudi Arabia	Prepared By Code-ox Technologies raghib@code-ox.com +966 56 176 5707	Quotation Details No: CX-QAF-2026-01 Date: 25 September 2026 Currency: SAR (Saudi Riyal)
--	--	--

WHAT WE WILL DELIVER

- ✓ **Roastery in Odoo**
Bill of materials for green → roasted → packed, with yield and lot tracking.
- ✓ **POS Across Every Branch**
~10 cafés on Odoo POS, drink recipes deducting stock per cup.
- ✓ **Native Odoo Website**
qafcoffee.com rebuilt on Odoo eCommerce, migrated off Salla.
- ✓ **Wholesale & Franchise**
B2B customer portal, plus 9% royalty billing for franchisees.
- ✓ **ZATCA Phase 2**
Compliant e-invoicing live on every POS and the website from day one.
- ✓ **HR & Saudi Payroll**
Shift planning, attendance, GOSI and WPS/Mudad payroll runs.

OUR COMMITMENT

Code-ox Technologies configures Odoo around how Qaf's roastery, counters and warehouse actually run — not a generic template. Every item in this proposal is scoped against the current state of your Odoo instance and Salla site, verified directly, not assumed.

CURRENT STATE

What We Found — Demo & Current Site

Findings below are from a direct review of the Odoo demo backend (**codeox-technologies-llp-qaf-roaster.odoo.com**, Odoo 19) and qafcoffee.com. They set the baseline this quotation is scoped against.

AREA	CURRENT STATE	GAP TO CLOSE
Platform	Odoo 19 Enterprise, trial database — auto-deletes 17 October 2026, not backed up	Move to a permanent, backed-up production instance before go-live
Apps installed	Sales, POS + Restaurant, Accounting, Inventory, Barcode, Website, eCommerce, Employees, Recruitment, Discuss, Calendar	Purchase, Manufacturing, Loyalty, Payroll, Quality not installed
Company setup	1 company, VAT/CR/address fields empty	Franchise entities need multi-company; company profile to complete
Warehouses	1 warehouse, 1 stock location, Receipts/Delivery/POS only	Roastery, green store, central warehouse and each branch need their own locations
POS	2 shops configured (Nada Branch, ARAMCO); 37 real orders logged 17–22 September	~8 more branches; menu still uses 168-variant demo products, not combos/modifiers
Storefront	Website + eCommerce live, only 3 demo products loaded; checkout has no online payment	Full catalogue import, payment gateway, courier integration
ZATCA	KSA chart of accounts and POS present; e-invoicing module not installed	ZATCA Phase 2 onboarding required before go-live

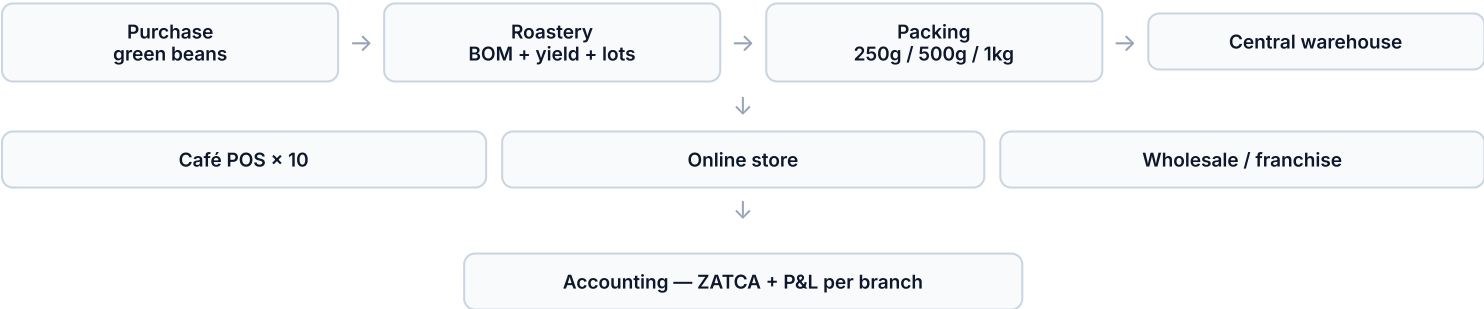

SCOPE

Bean to Books — One System

Code-ox takes Qaf from a partly configured Odoo 19 demo to one live system that runs the roastery, the cafés, the online store, wholesale and the books.

