QUOTATION NO. CX-ALM-2026-02	DATE 5 September 2026	CURRENCY SAR (Saudi Riyal)	PREPARED BY Code-ox Technologies
--	---------------------------------	--------------------------------------	--

OVERVIEW

Executive Summary

Code-ox Technologies is pleased to submit this commercial quotation for a fresh **Odoo Enterprise ERP implementation** for Alamco Spaceworks — bringing sales, procurement, inventory, projects, HR and finance into one connected system.

Per our last meeting, the agreed direction is to **implement the ERP first** and build a solid operational foundation, then revisit the AI procurement agent as a natural next phase once the ERP is live and your data lives in one place. This proposal is therefore focused purely on standing up Odoo end-to-end for a **5-user rollout**, with the full module set configured around how Alamco actually runs projects.

PHASED APPROACH

Phase 1 (this proposal): Full Odoo Enterprise ERP implementation. **Phase 2 (future):** The AI Procurement Agent that reads BOQs and raises requisitions — quoted separately once the ERP is live and the catalogue and vendor data are in Odoo.

Prepared For

Alamco Spaceworks
Fit-out & bespoke joinery contractor
Kingdom of Saudi Arabia

Scope

Fresh Odoo 19 Enterprise install · full module set · 5 users · training · 6 months complimentary support

Quotation

No: CX-ALM-2026-02
Date: 5 September 2026
Currency: SAR (Saudi Riyal)

WHAT THIS DOCUMENT MAKES CLEAR

Three cost lines make up your total: a one-time **implementation charge**, the recurring **Odoo user licences**, and the recurring **server / hosting**. Each is itemised on the following pages — including a side-by-side of hosting options (Odoo.sh, DigitalOcean, AWS, LightNode) — so there are no surprises.

SCOPE OF WORK

The full Odoo module suite

Your Odoo Enterprise subscription unlocks **every Odoo application** — not a limited bundle. This implementation configures the core operational modules below around Alamco's workflows; any additional app can be switched on at any time at no extra licence cost.

SALES & CUSTOMERS

- ✓ **CRM** — leads, tenders & client/consultant pipeline
- ✓ **Sales** — BOQ-style quotations, revisions, price lists
- ✓ **Sign** — digital sign-off on quotes & contracts

PROCUREMENT & INVENTORY

- ✓ **Purchase** — RFQs, vendor price lists, PO-to-bill, approvals
- ✓ **Inventory** — multi-location stock, per-project reservation

PROJECTS & DELIVERY

- ✓ **Project** — every fit-out job as a project, cost vs BOQ
- ✓ **Timesheets** — labour hours booked to projects

FINANCE

- ✓ **Accounting** — full AR/AP, bank reconciliation, reporting
- ✓ **Invoicing** — ZATCA e-invoicing compliance
- ✓ **Expenses** — staff expense capture & approval

HUMAN RESOURCES

- ✓ **Employees** — directory & records
- ✓ **Time Off & Attendance** — leave and presence

PRODUCTIVITY & PLATFORM

- ✓ **Documents** — central file store, linked to records
- ✓ **Discuss & Approvals** — internal chat, approval flows
- ✓ **Dashboards** — live KPIs across every module

NOTE ON MODULE ACCESS

The implementation configures the operational core above — Sales, Purchase, Inventory, Project, Accounting and HR — so Alamco goes live quickly. Any other Odoo app is available on the same licence and can be switched on whenever it's needed, at no extra licence cost.

SCOPE OF WORK

Exactly what Code-ox delivers

A fixed-scope implementation: every activity below is included in the one-time implementation charge. Each module is configured around how Alamco actually runs — not a default install.

AREA	CONFIGURATION & DELIVERABLES INCLUDED
1 · DISCOVERY & FOUNDATION	
Requirement workshop	Map Alamco's project, procurement and finance workflows; define the 5 users and their roles.
Instance & localization	Provision Odoo 19, company profile, Saudi Arabia fiscal localization, currency and number sequences.
Master data setup	Import chart of accounts, product/material catalogue, approved vendor list, clients & consultants.
Users & access control	Role-based access rights, record rules and approval rights configured per user.
2 · SALES & CRM	
CRM pipeline	Lead/tender stages, activities and per-opportunity document attachments.
Quotations	BOQ-style quotation templates, revision control, price lists and standard terms.
Approvals & e-sign	Quotation approval flow and digital Sign for client sign-off.
3 · PROCUREMENT & INVENTORY	
Purchase flow	RFQ → PO → vendor bill, vendor price lists and multi-level approval matrix.
Warehouses & sites	Warehouse and job-site locations with per-project material reservation.
Stock control	Reordering rules, stock valuation, delivery and receipt routes.
4 · PROJECTS & COSTING	
Project setup	Project templates, task stages and per-job analytic tracking.
Timesheets & cost vs BOQ	Labour booked to projects; material + labour cost tracked against quoted BOQ value, with margin dashboards.
5 · FINANCE & ZATCA	
Accounting	AR/AP, journals, bank setup & reconciliation, VAT (15%) tax configuration.
ZATCA e-invoicing	Configure ZATCA (Fatoora) Phase-2 compliant e-invoicing on Alamco's registration.
Financial reporting	P&L, balance sheet, aged receivables/payables and cash-flow reports.
6 · HR & EXPENSES	
Employees & attendance	Employee directory, departments, contracts, Time Off and Attendance.
Expenses	Staff expense capture and approval, linked to projects.
7 · TRAINING, GO-LIVE & SUPPORT	
Training & UAT	Hands-on role-based training and user acceptance testing against real workflows before sign-off.
Go-live & support	Cutover with launch hypercare, then 6 months complimentary bug fixes and config adjustments on all modules.

