

FINANCIAL PROPOSAL · ADD-ON TO JETHUR ENGAGEMENT

The LinkedIn Sales Engine

A dedicated pipeline-generating profile for Hazem Galal, VP of Sales — running in parallel with Jethur's existing authority presence.

PREPARED FOR

Hazem Galal

VP of Sales, Jethur
Personal LinkedIn Profile — Sales Engine
Billed to: Jethur (GRC Cybersecurity Platform)

PREPARED BY

Code-OX Technologies LLP

UAQ Business Centre, Westhill
Kozhikode, Kerala, India — 673005
mail@code-ox.com · www.code-ox.com

PROPOSAL DATE

1 September 2026

MONTHLY INVESTMENT

USD 400 / mo
≈ SAR 1,500 · add-on

GO-LIVE

5 September 2026
Content + outbound together

01 · CONTEXT

Two profiles, two jobs

Code-OX already manages Jethur's company LinkedIn page and the personal profile of **Hatem**, which we run as an **authority and thought-leadership builder** — it earns credibility and reach, but it is deliberately not used for direct selling.

Jethur has now asked Code-OX to also manage the personal LinkedIn profile of **Hazem Galal, VP of Sales**. The intent is clear and, in our experience, exactly right: give the sales motion its own dedicated engine so the authority profile stays clean while a second profile does the direct, measurable outreach. Both run in parallel and reinforce each other.

The split in one line. Hatem's profile builds the reputation. Hazem's profile turns that reputation into conversations — and routes every inbound enquiry, from either presence, to the person who can close it.

02 · OBJECTIVE

A dual-engine sales profile

ENGINE 1 · POSITIONING**Authority content**

Establish Hazem as a credible GRC & cybersecurity voice — so his outreach lands warm, not cold.

ENGINE 2 · OUTBOUND**Direct prospecting**

Daily connection requests and personalised messaging from Hazem's account to the target market, from day one.

ENGINE 3 · INBOUND**Enquiry routing**

Any inbound interest — from his content, the company page or Hatem's presence — is captured and directed to Hazem.

FOUNDATION**Same proven ICPs**

We reuse the audience targeting already validated on Hatem's profile — no new research, no ramp-up delay.

Because the targeting, tooling and operating model already exist on Hatem's account, this add-on starts at full speed. There is no separate discovery phase and no phased rollout — content and outbound begin together on the go-live date.

03 · WHAT CODE-OX DELIVERS

Scope of work

3.1 CONTENT — 3 TO 4 POSTS PER WEEK

We plan, write and publish a consistent content mix on Hazem's profile, in his voice, designed to build authority and open sales conversations:

- **Industry & thought-leadership** — GRC and cybersecurity topics that position Hazem as a knowledgeable voice
- **Deal wins & success stories** — credibility through outcomes
- **Expertise-driven posts** — practical, informed takes that a buyer respects
- **Personal storytelling** — the human layer that makes a sales profile approachable

3.2 OUTBOUND PROSPECTING — FROM HAZEM'S ACCOUNT

Operating on the same model as Hatem's account, Code-OX runs outbound directly from Hazem's LinkedIn profile: connection requests and follow-up messaging to the agreed ICPs, building a steady, compounding pipeline of relevant contacts.

10+

Connection requests
per day (minimum)

3-4

Authority posts
per week

Day 1

Outbound & content
run in parallel

3.3 INBOUND & RESPONSE HANDLING

Code-OX handles the **initial responses** to inbound messages and engagement — from both content and outreach — keeping every conversation warm and moving. Once a conversation moves into a genuine sales discussion, we **hand it off to Hazem / Jethur's sales team to close**. We generate and qualify the conversation; your team owns the deal.

3.4 MONTHLY REPORTING

A performance report each month covering **messages sent** and **qualified conversations**, alongside content engagement. Reporting is on **activity and engagement volume** — this is a consistent, compounding outreach engine, not a guaranteed-outcome promise, so we do not commit to a fixed number of meetings or deals.

Why activity-based reporting is the honest model. On LinkedIn, deals are closed by your sales team, not by a post. What we can control and be measured on is the volume and quality of qualified conversations we put in front of you — consistently, every week.

04 · WHAT WE NEED FROM YOU

Access & tools

4.1 ACCOUNT ACCESS

To run content and outreach from Hazem's profile, Code-OX requires **direct login access to Hazem's LinkedIn account** — the same trusted access model already in place for Hatem's account. Credentials are handled confidentially and used solely to deliver the services in this proposal.

4.2 LINKEDIN SALES NAVIGATOR

Effective outbound depends on **LinkedIn Sales Navigator** on Hazem's profile. If it is not already active, we recommend enabling it at onboarding. It is a **client-side licence (~USD 80 / month)**, purchased by Jethur directly — to be confirmed with Hazem during onboarding.

05 · INVESTMENT

A single, clean add-on fee

SERVICE	DETAIL	MONTHLY FEE
Hazem Galal — LinkedIn Sales Engine	Content (3–4 / week) · outbound (10+ connections / day) · inbound handling · monthly reporting	USD 400
Add-on total (≈ SAR 1,500 / month)		USD 400 / mo

Optional, client-side: LinkedIn Sales Navigator licence on Hazem's profile — **~USD 80 / month, paid by Jethur directly** (not included in the fee above).

WHERE THIS SITS IN THE JETHUR ENGAGEMENT

LINE	MONTHLY
Existing Jethur package (SEO + company/Hatem LinkedIn)	USD 1,050
New — Hazem Galal LinkedIn Sales Engine	USD 400
Combined monthly engagement	USD 1,450 / mo

Billing & terms. The add-on is billed to Jethur alongside the existing monthly retainer, invoiced in advance, and runs **co-terminously on the same month-to-month renewal cycle** as the current Jethur package — either party may adjust or stop this line with 30 days' written notice. Fees are in USD, exclusive of any applicable taxes.

06 · TIMELINE

Live in days, not weeks

DATE	MILESTONE
On acceptance	Onboarding: account access confirmed, Sales Navigator status checked, ICP reuse confirmed from Hatem's profile
5 September 2026	Go-live — content publishing and outbound prospecting begin together
Ongoing	3–4 posts / week · 10+ connection requests / day · inbound response handling
Monthly	Performance report — messages sent, qualified conversations, engagement

07 · NEXT STEPS

To get started

- 1 Approve this proposal** — a reply confirming acceptance is enough to begin onboarding.
- 2 Share access** to Hazem's LinkedIn profile and confirm Sales Navigator status.
- 3 Confirm ICP reuse** — we carry over the targeting already proven on Hatem's profile.
- 4 Go live on 5 September** — content and outbound start the same day.

One note on the paperwork. This proposal is accompanied by a short add-on agreement that attaches to Jethur's existing Digital Partnership Agreement with Code–OX. Nothing else about the current engagement changes.
