

## ODOO 19 CRM — SOLUTION PROPOSAL

# Grow More Brands. Lose Zero Leads.

A purpose-built CRM proposal for FranchiseMe — showing how Odoo 19 turns your consultation pipeline, team assignments, WhatsApp, and email into one system.

**FranchiseMe** is the only consulting firm in Saudi Arabia and the Gulf region with two **Certified Franchise Executive (CFE)** holders — the highest credential from the International Franchise Association. A firm at this level needs a CRM that matches its professional standing. **Odoo 19 delivers exactly that.**

How Leads Enter Your CRM — Two Flows, One Pipeline

02

Why Growing Teams Choose Odoo 19 CRM

| COMMON CHALLENGE                                                                                      | WITH ODOO 19 CRM                                                                                       |
|-------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------|
| Lead information is scattered across different tools — no single source of truth for the team         | → All inquiries land in one CRM inbox. Odoo auto-creates a lead from each email or web form submission |
| No structured way to assign leads to specific reps — distribution is manual and inconsistent          | → Auto round-robin or one-click manual assignment. Each rep sees only their own pipeline               |
| Communication history is split across tools — getting a full picture of any lead is time-consuming    | → Every call, email, WhatsApp, and note is on one record. Full history visible to the team in seconds  |
| No real-time visibility on pipeline health, team workload, or which leads have gone cold              | → Live dashboard: pipeline by stage, rep workload, conversion rate, average deal time                  |
| Follow-ups depend on individual memory — reminders are inconsistent and leads fall through the cracks | → Schedule calls, meetings, and emails on any lead. Odoo notifies the rep before it's due              |

03

Administrator — Full Control Over the Sales Team

The Administrator sees everything the 5 reps cannot — and acts on it in real time.

› See every rep's live pipeline on one screen — who is overloaded, who needs more leads

› Track each rep's performance: calls made, proposals sent, leads won and lost

› Generate weekly or monthly performance reports per rep — no manual data collection

› Spot leads going cold before they are lost — intervene at exactly the right moment

› Reassign any lead in one click if a rep is unavailable or leaves the team

› Full audit trail of every action on every lead — complete team accountability

Features — At a Glance

**Calendar & Meeting Scheduling**

Book free consultations directly from a lead record. Syncs with Google Calendar and Outlook — every meeting tied to the brand.

**Smart Lead Distribution**

Auto round-robin assignment across 5 reps. The Administrator controls who gets what — reps only see their own leads.

**WhatsApp Business**

Message brands directly from the CRM. Full conversation history logged automatically — nothing on personal phones.

**Email Integration**

Connect your company email. Every email to/from a brand is auto-linked to their record. Incoming emails create leads automatically.

**Activities & Follow-ups**

Schedule calls, meetings, and tasks on any lead. Odoo sends reminders before they're due — no follow-up ever falls through.

**Live Dashboards**

Real-time pipeline analytics: won/lost by rep, conversion rates, revenue forecast, and activity reports. Export to Excel anytime.

**Brand Contact Hub**

One record per brand — every call, email, WhatsApp, note, proposal, and contract in one place. Find anything in seconds.

**Mobile App**

Full CRM on iOS & Android. Update leads, log calls, and receive activity reminders from any location — same UI as desktop.

**AI Lead Scoring**

Odoo 19's built-in AI scores leads by likelihood to convert — reps focus their time on the hottest opportunities first.

Subject: Re: Plan to buy Redhat servers

Hello

After our discussion with our technical experts, here is the offer of Your Company. We believe it will meet every requirement you had in mind. Please feel free to contact me for any detail or technical detail that is not clear enough for you.

Notice that as agreed on phone, we offer you a 10% discount on the hardware!

Best regards,

Deeco Addict

Subject: Re: Plan to buy Redhat servers

Thanks for the information!

I asked a precise specification to our technical expert.

Lead record — full email thread, planned activities, and communication history in one view

**KSA Context:** WhatsApp is the primary B2B channel in Saudi Arabia. Odoo 19's native integration means no conversation is ever lost on a personal device.

07 Choose Your Deployment

RECOMMENDED FOR FRANCHISEME

Option 1 — Odoo Online

No server. No IT team. Licence + implementation only.

LICENCE

Annual subscription

SERVER COST

None ✓

✓ Hosted by Odoo — no server to buy or manage

✓ Go live in 7–10 days

✓ Automatic updates & daily backups

✓ Access from any browser or mobile device

○ Standard fields only (custom fields accepted ✓)

○ No deep code-level customisation

INVESTMENT SUMMARY

Implementation Fee

One-time · Paid to CodeOx · Setup, configuration & training · **Exclusive of VAT**

₹ 9,000 – 10,000

Odoo Licence — Standard Plan

6 users · All Apps · Paid directly to Odoo

RECOMMENDED

Yearly Plan

₹ 304 /mo

₹3,645 billed annually · Incl. first-year discount

Monthly Plan

₹ 380 /mo

No annual commitment · Incl. first-year discount

IF CUSTOMISATION IS REQUIRED

Option 2 — Odoo Custom

Full flexibility. Requires server + custom licence.

LICENCE

Custom Odoo

SERVER

VPS / Cloud

✓ Full code-level customisation freedom

✓ Custom modules & proprietary integrations

✓ Own your data and hosting environment

○ Higher upfront cost — server + dev + licence

○ Longer implementation: 6–10 weeks

INVESTMENT

Based on Requirements

Quoted after a discovery session. Price depends on the scope of customisation, modules, and integrations required.

Choose only if FranchiseMe requires custom logic beyond Odoo Online's configuration. Start with Option 1 first.

08 Quick Comparison

| Feature                        | Odoo Online (Option 1) | Odoo Custom (Option 2)    |
|--------------------------------|------------------------|---------------------------|
| CRM Pipeline & Lead Management | ✓ Included             | ✓ Included + customisable |
| WhatsApp Business              | ✓ Included             | ✓ Included                |
| Email Integration              | ✓ Included             | ✓ Included                |
| Mobile App (iOS & Android)     | ✓ Included             | ✓ Included                |
| Administrator Dashboard        | ✓ Included             | ✓ Included                |
| Server Required                | ✗ Not needed           | ⚠ Yes — VPS/Cloud         |
| Deep Code Customisation        | ✗ Not available        | ✓ Full freedom            |

CodeOx Recommendation — Start with Odoo Online, Go Live in 7–10 Days

FranchiseMe's stated requirements — lead management, WhatsApp, email, and distribution across 5 reps managed by 1 administrator — are 100% covered by Odoo 19 Online. No server, no infrastructure cost. CodeOx handles the full setup. Your team goes live capturing every brand inquiry from day one.

- 1

Discovery Session (1–2 hrs) — CodeOx maps your exact workflow, pipeline stages, and team roles.
- 2

Setup & Configuration (5–7 days) — CRM pipeline, WhatsApp API, email alias, 6 user roles, and dashboards configured.
- 3

Training & Go-Live — Administrator + 5 sales reps trained. FranchiseMe goes live with CodeOx on standby support.
