

COMMERCIAL QUOTATION · 25 SEPTEMBER 2026

Website & eCommerce — Two Paths Forward

Your management asked for two priced paths on your existing Odoo instance: customize your current Salla store and connect it to Odoo, or move the storefront fully onto Odoo. Both are scoped and priced independently inside.

Salla Customization

Salla ↔ Odoo Integration

Native Odoo Website

Pickup & Delivery Logic

SPL / SMSA / DHL / RedBox

Built on Existing Odoo 19

OFFICIAL ODOO PARTNERSHIP

Delivered by a Certified Odoo Silver Partner

Code-ox Technologies holds official Odoo Silver Partner status — authorised to sell, implement, configure and support Odoo ERP deployments, with direct access to Odoo's partner support channels.

OVERVIEW

Executive Summary

Code-ox Technologies is pleased to submit this commercial quotation for Qaf Coffee Roasters' online store. Qaf runs an existing Odoo 19 instance and a Salla-hosted storefront at qafcoffee.com. This proposal covers two independent paths on top of what you already run: connecting Salla to Odoo with the checkout fixes your team has identified, or moving the storefront fully onto Odoo. Section 3 sets out the current state of both systems as found; each option is then scoped and priced on its own pages.

Quotation Details

No: CX-QAF-2026-01
Date: 25 September 2026
Currency: SAR (Saudi Riyal)

WHAT WE WILL DELIVER

**Pickup & Delivery Checkout**

Pickup skips the address step and prices from the branch pricelist automatically.

**Category & Volume Fulfillment Rules**

Categories like drinks restricted to pickup-only; volume decides pickup vs. delivery.

**Courier Integration**

SPL, SMSA, DHL and RedBox configured as delivery carriers.

**Online Payment**

Payment gateway configured so customers can pay for themselves at checkout.

**Built on Existing Odoo**

No new servers or software — everything lands on the Odoo instance you already run.

**Testing & Go-Live Support**

End-to-end order testing across both fulfillment paths, plus go-live support.

OUR COMMITMENT

Code-ox Technologies configures Odoo around how Qaf's counters and warehouse actually run — not a generic template. Every item in this proposal is scoped against the current state of your Salla site and Odoo instance, verified directly, not assumed.

CURRENT STATE

What We Found — Demo & Current Site

Findings below are from a direct review of the Odoo demo backend (**codeox-technologies-llp-qaf-roaster.odoo.com**, Odoo 19) and qafcoffee.com. They set the baseline both options are scoped against.

AREA	CURRENT STATE	GAP TO CLOSE
Platform	Odoo 19 Enterprise, trial database — auto-deletes 17 October 2026, not backed up	Move to a permanent, backed-up production instance before go-live
Storefront	Website + eCommerce live: home, shop, category filters, product pages with variant options; only 3 demo products loaded	Full catalogue import; variants currently required, not optional
Checkout	"Home Delivery / Pickup In Store" selector exists with a store picker	Pickup still asks for a delivery address and doesn't yet apply branch pricelist pricing
Delivery methods	One generic "Standard delivery" method only	SPL, SMSA, DHL, RedBox not configured
Payments	Cash on Delivery only	No online payment gateway configured
POS	Two shops configured (Nada Branch, ARAMCO); 37 real orders logged 17–22 September, proving the website→POS flow works	—
Category rules	No restriction logic in place	Categories like drinks should be pickup-only, not deliverable

DECISION

The Two Paths

Two options, priced independently. Pick either — this proposal is structured so you can compare them directly.

OPTION 1

Customize Salla + Integrate with Odoo

SAR 40,000

5 weeks from kickoff · excl. VAT

OPTION 2

Fully Native Odoo Website

SAR 70,000

10 weeks from kickoff · excl. VAT

HOW THE TWO OPTIONS WORK

Option 1 — Keep Salla, connect it to Odoo. Two-way sync between Salla and Odoo, plus the checkout fixes (pickup address, pricelist pricing, category rules) built directly into Salla. Salla subscription stays; bounded by what Salla's platform allows.

Option 2 — Move the storefront onto Odoo. Full website rebuild on Odoo eCommerce, migrated off Salla. No integration layer, no sync — one database for storefront, stock and accounting.

