

DEVELOPMENT PROPOSAL · 25 SEPTEMBER 2026

Build the platform that turns data into decisions.

A complete design-and-build proposal for Version 1 of the Nabdha AI platform — the business owner uploads their data, Nabdha AI analyzes it across every part of the business, and returns a full business health diagnosis, the top risks, the top opportunities, a 30-day forecast, and a prioritized action plan.

01 · THE BRIEF

Project overview & our understanding

Nabdha AI has asked us to build **Version 1 of its AI business intelligence platform** — a tool that reads an SME's own business data across sales, inventory, customers, orders, payments and delivery, and tells the owner what to do next, not just what happened. The business owner uploads their data, Nabdha AI analyzes it end to end, and the owner receives a full Business Intelligence Report.

This is a **complete design-and-build engagement**: data upload and cleaning, an AI analysis engine, an AI-generated report, a web dashboard in Arabic and English, secure login, and go-live support. Every number in the report is calculated by code running on the owner's own data — the AI layer only explains, ranks and writes the recommended actions, keeping the output accurate and trustworthy from day one.

02 · OBJECTIVES

What Version 1 sets out to achieve

Trustworthy numbers

Every figure in the report is calculated by code, not guessed by the AI — building confidence from the first report.

Decisions, not dashboards

Top risks, top opportunities and a prioritized action plan — not a wall of charts to interpret.

Fast, friction-free data entry

Excel, CSV or PDF upload — no system integrations required to get a first report.

Forward-looking

A 30-day sales forecast alongside the diagnosis, so owners see what's coming next.

Arabic-first, bilingual

Full Arabic and English report and dashboard for the Saudi SME market.

Architecture that scales

Built so direct system integrations and advanced features can be added later without a rebuild.

Version 1 is data-upload only. Direct integrations with e-commerce, POS and accounting systems (Salla, Zid, Foodics, Odoo and similar) are a future phase, architecture-ready but not part of this build.

03 · SCOPE

What we'll design & build

A complete data-to-decision platform, built in three layers: how data comes in, how the AI reads it, and what it hands back to the owner.

DATA INGESTION & PROCESSING

COMPONENT	SCOPE DESCRIPTION
Multi-Source Data Upload	Excel (.xlsx), CSV and PDF upload with downloadable templates covering Sales, Inventory, Customer, Order, Payment/Financial and Delivery/Logistics data.
Data Cleaning & Standardization	Common data model mapping, format standardization (dates, currency, AR/EN), missing and incomplete record detection.
Deduplication & Validation	Duplicate-record detection, unusual-value flags, and consistency checks across every uploaded file.
Data Quality Score	A visible quality score shown before the report generates — a weak report is explained by weak data, not the platform.

AI ANALYSIS ENGINE

COMPONENT	SCOPE DESCRIPTION
Sales Signal Detection	Week-on-week and month-on-month decline, sudden spikes/drops, slowing growth, single-product revenue concentration.
Inventory Signal Detection	Stock-out risk (days of stock vs. supplier lead time), slow-moving stock and overstock exposure.
Customer Signal Detection	Revenue concentration in top customers, churn detection, falling repeat-purchase rate.
Profit & Cash Signal Detection	Margin trend per product, expenses growing faster than revenue, cash-position indicators.
Opportunity Signal Detection	Growing-demand products, cross-sell/bundle pairs, seasonal and regional demand patterns.

BUSINESS INTELLIGENCE & FORECASTING

COMPONENT	SCOPE DESCRIPTION
Business Health Overview	A single high-level diagnosis across sales, inventory, customer, cash and operational indicators.
Top 3 Risks	Title, explanation, supporting evidence and potential business impact for each risk.
Top 3 Opportunities	Opportunity, why it was identified, supporting data and a recommended action.
30-Day Sales Forecast	Expected sales trend and revenue range for the next 30 days, based on uploaded historical data.
Prioritized Action Plan	High / Medium / Low priority actions tied directly to each detected risk and opportunity.

03 · SCOPE — CONTINUED

Dashboard, platform & launch

WEB DASHBOARD AR / EN

COMPONENT	SCOPE DESCRIPTION
Decision-First Report View	One connected view presenting risks, opportunities, forecast and the action plan — not a wall of charts.
Nine Dashboard Sections	Business Health, Sales, Inventory, Customers, Orders & Operations, Risks, Opportunities, Forecast and Recommendations.
Bilingual Interface	Full Arabic and English UI with RTL/LTR layout switching.

ACCOUNTS, ORGANIZATION & SECURITY

COMPONENT	SCOPE DESCRIPTION
Secure Login & Org Setup	Account authentication and an isolated data space per organization — the foundation for multi-tenant scale.
Encryption	Data encrypted in transit and at rest.
Secure API & Input Validation	Secure API architecture with input validation on every upload and request.
Secure File Upload	Uploaded files validated before processing.