LINE	WHAT IT IS TODAY	WHERE IT WILL RUN
Roastery	Green beans roasted and packed in Al-Khobar	Odoo Manufacturing + Inventory
Cafés	~10 branches (Khobar, Riyadh, Dammam, Jubail, hospital site)	Odoo Point of Sale (Restaurant)
Online store	qafcoffee.com on Salla, Arabic/English	Odoo eCommerce — migrated off Salla
Wholesale (B2B)	Orders by email and WhatsApp	Odoo Sales + B2B customer portal
Franchise	5-year programme, 9% royalty	Odoo multi-company + royalty billing
Finance	Needs one P&L with margin per branch and channel	Odoo Accounting + ZATCA Phase 2

Goal: true cost per cup and per pack, live stock, profit per branch, and ZATCA-compliant invoices — all in one system.

One line from green bean to the books: every step moves stock and cost automatically.

1

SCOPE OF WORK

ERP by Module

Items marked **(new)** are not installed on the demo today.

#	MODULE & SCOPE DESCRIPTION
01	Company, Users & Security
02	Purchase (new)
03	Manufacturing — Roastery (new)
04	Inventory & Warehouses
05	Point of Sale — Cafés
06	Sales & Wholesale B2B
07	Franchise Management
08	Accounting & Finance
09	HR & Payroll (new)
10	Loyalty & Marketing

2

SCOPE OF WORK

Website & eCommerce — Native Odoo

We rebuild qafcoffee.com on Odoo eCommerce so online orders, stock and invoices live in one place with the rest of this system, building on the demo storefront already in place (page 3).

#	TASK & SCOPE DESCRIPTION
01	Design and build
02	Pages (about 12)
03	Shop
04	Checkout and payments
05	Shipping
06	Customer features
07	Migration from Salla
08	SEO, tracking and launch
09	Housekeeping

3

SCOPE OF WORK

ZATCA, Integrations & Data Migration

ZATCA Phase 2 is the one item that must be live on day one — it is not installed on the demo today.

ZATCA PHASE 2 (E-INVOICING)

- Install and configure Odoo's Saudi e-invoicing module; onboard each device/branch with ZATCA (CSID via Fatoora OTP) — sandbox first, then production
- Simplified B2C invoices from every POS and the online store, reported within 24 hours; cleared B2B invoices for wholesale and franchise; credit notes and returns
- Bilingual Arabic/English invoice and receipt layouts with QR code; error monitoring and resubmission process

INTEGRATIONS

INTEGRATION	PURPOSE	TYPE
Payment gateway	Online card, Mada, Apple Pay	Standard or connector
Tabby / Tamara	Buy now, pay later online	Connector
POS card terminals	Card payments post straight to Odoo	Standard or connector per brand
Courier — SPL/SMSA/DHL/RedBox	Shipping labels and tracking	Connector (SPL reused)
Bonat loyalty	Keep Bonat vouchers/points, or replace with Odoo Loyalty	Custom (decision needed)
Delivery apps (optional)	HungerStation, Jahez, Keeta orders into POS	Via aggregator, change request
Bank	Statement import/sync	Standard
WhatsApp (optional)	Order updates, wholesale orders	Connector

HOSTING NOTE

Custom modules (Bonat, royalty billing, roast-yield reports) cannot run on Odoo Online — the database moves to Odoo.sh before development starts.

DATA MIGRATION

- Clean the demo: remove test orders, demo pizza attributes, unused floors and websites
- Products: full catalogue (AR/EN names, barcodes, costs, images); bills of materials and drink recipes; customers (online, wholesale, franchise); suppliers and price lists
- Opening stock per location and opening balances (trial balance, open invoices) on go-live date; employees and contracts for payroll
- Not included: full transaction history from previous systems (balances only)

DELIVERY

Phases & Timeline

About 18–20 weeks, delivered in seven phases so Qaf can review and sign off at each stage. Live accounting and cafés land by week 10.