	OPTION 1 — SALLA + ODOO INTEGRATION	OPTION 2 — NATIVE ODOO WEBSITE
Where data lives	Two systems, synced by a connector	One system — nothing to sync
Flexibility	Bounded by what Salla's platform allows (see assumptions, page 15)	Full control — any rule Odoo can model, we can build
Storefront subscription	Salla subscription continues, billed separately by Salla	No separate subscription — bundled in your existing Odoo plan

1

OPTION 1

Scope of Work — Customize Salla + Integrate with Odoo

#	TASK & SCOPE DESCRIPTION
01	Salla ↔ Odoo two-way sync Products, prices and stock synced from Odoo to Salla; orders and customers synced from Salla to Odoo.
02	Automatic order, delivery & invoice creation Salla orders create Odoo sales orders, deliveries and ZATCA invoices automatically.
03	Payment reconciliation Salla payouts reconciled in Odoo Accounting.
04	Store-pickup checkout customization Remove the delivery-address requirement for "Pickup in Store" orders and apply pricelist-based pricing instead of standard delivery pricing.
05	Category-level fulfillment rules Restrict selected categories (e.g. drinks) to pickup-only, hidden from home delivery.
06	Volume-based fulfillment logic Configurable rule routing orders to pickup vs. drop-off by order volume (threshold confirmed with your team during discovery).
07	Courier integration — SPL, SMSA, DHL, RedBox Delivery carrier setup in Odoo Inventory/Delivery, mapped to the correct fulfillment and pricelist rules. SPL reuses an integration Code-ox already has built; SMSA, DHL and RedBox are net-new. All four need API credentials from your carrier accounts.
08	Warehouse pickup workflow Pick/pack confirmation, stock deduction and pickup-ready notification from the central warehouse.
09	Pricelist configuration Pickup vs. delivery pricelists built and mapped so checkout price always reflects the correct fulfillment method.
10	Testing & go-live support End-to-end order testing across both fulfillment paths and all four couriers, plus go-live support and admin walkthrough.

WHY THIS APPROACH

Items 01–03 are the connector — the same pattern we use for any Salla-to-Odoo integration. Items 04–06 are your specific checkout customizations, requiring custom development through Salla's App/Partner tools. The exact behavior was only discussed by voice call so far — we'll confirm it in writing during discovery week 1.

OPTION 1

Investment & Payment Schedule

DELIVERABLE	CATEGORY	AMOUNT (SAR)
OPTION 1 — SALLA CUSTOMIZATION + ODOO INTEGRATION		
Salla ↔ Odoo Two-Way Integration	Integration	Included
Store-Pickup Checkout Customization	Development	Included
Category & Volume Fulfillment Rules	Development	Included
Courier Integration — SPL, SMSA, DHL, RedBox	Integration	Included
Warehouse Pickup Workflow & Pricelists	Development	Included
Testing & Go-Live Support	QA & Launch	Included
Option 1 Total		40,000
Total Investment — Option 1	Exclusive of VAT	SAR 40,000

Payment Schedule

MILESTONE	TRIGGER	AMOUNT (SAR)
Advance Payment (50%)	Upon proposal sign-off and project commencement	20,000
Final Payment (50%)	Upon UAT completion and go-live	20,000
Option 1 Total		40,000

* All amounts are exclusive of VAT. VAT (15%) will be added to each invoice as per KSA regulations.

COSTS NOT INCLUDED

Salla subscription fees continue to be billed by Salla directly. Courier account setup with SPL/SMSA/DHL/RedBox is not included — API credentials are provided by Qaf.

2

OPTION 2

Scope of Work — Fully Native Odoo Website

We rebuild qafcoffee.com on Odoo eCommerce so online orders, stock and invoices live in one place, building on the demo storefront already in place (page 3).