TESTING & LAUNCH

COMPONENT	SCOPE DESCRIPTION
Functional Testing	Every module tested against the scope set out in this proposal.
Data-Validation Testing	Report accuracy checked against real uploaded datasets.
UAT Support	Guided user-acceptance testing with the Nabdha AI team.
Production Deployment & Handover	Live deployment plus credentials and access handover.

NOT INCLUDED IN THIS PHASE

Direct system integrations (Salla, Zid, Shopify, WooCommerce, Foodics, Odoo, Rewaa, Qoyod, Daftra, Zoho Books, Salesforce/Dynamics 365), the conversational AI Business Advisor, and automated alerts are future-phase items — architecture-ready, quoted separately when scoped.

04 · INVESTMENT

Your investment

COMPLETE PLATFORM DESIGN & DEVELOPMENT

Data upload, AI analysis engine, Business Intelligence Report, 30-day forecast, web dashboard, secure login, QA & go-live — designed, built, tested and launched.

SAR 55,000

one-time project fee · exclusive of VAT

PAYMENT SCHEDULE

MILESTONE	%	AMOUNT (SAR)
Advance — on sign-off & kickoff	50%	27,500
Final — on UAT completion & go-live	50%	27,500
Total	100%	SAR 55,000

Exclusive of VAT. VAT (15%) will be added to each invoice as per KSA regulations.

THIRD-PARTY COSTS — CLIENT RESPONSIBILITY

LLM/AI API usage costs and server/hosting charges are **not included** in this quotation and are borne directly by Nabdha AI.

05 · SUPPORT & MAINTENANCE

You're covered from day one

Every launch includes a genuinely free runway before any ongoing fee starts.

INCLUDED AT NO EXTRA COST

4 Months Complimentary Support

Starting the day the platform goes live, Nabdha AI receives **four full months of support at no charge** — the annual maintenance fee below does not start until this period ends.

WHAT'S INCLUDED IN THE 4 FREE MONTHS

- **Bug fixes** — any defect against the agreed scope, fixed at no cost.
- **Configuration support** — minor settings, template and report-parameter adjustments.
- **Priority email support** — direct access to the delivery team for issues.
- **Post-launch onboarding assistance** — helping the Nabdha AI team get comfortable with the platform.

ANNUAL MAINTENANCE CONTRACT (AMC) — FROM MONTH 5

Once the complimentary period ends, continued support is covered by an annual maintenance contract — billed yearly, renewable, and separate from any future feature or integration work.

Covered by the AMC

- Bug fixes & defect resolution
- Minor configuration changes
- Security patches & updates
- Platform performance monitoring
- Priority support channel

Not covered by the AMC

- New features or modules
- Direct system integrations
- Major redesigns or scope changes
- LLM/AI API and server/hosting costs

ITEM	FEE
Annual Maintenance Contract Billed annually · exclusive of VAT · first invoice at month 5, renewable each year	SAR 10,000 / year

Items outside AMC coverage — new features, integrations or major changes — are scoped and quoted separately, the same as any future engagement.

06 · TIMELINE

Indicative schedule — 30–40 days

The schedule below is **indicative**. Actual timing depends on data readiness, feedback turnaround and scope confirmation at kickoff. Stages may overlap.

PHASE	DURATION
1 • Discovery & Setup Confirm data templates, environment setup, architecture sign-off	Days 1–5
2 • Core Build Data upload & cleaning, AI analysis engine, signal detection	Days 6–20
3 • Report & Dashboard Business Intelligence Report generation, 30-day forecast, web dashboard (AR/EN)	Days 21–30
4 • QA & Go-Live Testing, UAT support, production deployment and handover	Days 31–40
Indicative total	30–40 days

07 · TERMS & CONDITIONS

Terms & conditions

- 1

Scope. Work is limited to the scope set out in this proposal. Direct system integrations and features outside this scope are quoted and agreed separately.
- 2

Fees & payment. The project fee is **SAR 55,000** exclusive of VAT, payable per the milestone schedule (50% on kickoff, 50% on go-live).
- 3

Client responsibilities. Nabdha AI provides sample business data, timely feedback, and testing access within agreed deadlines. Delays caused by the client may impact the timeline.
- 4

Third-party costs. LLM/AI API usage and server/hosting charges are not included and are Nabdha AI's responsibility, billed directly by those providers.
- 5

Intellectual property. On receipt of full payment, all custom code and deliverables become Nabdha AI's property. Third-party libraries remain under their own licences.
- 6

Support & maintenance. 4 months of complimentary bug-fix support are included from go-live. Annual maintenance thereafter is SAR 10,000/year, billed separately.
- 7

Confidentiality. Both parties keep the contents of this proposal confidential, without prior written consent.
- 8

Governing law & validity. This engagement is governed by the laws of the Kingdom of Saudi Arabia. This proposal is valid for 30 days from the date of issue.

08 · NEXT STEPS

Getting started

Three simple steps to move from proposal to a live platform.

- 1 A short discovery conversation** to confirm scope and sample data readiness.
- 2 Confirm the terms** and the payment schedule set out in this proposal.
- 3 Kick off** — on the signed proposal and advance payment, we begin discovery and environment setup.
