OVERVIEW

Executive Summary

Code-ox Technologies is pleased to submit this commercial quotation for a fresh Odoo ERP implementation for WeCare Technology, covering CRM, Sales, Purchase, Inventory, Project, and Accounting. This is a new Odoo instance built from the ground up — no existing installation to work around, no legacy configuration to untangle.

As a systems integrator running ICT, ELV, MEP, and CCTV projects, WeCare's real bottleneck today is presales and procurement: vendor prices scattered across emails and spreadsheets, BOQ revisions that are hard to track version to version, and submissions rebuilt from memory instead of pulled from one source of truth. This proposal closes that gap — one connected system where a tender becomes an opportunity, an opportunity becomes a quotation, a quotation drives purchasing and stock, and every project's real cost and margin is visible as it happens.

Per our discussions, the initial rollout is 1–5 users starting with Sales and Presales, with the full module set configured from day one so Purchase, Inventory, Project, and Accounting are ready the moment more users come on board.

---	---	---

WHAT WE WILL DELIVER

- ✓ CRM Module

Lead-to-opportunity pipeline for every tender and RFQ, with BOQ/tender documents attached and versioned per opportunity.
- ✓ Sales Module

BOQ-style quotations with revision control, price lists, and a clean quotation-to-invoice flow.
- ✓ Purchase Module

Vendor RFQs and price-list management in one place — no more scattered vendor pricing across emails.
- ✓ Inventory Module

Multi-location stock across warehouse and job sites, with serial tracking for installed equipment.
- ✓ Project Module

Every installation tracked as a project — tasks, timesheets, and real cost vs. quoted BOQ value.
- ✓ Accounting Module

Full AR/AP, bank reconciliation, and ZATCA e-invoicing compliance from day one.
- ✓ Fresh Odoo Installation

New instance built and configured from scratch around WeCare Technology's workflows.
- ✓ 1–5 User Roles & Training

Access configured per role, starting with Sales/Presales, with hands-on training and go-live support.
- ✓ 6 Months Complimentary Support — Included

Bug fixes and configuration corrections on every module, at no extra cost, for 6 months after go-live. Full scope on the Terms page.

OUR COMMITMENT

Code-ox Technologies configures Odoo around how your business actually runs — not the other way around. For WeCare Technology, that means CRM, Sales, Purchase, Inventory, Project, and Accounting set up as one connected flow from the first opportunity, the first vendor RFQ, and the first invoice.

#	MODULE / FEATURE & SCOPE DESCRIPTION
CRM	
01	Lead & Opportunity Pipeline Every tender and RFQ tracked from first contact through award, replacing scattered emails and spreadsheets.
02	Client, Consultant & Vendor Contacts Centralized database of consultants, main contractors, and equipment vendors WeCare deals with.
03	Tender & BOQ Document Versioning Tender documents, drawings, and BOQ revisions attached and versioned against each opportunity — no more rebuilding submissions from memory or SharePoint.
04	Pipeline Reporting & Forecasting Win-rate, pipeline value, and forecast visibility by project type — CCTV, ELV, MEP, and beyond.
SALES	
05	BOQ-Style Quotation Management Line-item quotations that mirror BOQ structure, converted to confirmed orders with approval rules built in.
06	Price Lists Linked to Vendor Cost Sales prices tied to the latest vendor costs from Purchase, so margins stay accurate as vendor pricing changes.
07	Quotation Revision Control Every BOQ/price revision versioned and comparable — closing the untracked-revisions gap for good.
08	Sales Order → Invoice Flow Confirmed orders drive invoicing automatically, tied to project milestones.
PURCHASE	
09	Vendor RFQ & Price Comparison Request and compare quotes from multiple equipment vendors in one place — no more scattered vendor prices across emails.
10	Vendor Price List Management Every vendor's latest pricing stored centrally and versioned, always current for quoting.
11	Purchase Order & Vendor Bill Matching Purchase order, receipt, and vendor bill matched automatically before payment.
12	Purchase Approval Workflows Multi-level approval on purchase orders above defined value thresholds.

WHY THIS APPROACH

CRM, Sales, and Purchase are configured as one connected flow — a tender becomes an opportunity, an opportunity becomes a BOQ-style quotation, and vendor pricing feeds straight into your margins. No more rebuilding submissions from memory or spreadsheets.

SECTION 1 — CONTINUED

Scope of Work — Inventory, Project & Accounting

#	MODULE / FEATURE & SCOPE DESCRIPTION
INVENTORY	
13	Multi-Location Stock (Warehouse & Site) Equipment and materials tracked across warehouse and active job sites.
14	Serial/Lot Tracking for Equipment Cameras and ELV/MEP equipment tracked by serial number for warranty and maintenance history.
15	Stock Reservation Against Projects Materials earmarked to specific projects before installation, avoiding cross-site mix-ups.
16	Real-Time Stock Valuation Live stock value and quantity on hand, synced with Accounting automatically.
PROJECT	
17	Project & Task Management per Site Every installation/commissioning job tracked as a project with tasks, milestones, and assigned engineers.
18	Timesheets & Resource Allocation Engineer time logged against projects for cost tracking and utilization.
19	Project Profitability Tracking Real cost — materials plus labor — tracked against quoted BOQ value, visible per project.
20	Milestone-Based Project Invoicing Clients invoiced as project milestones complete, tied directly to Sales.
ACCOUNTING	
21	Chart of Accounts & AR/AP Full bookkeeping with customer and vendor sub-ledgers set up around WeCare Technology's operations.
22	Bank Reconciliation & ZATCA E-Invoicing Bank statement import and reconciliation, plus KSA e-invoicing (ZATCA Phase 2) compliance configured in.
23	Financial Reporting & Dashboards P&L, balance sheet, cash flow, and aged receivables/payables available live — no manual exports.
24	Project Cost Consolidation Project, Purchase, and Inventory costs roll up into one P&L view per project and company-wide.