#	TASK & SCOPE DESCRIPTION
01	Design and build Custom Arabic (RTL) and English theme in Qaf branding, mobile first. Home page: hero banner, new releases, best sellers, harvest collections, capsules, reviews, branch finder. Header, mega menu and footer matching the current Salla menu. Replace all placeholder content.
02	Pages (about 12) About us, Branch locations with Google Maps, Wholesale, Franchise, Careers, Contact, FAQs, Terms, Refund and exchange policy, Privacy, Shipping and delivery.
03	Shop Categories: Coffee Packages, Saudi Harvests, Espresso Harvest, Filter Harvest, 1kg crops, Drip Bags, Capsules, Coffee Tools. Product pages with origin, process, roast level, tasting notes, altitude, brew guide (AR/EN). Variants for bag size and grind type — set optional, not required. Filters, wishlist, compare, related products, badges. Remove café drinks from the online shop unless Qaf wants pickup ordering.
04	Checkout and payments Payment gateway (Mada, Visa/Mastercard, Apple Pay via HyperPay/Moyasar/Tap/PayTabs — Qaf's choice); not yet configured on the demo. Tabby/Tamara buy-now-pay-later. Cash on delivery kept. Guest checkout, saved addresses, Saudi national address fields. Pickup-in-store fixed to skip the address step and apply the branch pricelist.
05	Shipping Delivery rates by city/zone, free-shipping threshold. Click and collect from any branch. Courier integration — SPL, SMSA, DHL, RedBox — as native Odoo delivery carriers. SPL reuses an integration Code-ox already has built; SMSA, DHL and RedBox are net-new. Category-level pickup-only rule and volume-based routing.
06	Customer features Account portal: orders, invoices, reorder, tracking. Discount codes, promotions, gift cards. Loyalty points shared with the cafés — Bonat integration or Odoo Loyalty (decision needed, not priced in). Optional: coffee subscriptions with Odoo Subscriptions.
07	Migration from Salla Products, images, descriptions (both languages), categories. Customers (with consent) and open orders. 301 redirects from all Salla URLs so Google rankings are kept.
08	SEO, tracking and launch Meta titles/descriptions, sitemap, Google Search Console. GA4, Google Tag Manager, Meta/Snap/TikTok pixels. Migrate off the current Odoo.sh trial database (auto-deletes 17 October 2026) onto a permanent, backed-up production instance. Domain switch, SSL, go-live checklist.
09	Housekeeping Remove the default "My Website" and the unused demo site from the database. thebasebev.com (a separate site found in the same database): out of scope unless Qaf confirms it is a group brand.

WHY THIS IS DIFFERENT

Because the storefront and Odoo ERP share one database, everything above ships without an integration layer to build, maintain or debug. Full comparison and the annual-cost breakdown are on page 13.

OPTION 2

Investment & Payment Schedule

DELIVERABLE	CATEGORY	AMOUNT (SAR)
OPTION 2 — FULLY NATIVE ODOO WEBSITE		
Design, Build & Pages (~12)	Development	Included
Shop, Catalogue & Checkout	Development	Included
Payment Gateway & Shipping/Courier Integration	Integration	Included
Customer Portal & Account Features	Development	Included
Migration From Salla & 301 Redirects	Development	Included
SEO, Tracking & Production Migration	Integration	Included
QA, UAT Support & Go-Live	QA & Launch	Included
Option 2 Total		70,000
Total Investment — Option 2		Exclusive of VAT SAR 70,000

Payment Schedule

MILESTONE	TRIGGER	AMOUNT (SAR)
Advance Payment (40%)	Upon proposal sign-off and project commencement	28,000
Milestone Payment (30%)	Upon storefront build, checkout & fulfillment rules complete	21,000
Final Payment (30%)	Upon UAT completion and go-live	21,000
Option 2 Total		70,000

* All amounts are exclusive of VAT. VAT (15%) will be added to each invoice as per KSA regulations.

COSTS NOT INCLUDED

Odoo per-user licence fees, domain, SSL, payment gateway subscription/transaction fees, and courier account setup are not included — see page 13 for the full annual-charges breakdown.

PART 3 — BEYOND THIS QUOTATION

Full ERP Scope — Not Priced in This Quotation

CONTEXT, NOT A PRICE

The pages that follow describe the complete Qaf ERP opportunity your team scoped with us — roastery, cafés across all branches, wholesale, franchise and payroll. **None of it is included in the SAR 40,000 / SAR 70,000 investment on the pages above.** It's included here for context and future planning. Each item is priced separately once you're ready to scope it, following the open questions on the last page.

Code-ox can take Qaf from a partly configured Odoo 19 demo to one live system that runs the roastery, the cafés, the online store, wholesale and the books.