PHASE	SCOPE	WEEKS
0. Discovery & design	Workshops with finance, roastery, branches, online; confirm branch list and processes	1–2
1. Foundation & finance	Odoo.sh move, company setup, users, accounting, analytic per branch, ZATCA Phase 2	2–5
2. Roastery & inventory	Purchase, landed costs, roasting/packing BOMs, lots, locations, transfers, barcode	4–8
3. Café POS rollout	~10 branches, menu rebuild, drink recipes, terminals, receipts, self-ordering	6–10
4. Website & eCommerce	Full storefront rebuild on Odoo, migrated off Salla	8–14
5. Wholesale & franchise	B2B pricelists, customer portal, franchise ordering, royalty billing	12–15
6. HR & payroll	Employees, shifts, attendance, KSA payroll, GOSI, WPS	14–17

TRAINING & GO-LIVE

Role-based training in Arabic and English for finance, roastery, warehouse, branch managers, baristas, online team and HR. UAT and sign-off before each phase go-live. 30 days of hypercare after each go-live.

OUT OF SCOPE

Odoo Enterprise licences and Odoo.sh hosting fees (paid by Qaf to Odoo); hardware (POS terminals, printers, card machines, scanners); payment gateway/Tabby/Tamara/courier fees; photography, copywriting and translation; digital marketing, mobile app and thebasebev.com (quotable separately unless confirmed as a group brand); full history migration from old systems.

FINANCIALS

Investment Summary

Deliverable	Category	Amount (SAR)
Full Odoo Implementation		
Company, Users & Security Setup	Development	Included
Purchase, Roastery Manufacturing & Inventory	Development	Included
Point of Sale — All Café Branches	Development	Included
Website & eCommerce — Native Odoo	Development	Included
Wholesale B2B Portal & Franchise Management	Development	Included
Accounting, Finance & ZATCA Phase 2	Integration	Included
HR & Saudi Payroll	Development	Included
Payment Gateway & Courier Integration (SPL/SMSA/DHL/RedBox)	Integration	Included
Data Migration & Production Cutover	Integration	Included
Training, UAT Support & Go-Live	QA & Launch	Included
Project Total		70,000
Total Investment	Exclusive of VAT	SAR 70,000

Payment Schedule

Milestone	Trigger	Amount (SAR)
Advance Payment (30%)	Upon proposal sign-off and project commencement	21,000
Milestone 1 (30%)	Foundation, roastery/inventory & POS live across branches	21,000
Milestone 2 (20%)	Website live; wholesale & franchise portal live	14,000
Final Payment (20%)	HR/payroll live, UAT complete and full go-live	14,000
Project Total		70,000

* All amounts are exclusive of VAT. VAT (15%) will be added to each invoice as per KSA regulations. Payment schedule for internal discussion — to be confirmed before sign-off.

COSTS NOT INCLUDED

Odoo per-user licence fees, domain, SSL, payment gateway subscription/transaction fees, and courier account setup are not included — see page 10 for the full annual-charges breakdown.

TRANSPARENCY

The Real Annual Charges — Odoo's Own Published Pricing

PLAN	PRICE PER USER	ALL APPS IN THIS QUOTATION
Odoo Standard	~\$13.50–16.90 / month (billed annually)	Bundled at no extra charge, alongside every other Odoo app on the plan.
Odoo Custom	~\$25.50–32.00 / month (billed annually)	Bundled at no extra charge. Adds Odoo Studio, on-premise/Odoo.sh options, external API access.

PLAN	YOUR 36 USERS — ANNUAL	YOUR 36 USERS — MONTHLY
Odoo Standard	~\$5,832–7,301 (≈ SAR 21,870–27,379)	~\$486–608 (≈ SAR 1,823–2,282)
Odoo Custom	~\$11,016–13,824 (≈ SAR 41,310–51,840)	~\$918–1,152 (≈ SAR 3,443–4,320)

THE HONEST ANSWER

There is no separate "per module" licence fee. Odoo's own pricing page states both plans include unlimited support, hosting and maintenance with no hidden costs — every module in this quotation (Manufacturing, POS, Website, Sales, Accounting, HR) is included in whatever per-user plan you're already paying for, at your existing 36 users. Going live with this implementation adds zero new Odoo licence cost above the figures shown, unless you add new user seats.