WHY THIS APPROACH

Inventory, Project, and Accounting close the loop — stock committed to a project, engineer time logged against it, and every cost rolling up into real project profitability and the company ledger. One instance, one source of truth across every active site.

WHO SEES WHAT

Admin / Owner Full visibility across CRM, Sales, Purchase, Inventory, Project, and Accounting. Approves purchase orders and quotations above threshold, and views project profitability and financial reports company-wide.	Operations / Project User Manages opportunities and quotations, raises vendor RFQs and purchase orders, and logs stock movements and timesheets against assigned projects.

Project Module — Tasks, Timesheets & Profitability Setup	Development	Included
Accounting Module — Setup & ZATCA Configuration	Development	Included
1–5 User Roles & Access Configuration	Development	Included
Staff Training & Go-Live Support	QA & Launch	Included
Total Project Investment		SAR 16,000

Payment Schedule

MILESTONE	TRIGGER	AMOUNT (SAR)
Advance Payment (50%)	Upon proposal sign-off and project commencement	8,000
Final Payment (50%)	Upon training completion and go-live	8,000
Project Total		16,000

COSTS NOT INCLUDED IN THIS QUOTATION

Odoo user licence/subscription fees for however many of the 1–5 users WeCare activates are billed directly by Odoo to WeCare Technology and paid directly by WeCare Technology — not invoiced by Code-ox. The subscription also covers Odoo's own hosting for the instance.

TERMS & CONDITIONS

General Terms

- **Scope of Work:** This proposal covers fresh installation and configuration of CRM, Sales, Purchase, Inventory, Project, and Accounting as described. Any features outside this scope will require a separate written agreement and may incur additional charges.
- **Client Responsibilities:** WeCare Technology agrees to provide master data (chart of accounts, client/consultant/vendor contacts, product-service catalog, opening balances) and timely feedback within agreed deadlines. Delays caused by the client may impact the project timeline.
- **Odoo Licence Costs:** Odoo user licence/subscription fees for 1–5 users (exact count confirmed at kickoff, starting with Sales/Presales) are billed directly by Odoo to WeCare Technology and are not included in this quotation.
- **Data Migration:** This quotation covers a fresh install with master data setup. Migration of historical transactional data from any prior system is not included and can be scoped separately if required.
- **Revisions:** Configuration includes up to two (2) rounds of adjustment post-training. Additional rounds will be charged separately at an agreed rate.
- **Warranty:** Code-ox Technologies provides **6 months of complimentary support** post go-live, covering all configured modules — see scope and terms below. Extended support retainer packages are available upon request after this period.
- **Data Ownership:** All data entered into WeCare Technology's Odoo instance — records, documents, and configuration — remains WeCare Technology's property at all times and is exportable on request, including after project completion.
- **Delivery Timeline:** Code-ox Technologies will propose a project timeline at kickoff and keep WeCare Technology informed of progress against it. Delays caused by Code-ox outside of agreed client-dependency delays will not be billed to WeCare Technology.
- **Limitation of Liability:** Each party's liability to the other under this agreement is capped at the total value of this quotation, and neither party is liable for indirect or consequential losses. This limit does not apply to breaches of confidentiality or misuse of client data.
- **Termination:** Either party may terminate this engagement with 14 days' written notice. WeCare Technology pays only for work completed up to the termination date; Code-ox Technologies delivers all configuration and documentation completed to that point.
- **Confidentiality:** Both parties agree to keep the contents of this proposal confidential and not disclose them to any third party without prior written consent.
- **Governing Law:** This agreement shall be governed by the laws of the Kingdom of Saudi Arabia, with both parties entitled to equal recourse under it.

HIGHLIGHT — 6 MONTHS COMPLIMENTARY SUPPORT

Covered for 6 months from go-live, at no extra cost: bug fixes and configuration corrections on the CRM, Sales, Purchase, Inventory, Project, and Accounting modules as built, plus minor adjustments to fields, roles, and templates — target response **2 business days**. **Not covered:** new features, changes from Odoo platform updates, or issues from WeCare Technology's own post-launch configuration changes — these are scoped separately, keeping the period fair to both sides. An optional retainer covers support after 6 months.

ASSUMPTIONS & EXCLUSIONS

Key Project Assumptions

- ☐ WeCare Technology will provide master data — chart of accounts, product/service catalog, client, consultant, and vendor contacts — within **5 business days** of kickoff.
- ☐ Odoo licence/subscription (1–5 users, exact count confirmed at kickoff) is purchased and paid for directly by WeCare Technology with Odoo before implementation begins.
- ☐ Sample tender documents and BOQs from at least 2–3 recent projects are provided during discovery so CRM and Project templates are configured against WeCare's actual submission format.
- ☐ ZATCA e-invoicing configuration assumes WeCare Technology's existing ZATCA registration and compliance status is in order; ZATCA registration itself is not part of this scope.
- ☐ Since this is a fresh install, no legacy Odoo data or configuration exists to migrate or clean up.
- ☐ This quotation is valid for **30 days** from the date of issuance.

AUTHORIZATION

Acceptance & Authorization

By signing below, both parties confirm acceptance of this commercial quotation and authorize the commencement of the project under the terms, scope, and payment schedule set out above.