LINE	WHAT IT IS TODAY	WHERE IT WILL RUN
Roastery	Green beans roasted and packed in Al-Khobar	Odoo Manufacturing + Inventory
Cafés	~10 branches (Khobar, Riyadh, Dammam, Jubail, hospital site)	Odoo Point of Sale (Restaurant)
Online store	qafcoffee.com on Salla, Arabic/English	Odoo eCommerce (Option 2 above) or Salla connected to Odoo (Option 1)
Wholesale (B2B)	Orders by email and WhatsApp	Odoo Sales + B2B customer portal
Franchise	5-year programme, 9% royalty	Odoo multi-company + royalty billing
Finance	Needs one P&L with margin per branch and channel	Odoo Accounting + ZATCA Phase 2

Goal: from bean to books in one system — true cost per cup and per pack, live stock, profit per branch, and ZATCA-compliant invoices.

One line from green bean to the books: every step moves stock and cost automatically.

PART 3, CONTINUED

Full ERP Scope — By Module

Items marked **(new)** are not installed on the demo today.

#	MODULE & SCOPE DESCRIPTION
01	Company, Users & Security Company profile (VAT, CR, national address — empty today); multi-company setup for franchise entities; user roles for owner, finance, roastery, warehouse, branch manager, barista, online, HR; branch-level access.
02	Purchase (new) Green bean suppliers (international) and local suppliers (cups, milk, packaging); purchase orders in USD/EUR with landed costs; reordering rules; vendor bills matched to receipts.
03	Manufacturing — Roastery (new) Bill of materials per roast profile (green kg → roasted kg, 15–20% weight loss built in); packing BOMs (roasted kg → 250g/500g/1kg bags, drip bags, capsules); lot number per roast batch; roaster/packing work centres; actual vs. expected yield report; optional cupping/quality checks.
04	Inventory & Warehouses Locations for green store, roastery, finished goods, central warehouse, each branch; unit chain kg green → kg roasted → bags → grams per drink; branch replenishment via transfers; lot tracking/expiry (FIFO/FEFO); Barcode app; monthly stock counts; automated average-cost valuation.
05	Point of Sale — Cafés ~10 branches configured (final list from Qaf); drink menu rebuilt as combos/modifiers instead of 168-variant products; drink recipes deduct stock per cup; branch-specific pricing; card terminal integration; kitchen/bar display; Arabic/English ZATCA receipts; QR self-ordering; delivery-app aggregation; offline mode & shift close.
06	Sales & Wholesale B2B Wholesale pricelists by tier and volume; quotation → order → delivery → invoice flow; B2B customer portal (login, pricing, reorder, invoices); credit limits and payment terms; private-label orders if offered.
07	Franchise Management Franchisee records, 5-year contracts, territories; franchisee ordering via portal at franchise prices; monthly 9% royalty invoice based on sales (custom); intercompany rules if franchisees share the Odoo instance.
08	Accounting & Finance KSA chart of accounts mapped to Qaf's current accounts; analytic accounts per branch/channel; bank statement sync; VAT/Zakat/withholding reports; fixed assets with depreciation; IFRS 16 leases; budgets per branch; dashboards for margin per cup/bag and branch P&L.
09	HR & Payroll (new) Employee records, Iqama/passport expiry reminders; shift planning and attendance across branches; Saudi payroll (GOSI, WPS/Mudad, end-of-service, leave); Recruitment/Online Jobs linked to the Careers page; employee self-service.
10	Loyalty & Marketing Loyalty points shared between cafés and online store (Odoo Loyalty or Bonat integration — decision needed); gift cards and e-wallet; email/SMS campaigns.

PART 3, CONTINUED

ZATCA, Integrations & Data Migration

ZATCA Phase 2 is the one item that must be live on day one — it is not installed on the demo today.