INVESTMENT · PART 1

Implementation & licences

Your spend has three parts — a one-time implementation charge, recurring Odoo licences, and recurring hosting. This page covers the first two; hosting options are on the next page.

1

ONE-TIME

Implementation charge

INCLUDED IN THE IMPLEMENTATION	AMOUNT
Full Odoo Enterprise implementation Discovery & workflow mapping · fresh Odoo 19 install & configuration · all core modules set up around Alamco's processes · roles & access per user · master-data setup (chart of accounts, products, vendors, clients) · ZATCA e-invoicing configuration · hands-on team training · go-live support	SAR 23,000
6 months complimentary support Bug fixes and configuration adjustments on every module, at no extra cost, for 6 months after go-live.	Included
One-time implementation total	SAR 23,000

2

RECURRING

Odoo Enterprise user licences

ODOO CUSTOM PLAN — 5 USERS	RATE / USER / MO	MONTHLY (5 USERS)	ANNUAL (5 USERS)
Year 1 — with first-year discount Odoo's standard first-year initial discount on the Custom plan.	\$20.40 ≈ SAR 77	\$102 ≈ SAR 383	\$1,224 ≈ SAR 4,590
Year 2 onward — standard rate List price after the first-year discount ends.	\$25.50 ≈ SAR 96	\$127.50 ≈ SAR 478	\$1,530 ≈ SAR 5,738

FOR REFERENCE — COST PER SINGLE USER (ODOO CUSTOM)	MONTHLY	ANNUAL
1 user — Year 1 (discounted)	\$20.40 ≈ SAR 77	\$244.80 ≈ SAR 918
1 user — Year 2 onward	\$25.50 ≈ SAR 96	\$306 ≈ SAR 1,148

Each additional user adds ≈ SAR 918 in Year 1 and ≈ SAR 1,148 per year thereafter, so the licence line scales cleanly with headcount.

WHY THE CUSTOM PLAN

Alamco requires **Odoo Custom** — it unlocks all apps plus **Odoo Studio, external API and multi-company**, and is exactly what the Phase-2 AI agent will need, so choosing it now avoids rework later. Billed annually; first-year discount applies to Year 1 only, renewing at the standard rate. Prices per Odoo's pricing page (US\$); SAR indicative at 3.75, confirmed at subscription.

INVESTMENT · PART 2

Server & hosting options

Odoo needs a server to run on. You choose the hosting that fits your priorities — fully managed by Odoo, or a lower-cost cloud server we set up and maintain for you. All options comfortably run a 5-user Odoo instance.

OPTION		MANAGED BY	CUSTOM CODE / AI-READY	≈ MONTHLY	≈ ANNUAL
Odoo.sh Odoo's cloud platform	RECOMMENDED	Odoo — fully managed	Yes	≈ SAR 330 (\$88.00)	≈ SAR 3,960 (\$1,056)
LightNode Self-host VPS · 8 GB · ME region	VALUE	Code-ox	Yes	≈ SAR 115 (\$30)	≈ SAR 1,350 (\$360)
DigitalOcean Self-host VPS · 8 GB · 4 vCPU · 160 GB		Code-ox	Yes	≈ SAR 180 (\$48)	≈ SAR 2,160 (\$576)
AWS Self-host · t3.large · 8 GB		Code-ox	Yes	≈ SAR 205 (\$55)	≈ SAR 2,460 (\$655)

ODOO.SH PRICE BREAKDOWN (ODOO · SAUDI ARABIA)

1 worker **\$57.60/mo** (\$691.20/yr) + 80 GB storage **\$16.00/mo** (\$192/yr, at \$2.40/GB/yr) + 1 staging branch **\$14.40/mo** (\$172.80/yr) = **\$88.00 / month** (\$1,056 / year). Storage is sized at 80 GB for this project. Hosting is charged per instance, not per user — the same for 5 users.