Source: odoo.com/pricing-plan, fetched 24 September 2026; SAR converted at a fixed 3.75 peg — verify current rates and your actual plan tier before signing.

WHAT'S GENUINELY NOT INCLUDED

Domain registration, SSL, payment gateway transaction/subscription fees, courier account setup, and SMS costs for order notifications are third-party costs billed directly to Qaf, not to Code-ox.

ALTERNATIVE PATH

Keep Salla, Connect It to Odoo

Our recommendation, and what Qaf is targeting, is the full Odoo implementation priced above. Your team also asked about a lighter alternative — keeping Salla as the storefront and connecting it to Odoo. Scope is set out below for reference; pricing is still under internal review and is **not included** in the SAR 70,000 total.

ALTERNATIVE

Customize Salla + Integrate with Odoo

Pricing pending

Under internal review — not final

#	TASK & SCOPE DESCRIPTION
01	Salla ↔ Odoo two-way sync
02	Automatic order, delivery & invoice creation
03	Payment reconciliation
04	Store-pickup checkout customization
05	Category & volume fulfillment rules
06	Courier integration — SPL, SMSA, DHL, RedBox
07	Warehouse pickup workflow & pricelists
08	Testing & go-live support

WHY THIS STAYS SECONDARY

This path keeps Salla's subscription and platform limits — bounded by what Salla's App/Partner API allows for checkout customization. The full Odoo path removes that ceiling and the ongoing integration to maintain, which is why it's our lead recommendation. If Qaf's team wants this alternative priced formally, we'll finalize and send a separate figure.

TERMS & CONDITIONS

General Terms

- **Scope of Work:** This proposal covers the modules and tasks listed on the Scope pages. Features outside that scope require a separate written agreement and may incur additional charges.
- **Client Responsibilities:** Qaf names one project owner who approves each phase within 5 working days, and provides product lists, recipes, yields, supplier lists, opening balances, and Salla/ZATCA credentials in our templates. Delays on these may impact the timeline.
- **Third-Party Costs:** Odoo per-user licence fees, domain, SSL, payment gateway fees, courier fees, and SMS/notification costs are not included and are Qaf's responsibility.
- **Intellectual Property:** Upon receipt of full payment, all custom code and configuration become the exclusive property of Qaf Coffee Roasters. Odoo platform code remains subject to its own licence.
- **Revisions:** Each build phase includes up to two (2) rounds of revisions. Additional rounds are charged separately at an agreed rate.
- **Warranty:** 30 days of complimentary bug-fix warranty post go-live, covering all delivered modules. Extended support retainers are available on request.
- **Confidentiality:** Both parties agree to keep the contents of this proposal confidential and not disclose them to any third party without prior written consent.
- **Governing Law:** This agreement shall be governed by the laws of the Kingdom of Saudi Arabia.

VALIDITY

This quotation is valid for **30 days** from the date of issuance. Odoo 19 Enterprise is assumed as the version for the project; changes outside this document follow a written change request with its own cost.

ASSUMPTIONS & EXCLUSIONS

Key Project Assumptions

- ☐ Migrating off the current Odoo.sh trial database (auto-deletes 17 October 2026, not backed up) to a permanent production instance is included in scope and is a hard dependency for go-live.
- ☐ Qaf's existing Odoo subscription plan already includes every app in this quotation — no new Odoo licence line item is added by this proposal, beyond adding user seats if needed.
- ☐ Qaf holds active accounts with SPL, SMSA, DHL and RedBox with API/webhook access; account setup with any of these carriers is not included.
- ☐ Domain and hosting are **client-provided**. Code-ox provides deployment/configuration support only.
- ☐ This scope was built from the live demo, the discovery thread, and a backend review. It will be re-verified and updated once fresh Odoo backend admin credentials are confirmed.
- ☐ The Bonat loyalty/voucher integration referenced during our call is **not included** in this price. If wanted, it will be scoped and quoted separately.
- ☐ thebasebev.com, a separate website found in the same Odoo database, is **out of scope** unless Qaf confirms it is a group brand.

AUTHORIZATION

Acceptance & Authorization

By signing below, both parties confirm acceptance of the scope, price and payment schedule, and authorize commencement of the project. A formal Statement of Work will follow the signed quotation and advance payment.