ZATCA PHASE 2 (E-INVOICING)

- Install and configure Odoo's Saudi e-invoicing module; onboard each device/branch with ZATCA (CSID via Fatoora OTP) — sandbox first, then production
- Simplified B2C invoices from every POS and the online store, reported within 24 hours; cleared B2B invoices for wholesale and franchise; credit notes and returns
- Bilingual Arabic/English invoice and receipt layouts with QR code; error monitoring and resubmission process

INTEGRATIONS

INTEGRATION	PURPOSE	TYPE
Payment gateway	Online card, Mada, Apple Pay	Standard or connector
Tabby / Tamara	Buy now, pay later online	Connector
POS card terminals	Card payments post straight to Odoo	Standard or connector per brand
Courier — SPL/SMSA/DHL/RedBox	Shipping labels and tracking	Connector (SPL reused)
Bonat loyalty	Keep Bonat vouchers/points, or replace with Odoo Loyalty	Custom (decision needed)
Delivery apps (optional)	HungerStation, Jahez, Keeta orders into POS	Via aggregator, change request
Bank	Statement import/sync	Standard
WhatsApp (optional)	Order updates, wholesale orders	Connector

HOSTING NOTE

Custom modules (Salla connector, Bonat, royalty billing, roast-yield reports) cannot run on Odoo Online — the database moves to Odoo.sh before development starts.

DATA MIGRATION

- Clean the demo: remove test orders, demo pizza attributes, unused floors and websites
- Products: full catalogue (AR/EN names, barcodes, costs, images); bills of materials and drink recipes; customers (online, wholesale, franchise); suppliers and price lists
- Opening stock per location and opening balances (trial balance, open invoices) on go-live date; employees and contracts for payroll
- Not included: full transaction history from previous systems (balances only)

PART 3, CONTINUED

Indicative Phasing

INDICATIVE ONLY — NOT PRICED

About 140 person-days over 18–20 weeks, with a live system for finance and cafés by week 10. Phasing lets Qaf approve and pay by phase once scoped — figures below are planning estimates, not a quotation.

PHASE	SCOPE	WEEKS
0. Discovery & design	Workshops with finance, roastery, branches, online; confirm branch list and processes	1–2
1. Foundation & finance	Odoo.sh move, company setup, users, accounting, analytic per branch, ZATCA Phase 2	2–5
2. Roastery & inventory	Purchase, landed costs, roasting/packing BOMs, lots, locations, transfers, barcode	4–8
3. Café POS rollout	~10 branches, menu rebuild, drink recipes, terminals, receipts, self-ordering	6–10
4. Website & eCommerce	Priced separately above — Option 1 or Option 2	5–10
5. Wholesale & franchise	B2B pricelists, customer portal, franchise ordering, royalty billing	12–15
6. HR & payroll	Employees, shifts, attendance, KSA payroll, GOSI, WPS	14–17

OUT OF SCOPE (FULL ERP)

- Odoo Enterprise licences and Odoo.sh hosting fees (paid by Qaf to Odoo)
- Hardware: POS terminals, printers, tablets, card machines, barcode scanners
- Payment gateway, Tabby/Tamara, courier and Salla fees; product photography, copywriting and translation
- Digital marketing/paid ads and mobile app (quotable separately); thebasebev.com (unless confirmed as a group brand); full history migration from old systems

OPEN QUESTIONS BEFORE PRICING THE FULL ERP

- ☒ Exact number and names of branches (7 listed online vs. about 10)
- ☐ Keep Bonat loyalty or move to Odoo Loyalty?
- ☐ Do franchisees run on Qaf's Odoo or their own systems?
- ☐ Is thebasebev.com part of the group and in scope?
- ☐ Payroll headcount, for the HR/payroll phase
- ☐ Which payment gateway and card terminals Qaf already has contracts with

FOR THE ODOO WEBSITE PATH

What You Get More — and the Real Annual Charges

	SALLA + ODOO INTEGRATION (OPTION 1)	NATIVE ODOO WEBSITE (OPTION 2)
Integration maintenance	The connector is software that needs monitoring and occasional maintenance as either platform updates.	Nothing to maintain — it's the same Odoo instance your team already uses.

TRANSPARENCY

Annual Charges — Odoo's Own Published Pricing

PLAN	PRICE PER USER	WEBSITE & ECOMMERCE APPS
Odoo Standard	~\$13.50–16.90 / month (billed annually)	Bundled at no extra charge, alongside every other Odoo app on the plan.
Odoo Custom	~\$25.50–32.00 / month (billed annually)	Bundled at no extra charge. Adds Odoo Studio, on-premise/Odoo.sh options, external API access.