OUR RECOMMENDATION

- 1st choice — Odoo.sh.** It's the safest, most robust option: **automatic backups replicated across multiple regions, direct support from Odoo**, and a platform **fully optimised for Odoo** (upgrades, staging and monitoring handled for you). Because your data is backed up across multiple geographic regions, a problem in any single data-centre or region never puts it at risk — protection a single self-hosted server cannot match. For business-critical data, this peace of mind is worth the modest premium.
- 2nd choice — LightNode.** If cost is the priority, LightNode is the best-value alternative — a low-latency Middle-East VPS set up and maintained by Code-ox. Both run Odoo Enterprise and support the custom code needed for the Phase-2 AI agent.

Hosting fees are paid to Odoo (Odoo.sh) or the VPS provider, billed in USD; SAR indicative at 3.75, confirmed at provisioning. All options run Odoo Enterprise, already covered on the previous page.

INVESTMENT · SUMMARY

What you'll actually spend

Putting it together for **5 users on the Odoo Custom licence**. The only variable is your hosting choice — two options shown. Year 1 includes the one-time implementation and the discounted first-year licence; from Year 2 you pay licence (standard rate) and hosting only.

FIXED COST LINES (5 USERS, ODOO CUSTOM)	YEAR 1	YEAR 2+ / YEAR
Implementation (Code-ox) Full ERP setup, training, 6-months support — one-time	SAR 23,000	—
Odoo Custom licences x 5 Paid to Odoo · Yr1 discounted, renews at standard	≈ SAR 4,590	≈ SAR 5,738
Subtotal before hosting	≈ SAR 27,590	≈ SAR 5,738

+ HOSTING CHOICE → YOUR TOTAL	HOSTING / YR	YEAR 1 TOTAL	YEAR 2+ / YR
Odoo.sh — fully managed RECOMMENDED \$88/mo · 80 GB · multi-region backups · Odoo support	≈ SAR 3,960	≈ SAR 31,550	≈ SAR 9,698
Self-host — LightNode VALUE 8 GB VPS, ME region · custom-code ready	≈ SAR 1,350	≈ SAR 28,940	≈ SAR 7,088

Year 1 = one-time implementation (SAR 23,000) + first-year licences (discounted) + one year of hosting. Odoo Custom renews from Year 2 at the standard rate (≈ SAR 5,738/year for 5 users). Licence and hosting are paid by Alamco directly to Odoo / the hosting provider. Figures are indicative at SAR 3.75 to the US dollar and confirmed at subscription/provisioning. **Recommended:** Odoo.sh — multi-region backups, Odoo support and an Odoo-optimised platform; LightNode is the best-value alternative if cost is the priority. Each added/removed user changes only the licence line (Custom ≈ SAR 918/user in Year 1, ≈ SAR 1,148/user/year thereafter). Licence, worker and staging rates are per Odoo's current Saudi Arabia pricing; storage is sized up to 80 GB for this project. On that basis, Custom (5 users) + Odoo.sh (80 GB), Year 1 = **US\$ 2,280 ≈ SAR 8,550**.

DELIVERY

How we deliver & payment terms

STAGE	WHAT HAPPENS	TIMELINE
1 · Discovery	Workflow mapping, master-data collection, user roles	Week 1
2 · Configuration	Install, core module setup, ZATCA, access control	Weeks 2–4
3 · Training & UAT	Hands-on team training, test against real workflows	Week 5
4 · Go-live	Cutover, go-live support, then 6 months support	Week 6

P

PAYMENT

Payment schedule — implementation

MILESTONE	%	AMOUNT
On acceptance / project kickoff	50%	SAR 11,500
On go-live	50%	SAR 11,500
Implementation total	100%	SAR 23,000

Odoo licence and hosting are paid by Alamco directly to Odoo / the hosting provider and are not invoiced by Code-ox. For the VPS hosting options, Code-ox handles provisioning and ongoing server maintenance.

A

ASSUMPTIONS & EXCLUSIONS

Key project assumptions

- ☐ Alamco provides master data — chart of accounts, product catalogue, approved vendor list, client/consultant contacts — within **5 business days** of kickoff.
- ☐ Odoo Enterprise licences (5 users) are purchased by Alamco directly from Odoo before implementation begins.
- ☐ Hosting/server cost is paid by Alamco to the chosen provider; the option is confirmed at kickoff.
- ☐ ZATCA e-invoicing configuration assumes Alamco's existing ZATCA registration is in order; registration itself is out of scope.
- ☐ The AI Procurement Agent is a separate future phase, quoted separately, and is not part of this implementation.
- ☐ This quotation is valid for **30 days** from the date of issuance.

AUTHORIZATION

Acceptance & Authorization

By signing below, both parties confirm acceptance of this commercial quotation for the Odoo Enterprise ERP implementation and authorize commencement under the scope, terms, and payment schedule set out above.