PLAN	YOUR 36 USERS — ANNUAL	YOUR 36 USERS — MONTHLY
Odoo Standard	~\$5,832–7,301 (≈ SAR 21,870–27,379)	~\$486–608 (≈ SAR 1,823–2,282)
Odoo Custom	~\$11,016–13,824 (≈ SAR 41,310–51,840)	~\$918–1,152 (≈ SAR 3,443–4,320)

THE HONEST ANSWER

There is no separate "Website app fee." Odoo's own pricing page states both plans include unlimited support, hosting and maintenance with no hidden costs — the Website and eCommerce apps are included in whatever per-user plan you're already paying for, at your existing 36 users. Going live with the Odoo Website adds zero new licence cost above the figures shown, unless you add new user seats.

Source: odoo.com/pricing-plan, fetched 24 September 2026; SAR converted at a fixed 3.75 peg — verify current rates and your actual plan tier before signing.

WHAT'S GENUINELY NOT INCLUDED — EITHER OPTION

Domain registration, SSL, payment gateway transaction/subscription fees, and SMS costs for order notifications are third-party costs billed directly to Qaf, not to Code-ox.

TERMS & CONDITIONS

General Terms

- **Scope of Work:** Each option covers only the items listed on its respective scope page. Features outside that scope require a separate written agreement and may incur additional charges.
- **Client Responsibilities:** Qaf agrees to confirm the pickup/delivery volume threshold, provide Salla admin/API access (Option 1) or full catalog export (Option 2), and give timely feedback. Delays on these may impact the timeline.
- **Third-Party Costs:** Salla subscription fees (Option 1), Odoo per-user licence fees, domain, SSL, payment gateway fees, and SMS/notification costs are not included and are Qaf's responsibility.
- **Intellectual Property:** Upon receipt of full payment, all custom code and design deliverables become the exclusive property of Qaf Coffee Roasters. Salla and Odoo platform code remain subject to their own licences.
- **Revisions:** Each build phase includes up to two (2) rounds of revisions. Additional rounds are charged separately at an agreed rate.
- **Warranty:** 30 days of complimentary bug-fix warranty post go-live, covering all delivered modules. Extended support retainers are available on request.
- **Confidentiality:** Both parties agree to keep the contents of this proposal confidential and not disclose them to any third party without prior written consent.
- **Governing Law:** This agreement shall be governed by the laws of the Kingdom of Saudi Arabia.

ONLY ONE OPTION WILL BE BUILT

If Qaf starts with Option 1 and later chooses to migrate to Option 2, that migration is a separate, newly-scoped engagement. This quotation is valid for **30 days** from the date of issuance.

ASSUMPTIONS & EXCLUSIONS

Key Project Assumptions

- ☐ Option 1 depends on Salla's App Store/Partner API exposing hooks for checkout address-requirement removal and category-level purchase restriction. If a specific behavior isn't exposed by Salla, we'll propose the closest achievable alternative before development on that item begins.
- ☐ Order-volume threshold for pickup vs. drop-off will be confirmed by Qaf's team within the first week of either option and configured as an editable rule, not hardcoded.
- ☐ Qaf holds active accounts with SPL, SMSA, DHL and RedBox with API/webhook access available for integration; account setup with any of these carriers is not included.
- ☐ Domain and hosting are **client-provided** for either option. Code-ox provides deployment/configuration support only.
- ☐ For Option 2, Qaf's existing Odoo subscription plan already includes Website & eCommerce apps — no new Odoo licence line item is added by this proposal.
- ☐ For Option 2, migrating off the current Odoo.sh trial database (auto-deletes 17 October 2026, not backed up) to a permanent production instance is included in scope and is a hard dependency for go-live.
- ☐ This scope was built from the live demo, the discovery thread, and a backend review. It will be re-verified and updated once fresh Odoo backend admin credentials are confirmed, as planned between our teams.
- ☐ The Bonat loyalty/voucher integration referenced during our call is **not included** in either option's price. If wanted, it will be scoped and quoted separately.
- ☐ thebasebev.com, a separate website found in the same Odoo database, is **out of scope** for Option 2 unless Qaf confirms it is a group brand.

AUTHORIZATION

Acceptance & Authorization

By signing below, both parties confirm acceptance of the selected option's scope, price and payment schedule, and authorize commencement of the project. A formal Statement of Work will follow the signed quotation and advance payment.
